ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:
- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:
- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently $30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to $50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Thursday for publication on the following Thursday. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is $AU 100 and for a half page is $AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of $AU 15. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2003

Melbourne	12 - 16 May
Sydney	14 - 18 July
Adelaide	5 - 6 August
Perth	7 - 8 August
Brisbane	4 - 5 September

Trade Mark Matters 2003

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **Internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

   e.g. 2002901123

   A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

   e.g. 2002200345 Standard

2002100123 Innovation

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

(i) Provisional Applications Filed,

(ii) Complete Applications Filed,

(iii) Applications Open to Public Inspection

(iv) Applications Accepted, and

(v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for **I**nternational **P**atent **C**lassification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

ITEM	INID No.
A) Provisional applications filed - Name Index	
The name of the applicant	(71)
The Provisional application number	(21)
The date of filing	(22)
The title of the invention	(54)

ITEM	INID No.
B) Complete applications filed - Name Index	
The name of the applicant	(71)
The number assigned to the application	(21)
The date of filing	(22)
Title of the invention	(54)
Number of priority document(s) if any	(31)
Date(s) of filing of priority documents	(32)
Country of which priority documents filed	(33)
PCT application number	(86)

ITEM	INID No.
C) Applications open to public inspection - Name Index	
The name of the applicant	(71)
The number of the document	(11)
The number assigned to the application	(21)
The date of filing	(22)
The title	(54)
The classification marks	(51)
Priority document number(s)	(31)
Date of filing of priority document(s)	(32)
Country in which priority document filed	(33)
Publication date of unexamined document	(43)
Inventors names if known	(72)
Patent Attorneys	(74)

ITEM	INID No.
D) Applications accepted - Name Index	
The name of the applicant	(71)
The number of the document	(11)
The number of the accepted document	(10)
The number assigned to the application	(21)
The date of filing	(22)
The title	(54)
The classification marks	(51)
PCT publication number	(87)
Priority document number	(31)
Date of filing of priority document(s)	(32)
Country in which priority document filed	(33)
Publication date of unexamined document	(43)

Related by addition	(61)
Related by division	(62)

Publication date of examined document	(44)
Publication date of granted patent	(45)
Inventors names	(72)
Patent Attorneys	(74)
Related by addition	(61)
Related by division	(62)

ITEM	INID No.
E) Patents Certified – Name Index	
The name of the applicant	(71)
The number of the accepted document	(10)
The number assigned to the application	(21)
The date of filing	(22)
The title	(54)
The classification marks	(51)
Priority document number	(31)
Date of filing of priority document(s)	(32)
Country in which priority document filed	(33)
Publication date of granted patent	(45)
Inventors names	(72)
Patent Attorneys	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

A) **Provisional** Applications filed.

B) **Complete** Applications filed.

C) Innovation Applications filed.

D) Applications **Open to Public Inspection.**

E) Applications **Accepted**.

F) Innovation Patent Certified

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

A) Applications **OPI** - IPC Index

B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for '**I**nternationally agreed **N**umbers for the **I**dentification of **D**ata'.

(10) Document identification
- **(11)** Number of the document
- **(12)** Plain language designation of the kind of document
- **(19)** WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data
- **(21)** Number(s) assigned to the application(s).
- **(22)** Date(s) of filing application(s)
- **(23)** Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- **(24)** Date from which industrial property rights may have effect.

(30) Priority data
- **(31)** Number(s) assigned to priority application(s)
- **(32)** Date(s) of filing priority application(s)
- **(33)** Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public
- **(43)** Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- **(44)** Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- **(45)** Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information
- **(51)** International Patent Classification
- **(52)** Domestic or national classification
- **(54)** Title of invention
- **(56)** List of prior art documents, if separate from descriptive text
- **(57)** Abstract or claim

(60) Reference(s) to other legally related domestic document(s)
- **(60)** Related by cognate(s).
- **(61)** Related by addition(s).
- **(62)** Related by division(s).

(70) Identification of parties concerned with the document
- **(71)** Name(s) of applicant(s)
- **(72)** Name(s) of inventor(s) if know to be such
- **(74)** Name(s) of attorney(s) or agent(s)
- **(75)** Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention
- **(86)** PCT Application Number
- **(87)** PCT Publication Number

NOTE

(1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination **AU-B** = Post-examination

(2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as $(51)^2$, $(51)^3$, $(51)^4$ and $(51)^5$.

(3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notice

Amendment of paragraph 3.17A(2)(c) of the Patents Regulations 1991:

Time for providing search results under subsection 45(3) of the Patents Act 1990

Under the current regime for provision of search results in respect of applications for standard patents, the earliest date that subsection 45(3) of the Patents Act must be complied with is 1 June 2003 — see paragraph 3.17A(2)(c) of the Patents Regulations.

On 27 June 2002, the Intellectual Property Laws Amendment Bill 2002 was introduced into Parliament. The Bill limits the types of searches for which search results must be disclosed, to searches conducted by, or on behalf of, foreign patent offices.

