“INID” NUMBERS in use on Australian Design Documents

“INID” is an acronym for “Internationally agreed Numbers for the Identification of Data”.

(10) Data concerning the registration/renewal

- (11) Serial number of the registration and/or number of the design document
- (12) Plain language designation of the kind of published document
- (19) Identification, using the two-letter code according to WIPO Standard ST.3, of the authority publishing or registering the industrial design

(20) Data concerning the application

- (21) Serial number of the application
- (22) Date of filing of the application
- (24) Date from which the industrial design right has effect

(30) Data relating to priority under the Paris Convention

- (31) Serial number assigned to the priority application
- (32) Date of filing of the priority application
- (33) Two-letter code, according to WIPO Standard ST.3, identifying the authority with which the priority application was made

(40) Date(s) of making information available to the public

- (45) Date of publication of the registered industrial design by printing or similar process, or making it available to the public by any other means

(50) Miscellaneous Information

- (51) International Classification for Industrial Designs (class and subclass of the Locarno Classification)
- (54) Designation of article(s) or product(s) covered by the industrial design or title of the industrial design
- (55) Reproduction of the industrial design (e.g., drawing, photograph) and explanations relating to the reproduction
- (56) List of prior art documents, if separate from descriptive text
- (57) Description of characteristic features of the industrial design including indication of colours

(60) References to other legally related application(s) and registration(s)

- (62) Serial number(s) and, if available, filing date(s) of application(s), registration(s) or document(s) related by division
- (66) Serial number(s) of the application, or the registration, of the design(s) which is (are) a variant(s) of the present one

(70) Identification of parties concerned with the application or registration

- (71) Name(s) and address(es) of the applicant(s)
- (72) Name(s) of the creator(s) if known to be such
- (74) Name(s) and address(es) of the representative(s)

Official Notice**ABSTRACT OF REASONS FOR A DECISION OF A
DEPUTY REGISTRAR OF DESIGNS**

- Designs** : Designs 315785, 315786, 315787, 315788 and 315789, all in the name of **Locmac Holdings Pty Ltd as trustee for Locmac Trust**
- Action** : Request under s.51 for *revocation on grounds relating to entitled persons* by **Dennis Gravolin and Trailer Vision Pty Ltd**
- Decision** : Parties had a contractual arrangement for the exploitation of a patent held by Dennis Gravolin. Shortly after the termination of the arrangement, Locmac filed the present Designs. Mr Gravolin, (and his company Trailer Vision), asserted entitlement to the designs asserting that:
- in the course of the relationship between the parties, Locmac became aware of confidential information, and
 - that information was the basis of the designs applied for – either directly, or because Locmac would not have come up with the designs without the benefit of that confidential material.

Found: There was no employer/employee arrangement, or fiducial obligations, created as a result of the agreement.

While some conduct implied a collaborative arrangement beyond the scope of the agreement, this was not relevant to any of the designs.

The publication of a patent application (applied for by Mr Gravolin) 5 months prior to the designs being filed, removed any confidentiality associated with the drawings contained in the patent application.

The applicant failed to establish any basis for being considered the author or owner of the designs.

Decision Issued : 18 Dec 2007

Official Notice

**ABSTRACT OF REASONS FOR A DECISION OF A
DEPUTY REGISTRAR OF DESIGNS**

Designs :	303976, 303977, 303978, 303979, 304539, 304540 and 304541
Applicant :	Reckitt Benckiser Inc
Decision :	Hearing requested in response to first report in examination.

Operation of s.28 discussed – amendments of an application after Registration is possible in principle – providing there is a useful purpose.

Amendment of a Statement of Newness and distinctiveness after registration was not possible under s.28 – because of the definition of that statement.

It is appropriate to construe an ambit statement of newness and distinctiveness that does not identify any specific visual feature, as a reference to the combination of *all* visual features of the design as shown in the representations.

All items of the prior art base are available for the test of distinctiveness. The concept of ‘informed user’ sets the standard to be applied in making the comparison – it does not apply to exclude items of the prior art from consideration.

The scope of the design is properly ascertained by considering the causative relationship between ‘one or more visual features’ and the overall appearance of the product – as specified in the definition of *design*. Where the visual features of the design are present in a citation, the question to be asked is the effect of those visual features on the

overall appearance of the product in the citation. If the features of the design are clearly evident in the overall appearance of that product, the presence of other visual features in the citation does not detract from the fact that the design exists in the citation.

The greys used in a grey scale representation of a product are usually a drafting method to indicate that colour *per se* is not a visual feature of the design. In particular, unless the contrary intention is apparent the greys used in a grey-scale representation do not constitute a disclosure of those greys as a visual feature of the design, and an amendment to render the greys as a visual feature contravenes s.66(6)(b).

