(57) Statement of Newness and Distinctiveness: **This design is for sauces, salad oils, mayonnaise, liquid chocolate, liquid coffee essence, syrups and other such liquid flowable products. It has been designed with two separate symmetrical container sides, but contained within the one package form - with 4 separate opening points. Distinctive features include: 1. Two snap-off, pull back openings on the top end of the package - for independent opening of one or both snap ends - for dispensing the product by squeezing one side of the base of the package at a time. 2. Where both snap off ends are pulled back - this is also designed such that the two sides of the package can be crushed one into the other, thereby enabling both sides of the product contained to be dispensed simultaneously. 3. Separate corner snap off ends (bottom corner ends) to enable lid section to be pulled off entirely - either as one piece or two pieces, so that the opened package can be used for the purpose of dipping food product into the liquid contained within the package (one or both sides). 4. A perforation easy tear line is located at a central point of the package lid, extending from top to bottom of the lid section. This is designed to enable each side of the lid section to be removed independently of the other - either at one time or sequentially over a period of time. 5. Other distinguishing feature is in the shape of the package and its symmetrical design.**

A black and white photograph of a square, metallic-looking panel. In the center of the panel is a dark, rectangular handle or slot. The panel has a slightly textured surface and a thin, dark border around its edges. The lighting creates subtle highlights and shadows, emphasizing its three-dimensional form.

A black and white photograph of a rectangular, metallic-looking panel. The panel has a brushed metal texture and a dark, recessed handle or slot in the center. The handle is slightly curved and appears to be made of a different material, possibly plastic or a darker metal. The panel is shown at an angle, highlighting its three-dimensional form and the contrast between the light and dark surfaces.

A line drawing of a perfume bottle. The bottle has a rectangular body with rounded corners and a cylindrical cap. The cap has a small, dark, curved detail on top. The bottle is shown from a three-quarter perspective.

(57) Statement of Newness and Distinctiveness: **Listed below are the features that are considered distinctive in the design. PRIMARY 1. Heart shape of package 2. The unique combination of a package and knife edge in the one package form. SECONDARY 3. Two separate but distinguishable chambers to contain two separate products within an overall heart shape package form. 4. "Snap off" closure at front edge of package - designed to snap off end of bottom film and peel back both the snapped off end and the top film to reveal dual openings for dispensing both products. 5. Once "snap off" end is peeled back, this reveals a straight edge, which acts as a spreader which acts as a knife edge to enable dispensed products to be spread onto a surface exactly where required - eg jam, sauce, salad oil to spread onto toast, bread, pie, meat, salad etc.**

(57) Statement of Newness and Distinctiveness: **Swaddling suit/blanket. It is unique as it allows for the baby's arms to be upright, crossed over the chest or downright in line with the body while they are sleeping, ensuring an efficient and secure swaddling method. The blanket section can also be folded underneath arms to allow free movement of the baby's arms without restriction while awake i.e. holding their own bottle/feeling their own skin, unlike others where this sensation is restricted (Please refer to photograph enclosed). The bottom leg section has the ability to act as a jumpsuit by attaching the press studs downwards together in a way that separates the middle, allowing for easy access to car/capsule belts without hassle. (Refer to figure 1) Attaching the press studs together across in a way to create a sack look allows for free movement while in the pram or in cot (Refer to figure 4).**

(57) Statement of Newness and Distinctiveness: **Thurley Pty Ltd believes the design is new and distinctive as it incorporates the following design features: Neckline and arm holes have been designed around and created by following the shape of the cornelli design work, hence are not bound, faced or shaped like a regular garment. Bodice is also designed and constructed around the cornelli design work. Covered buttons have been selected to ensure the cornelli design work is not interrupted by a regular zip. Tulle Base has been selected for its sheer nature, so cornelli looks to be suspended on skin, despite being structurally sound to withstand stress of body movement and also stretches to fit many body types. Junction point has been created and hidden under the cornelli design. The junction point allows the introduction of the soft silk tulle which creates a flouncy double layer gathered skirt, as the bodice tulle is too stiff to create the drape of the skirt. Back neck hole designed and shaped to follow cornelli design, rather than regular back neck shape.**
