Corrigenda

201315071 advertised on 04 Sep 2014 under the heading:

Applications for Extension of time under Section:137, Extension of time advertised in error.

355808 and **355990** advertised on 07 Aug 2014 as an **Official Notice** titled '**Design Registration 355808 & 355990**' was advertised with the incorrect Statement of Newness and Distinctiveness. The correct Statement of Newness and Distinctiveness is as follows:

Newness and distinctiveness resides in the visual features, including shape and configuration, of the top part of a VACUUM CLEANER as shown in solid outline in the accompanying drawings. The design is common to the vacuum cleaner of Figures 1 to 6 and Figures 7 to 12. When determining whether the design is substantially similar in overall impression to another design, no regard is to be had to those features shown in dotted outline in the accompanying drawings, which features are provided for illustrative purposes only, with Figures 1 to 6 showing a first example of a vacuum cleaner and Figures 7 to 12 showing a second example of a vacuum cleaner.

(57) Statement of Newness and Distinctiveness: **The newness and distinctiveness of this design refers to the implementation of 2 x hollow posts on the back of the power supply, in front of the power plug outlet and terminal block. The design of this power supply allows for the use of a cable tie to hold the power plug and low voltage cabling in place, preventing it from being knocked out / becoming unplugged accidentally. The hollow post design also allows the cable tie to easily be removed and refitted when equipment is replaced or serviced.**

(57) Statement of Newness and Distinctiveness: **The absorbent part of a Modern Cloth Nappy, commonly referred to as a 'Booster' or 'Insert', is generally topped with a stay-dry topping such as microfleece or suedecloth which wicks away moisture to the absorbent fabric underneath and keeps the baby's bottom feeling dry. Traditionally, this topper extends no further than the edges of the absorbent fabric. This new design is distinctive in that the microfleece topper is wider and longer, extending over the edges of the booster/insert when folded, so that it can fold around and cover all the layers of a folded up booster, preventing faeces from squashing through multiple layers, making rinse-outs easier, and preventing wet absorbent fabric layers shifting out from under the stay-dry fabric topped area.**

(57) Statement of Newness and Distinctiveness: Each of the two outside edges is folded down to form a tapered straight wedge shaped keel with zero depth near the front, to maximum depth at the rear. These tapered side delta keels help channel and smooth the flow of water beneath the concave underside. This reduces turbulence and spray as well as drag, resulting in higher speed with greater dynamic lift and directional control in a robust simple design. The side keels also add to the rigidity of the hand board. The front surface has an upward longitudinal curve. There are two brackets on top for the single adjustable strap to pass through. The strap holds the hand firmly in place. It is easy to swim with and safer to use because it has no sharp angles or edges.