Designs 303976, 304539, 303977, and 303979 revoked – having regard to certain publications in the owner’s annual report (which was published shortly before the priority date).

Designs 303978, 304540 and 304541 were found to be new and distinctive – although the owner was given an opportunity to seek amendment prior to completion of examination.

Decision Issued : **2 January 2008**

Publication and Registration Proceedings

Designs Registered

This section provides a concordance between design number and registration number of Designs covered in this journal. It also shows the main class and registration date.

This section covers Registration numbers 317253 to 317512 .

The registration number shown below should be used in all future correspondence.

Design Number	Registration Number	International Classification Code (IDC)	Registration Date	Design Number	Registration Number	International Classification Code (IDC)	Registration Date

(21) Design Number: **19692/2007**
(22) Date of Filing Application: **10 September 2007**
(24) Date from which industrial property rights may have effect: **10 September 2007**
(54) Product in respect of which the design is registered: **Razor cartridge container**
(51) International Design Classification: **03-01D**
(71) Name(s) and Address(s) of Applicant(s):
 The Gillette Company
 Prudential Tower Building 38th floor 800 Boylston Street Boston
 Massachusetts 02199 United States of America
(72) Name(s) of Designer(s): **Douglas Robert Kohring**
(45) Registration Date: **17 December 2007**
(30) Convention priority data:
 (31) Number (32) Date (33) Country
 29/285,049 20 Mar 2007 UNITED STATES OF AMERICA
(56) Related Art Documents: **Not Applicable**
(57) Statement of Newness and Distinctiveness: **Newness and distinctiveness reside in the features of shape and/or configuration of the razor cartridge container, as shown in the representations.**

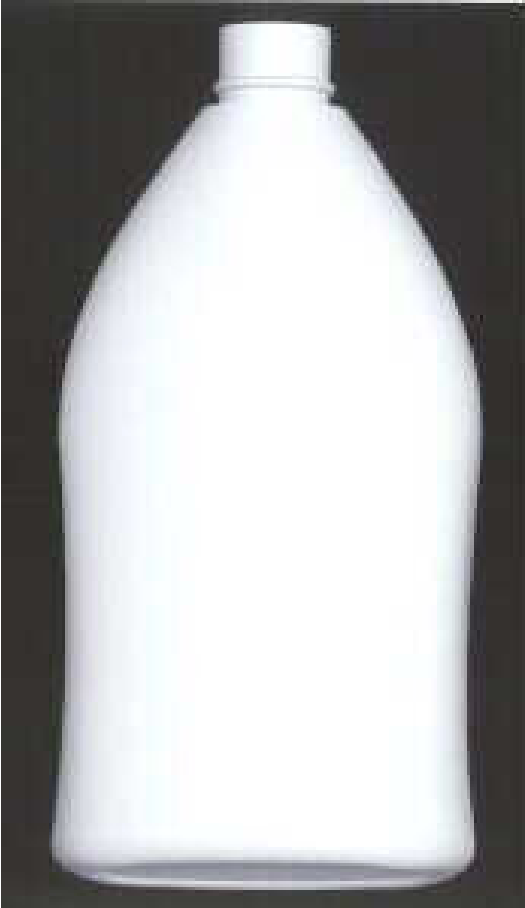

(21) Design Number: **19693/2007**
(22) Date of Filing Application: **10 September 2007**
(24) Date from which industrial property rights may have effect: **10 September 2007**
(54) Product in respect of which the design is registered: **Razor cartridge container**

- (57) Statement of Newness and Distinctiveness: Method to save and store water. Panels that store water (PSW) can be used for new and existing fences around domestic dwellings and commercial infrastructures. PSW can also be used in recreational parks and gardens in fact any where that rain water is required. The panels can be incorporated into seating, barriers or landscaping designs. PSW can be constructed of plastic/polyethylene/steel/ fiberglass/concrete/fibre cement or any other new age products that would be suitable to construct fence panel units. PSW come in sections that can connect together through an interlocking connecting system, this connecting system is locked together with hold down bolts that slot through from the top of the panel down into concrete footings. There is also a connecting piped system that distributes the water throughout the total length of the panels. PSW have set dimensions. End extensions can be achieved through false panelling. PSW have fixing holes for the attachment of all exterior claddings i.e.: rock, stone, wood, brick, blue board etc. First flush diverter's installed will help give extra cleanliness to the water. The water collection trough that runs into the fill point will have a mesh filter system fitted.