On the basis that the Bill passes through Parliament and becomes law, it is intended that the more onerous requirements of the present subsection 45(3) will be, in effect, completely superseded by the new disclosure requirements set out in the Bill. To that end, the date set under paragraph 3.17A(1)(c) of the Patents Regulations needs to be later than the date of commencement of the new provisions. As the Bill has not yet been passed by Parliament, the new disclosure requirements will not commence before 1 June 2003.

This notice is to advise users that paragraph 3.17A(2)(c) has been amended to specify **1 February 2004** as the earliest date by which the current subsection 45(3) provisions must be complied with [Patents Amendment Regulations 2003 (No. 1)]. These regulations commenced on gazettal, Monday 28 April 2003.

Official Notice

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

Application	:	No. **690433** in the name of **PECHINEY RHENALU**
Title	:	**Product for Obtaining Welded AlMgMn Alloy Structures with Improved Mechanical Resistance**
Action	:	Opposition by **CORUS ALUMINIUM WALZPRODUKTE GmbH** under Section 59 of the Patents Act 1990
Decision	:	Issued 10 April 2003.

Abstract

The opponent pursued the grounds of section 40/Fair basis, novelty, inventive step and manner of manufacture. The opponent has been unsuccessful on the grounds of novelty, inventive step and manner of manufacture.

I have found that claims 12 to 19 of the opposed application lack fair basis and do not define the invention described.

As I consider that the defects in the opposed specification could be overcome by suitable amendments I grant the applicant sixty days from the date of this decision to file suitable amendments.

Both parties had submitted that costs should follow the event. Accordingly I award costs against the applicant Pechiney Rhenalu and in favour of the opponent Corus Aluminium Walzprodukte GmbH.

Official Notice

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

Application	:	Nos. **723591, 731606, 734008, 735827, 738356** and **739324** in the name of **Cryovac, Inc**
Titles	:	High Modulus Film; Printed Polymeric Film and Process For Making Same; Film From A Vinylidene Chloride Copolymer Containing Blend; Heat Sealable Film; Blister-Type Package; and Easy Open Tear Film.
Action	:	Requests for extensions of time **by Pechiney Plastic Packaging, Inc** to serve evidence in support; objections thereto by **Cryovac, Inc**
Decision	:	Issued 11 April 2003.

Abstract

The consequences of refusing to admit evidence already filed would be severe in relation to determining the opposition on its merits, whereas any adverse consequences in allowing it are less apparent. Extensions of time allowed to 19 February 2003 on applications 723591, 731606, 734008, 735827, 738356 and 739324 to admit the evidence already served.

The further evidence to be served in support is likely to be important and will enable the oppositions to be determined on their merits. There appears to have been some lack of diligence in the preparation of the evidence, but when taken in context the lack of diligence is not as great as it would at first seem. It is appropriate in the somewhat unusual circumstances here to take into account the progress in relation to the whole dispute between the parties, rather than focus solely on what has been done in relation to an individual opposition. On balancing all relevant circumstances the extensions of time requested are appropriate.

Extensions of time to serve evidence in support granted to 28 February 2003 on application 723591; to 4 April 2003 on application 731606; to 28 February 2003 on application 734008; to 21 April 2003 on application 735827; to 13 March 2003 on application 738356; and to 11 April 2003 on application 739324.

No award of costs.

Official Notice

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

Application	:	No. **748263** in the name of **ACRES GAMING, INC. AND IGT (AUSTRALIA) PTY LIMITED**
Title	:	**OPERATION OF GAMING MACHINES IN A LINKED BONUS PRIZE WINNING MODE**
Action	:	An application for an extension of time by **ARISTOCRAT TECHNOLOGIES AUSTRALIA PTY LTD** to serve evidence in support under regulation 5.10(2) and an objection thereto by **ACRES GAMING, INC. AND IGT (AUSTRALIA) PTY LIMITED**
Decision	:	Issued 17 April 2003.

Abstract

Found that the opponent had provided sufficient details supporting a case, which justified the requested extension of time. Regarding the public interest three different aspects had been considered. In the matter of the need for the Commissioner to ensure that invalid patents are not granted, the public interest would clearly favour a grant of an extension of time. In the consideration of the nature of the evidence the opponent seeks to adduce and the significance of that evidence for opposition proceedings, it was found that from a consideration of the statement of grounds and particulars, an extension of time would clearly be in the public interest. Against this, the need to ensure that proceedings are not unduly protracted would require that the request for an extension be refused but as the protraction has not been shown to be undue, a refusal of the extension would be unjustified. In the matter of the private interests of the parties, the opponent's interests were best served by the grant of an extension, whereas the applicant's interests were best served by a refusal of the extension.

Finally after due consideration of all relevant matters, the granting of an extension of time to 28 May 2003 to the opponent to file evidence in support was found to be appropriate in all the circumstances.

Costs (in accordance with Schedule8 of the Patents Regulations) awarded against the applicant Acres Gaming, Inc. and IGT (Australia) Pty Limited and in favour of the opponent Aristocrat Technologies Australia Pty Ltd.
