(57) Statement of Newness and Distinctiveness: **The continued distinctive theme of RastOrder carts is evidenced here in the configuration of 25mm (1 inch) square tubing and this particular patterned sheeting, along with the use of dark colours. There is continuity in these particular style of rear wheels, coupled with front castors. Newness is in its overall design: Specific examples are; In the mounting of the bicycle wheels forward within the carts natural framework. In the deliberate stylised (yet practical) gaps in the bottom shelf sides at the front and rear where the axles protrude inwards. In the sideways presenting top shelf, the offset rear handle to allow room for accessories and the extra protrusion (a cable hook) below the handle in the same frame tubing. All of the above are represented in the accompanying representations.**

A line drawing of a pen, oriented diagonally. The pen has a simple, tapered body. A section of the barrel, located towards the back, is decorated with a dense, irregular pattern of small, dark, circular or oval shapes, giving it a textured or 'stippled' appearance. The drawing is minimalist, using only black outlines on a white background.

(57) Statement of Newness and Distinctiveness: **The following statement is provided to facilitate an understanding of some of the innovative features unique to the design. This design has been specifically devised and provides a simple method for increasing portion control in a diet. A portion control device in accordance with this design comprises a mould sized to cover at least a portion of the eating surface of a plate. The one or more openings and the one or more compartment walls define a protion compartment that may help to manage, and measure protions of food. The bottom edge of the cylindrical walls is provided to fit to the contour of the eating surface of a dinner plate. With this configuration, the food may be less likely to escape underneath the bottom of the cylindrical walls. The portion controlled serving mould consists of three compartments, defining three portion compartments, two of which are enclosed and one of which extends through the perimeter of the mould. The mould includes a measure indicator. The measure indicator is a measure line on the inside of the compartment walls. Additionally, a key for the measure indicator is provided on the upper surface of the mould, to indicate the measure related to the measure line. Additionally, the three compartments of the mould include one or more labels. The labels indicate the type and recommended serving size of food that should be placed in each of the portion compartments, based on The Australian Guide to Healthy Eating.**