(22) Date of Filing Application: **29 March 2007**
(24) Date from which industrial property rights may have effect: **29 March 2007**
(54) Product in respect of which the design is registered: **Service station petrol/diesel pump's electrical system**
(51) International Design Classification: **08-08B**
(71) Name(s) and Address(s) of Applicant(s):
 Triflex Electrical Pty Ltd
 4/20 Tucks Road Seven Hills New South Wales 2147 Australia
(72) Name(s) of Designer(s): **Ross Edward Jorgensen**
(45) Registration Date: **02 January 2008**
(56) Related Art Documents: **Not Applicable**
(57) Statement of Newness and Distinctiveness: **This conduit connector with a male connection thread is designed for use in service station petrol pump electrical installations. The connector is used in conjunction with the flexible pvc braided conduit. The conduit and connector provide a flexible connection between the underground conduit and the pump. This connector, which incorporates a "barrier" chamber, supercedes an existing system by combining several discrete components into a single unit thereby facilitating a speedier and more cost efficient installation.**

(54) Product in respect of which the design is registered: Insulation Spacer - 3 Legs

(51) International Design Classification: 08-08B

(71) Name(s) and Address(s) of Applicant(s):

Richard Barry

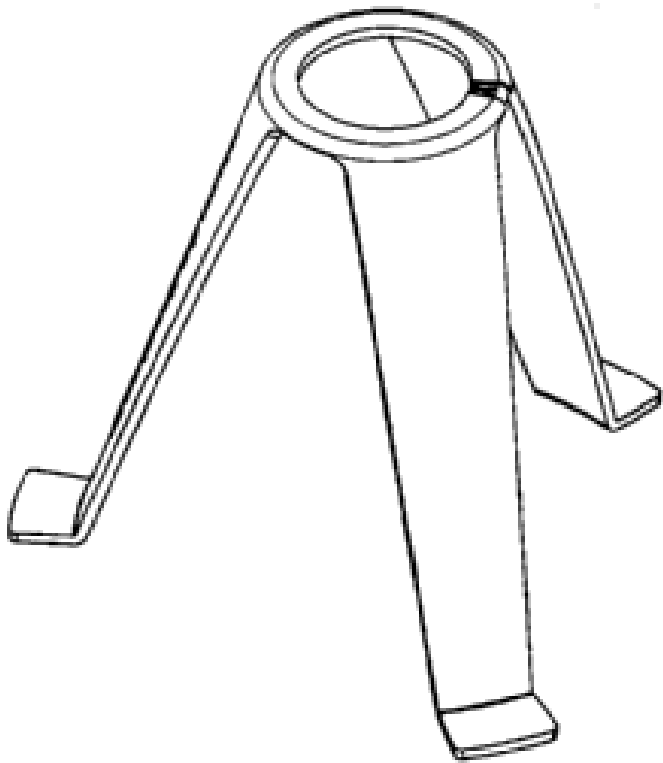

57A Chepstow Place London W24TS United Kingdom

(72) Name(s) of Designer(s): Richard Barry

(45) Registration Date: 08 January 2008

(56) Related Art Documents: Not Applicable

(57) Statement of Newness and Distinctiveness: Being injection moulded, product has flexible legs that can be squeezed together in order to insert the product into ceiling cutout holes. The top rim can cut in designed spot in order to fit into cut-out sizes smaller than the uncut rim. Height maximised for heat dissipation. Teeth on feet for stability. Also be inverted to sit on rim. Insulation Spacers (being both the '3 legs' and '4 legs') are an innovative new product that creates "ventilation zones" between halogen downlights and insulation material. This is achieved by Insulation Spacers simply creating a space between insulation material and halogen downlights, allowing for the free flow of air through and around halogen downlights (and ancillary transformers/electrical wiring). These "ventilation zones" created by Halipod Insulation Spacers help reduce fire hazards in danger areas of ceilings. Figure 1 show the Insulation Spacers - 3 legs. The legs are rigid enough to support the weight of insulation material, but also flexible enough to be squeezed together so it can be inserted into a cut-out hole in the ceiling. The insulation spacer can be placed either on its feet or can also be inverted to sit on the rim (with upward pointing legs creating an even bigger 'ventilation zone'). When placed on its feet, there are also teeth on the base of the feet to help hold it firmly in place. Figure 2 shows a close up of the specially designed area on the top rim which can be cut in order for the top rim to be squeezed together so the Insulation Spacers can be inserted into cut-out hole sizes smaller than the diameter of the top rim. Figure 3 shows how the Insulation Spacers can be inserted into the ceiling. Figure 4 shows how the Insulation Spacers created 'ventilation zones' between insulation material and halogen downlights, for when the Insulation Spacers are placed on their feet in the ceiling. (It was noted above that the Insulation Spacers can also be inverted, so that the feet will point upward supporting the insulation material and creating a bigger 'ventilation zone').
