## FREEDOM OF INFORMATION ACT

### What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

### What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

**Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)**

### How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

## NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

## REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Thursday for publication on the following Thursday. Electronic copy must be sent by e-mail to [publications@ipaustalia.gov.au](mailto:publications@ipaustalia.gov.au). The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

## DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website [www.austlii.edu.au](http://www.austlii.edu.au).

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 15. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au).

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

## GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

### (i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

### (ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

### (iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

### (iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

### (v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

### (vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

## How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **Internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

## How Australian Patent Documents are Numbered

**Patent applications** in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345    Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.  
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

**NOTE** When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

## Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

## Using the Indices

### 1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

## 2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent Certified

## 3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

**OFFICIAL NOTICE****DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

- Application** : No. **653171** in the name of **BALL CORPORATION**.
- Title** : Apparatus and method for strengthening bottom of container.
- Action** : Opposition under Section 59 of the Patents Act by **AMERICAN NATIONAL CAN COMPANY**, now **REXAM BEVERAGE CAN COMPANY**.
- Decision** : Issued 29 January 2003 .

**Abstract**

Final determination.

The opponent made submissions prior to final determination that attempted to re-open matters previously decided. The opponent also presented enhanced and enlarged drawings to give further detail and clarity to the drawings of the present and the cited applications. These submissions were not entertained.

In the substantive decision certain claims of the application were found to lack novelty.

The applicant has removed all but one of the offending claims. That one claim has been amended to additionally define a novelty-conferring feature related to the arcuate portion near the inner wall of the bottom of a container.

A direction was given that the application be sealed after 30 days from the date of this decision subject to any appeal.

**OFFICIAL NOTICE****Policy with respect to refunds and waivers**

IP Australia has recently reviewed its policy with respect to refunds and waivers. The full policy is available at the IP Australia website, at

[http://www.ipaustralia.gov.au/resources/forms\\_finance.shtml](http://www.ipaustralia.gov.au/resources/forms_finance.shtml)

A summary of the policy follows. This policy is broadly aligned with IP Australia's previous practices. Most notably, however, refund practices with respect to Extension of Time requests, and to trade marks series filed for multiple classes, will change. To the extent that the policy is materially different to the practice previously applied, the policy will apply with respect to any fee payments made on or after 15 Feb. 2003.

**Enquiries**

**General enquiries** regarding the policy: Jodi Lawler 02 6283 2681

Enquiries regarding specific matters:

<b>Patents:</b>	Leo O'Keeffe, Deputy Commissioner (A)	02 6283 2036
<b>Trade Marks:</b>	Penny Bailey, Director (Administration)	02 6283 2940
<b>Designs:</b>	Victor Portelli, Deputy Registrar of Designs	02 6283 2093

\* \* \* \* \*

**Summary - Refunds**

- IP Australia will automatically refund money when
  - ◆ The customer has submitted a payment and request for something IP Australia does not do (e.g. car registrations), or
  - ◆ The customer has submitted a payment and request for something that is not legally or practically capable of being done. (e.g. opposing a newly filed application), or
  - ◆ The fee is overpaid.
  - ◆ A fee has been incurred as a result of an office error. Where IP Australia has made an error, given incorrect advice or failed to provide a notification, in such a way as will make the customer liable for a fee that they would not otherwise have needed to pay then, if the fee has been paid we will refund it.
- In other circumstances, IP Australia will only consider giving a refund if the customer lodges a request for one.
- Where a fee has been paid for lodging a document, and the document has been lodged with IP Australia, then the fee cannot and **may not** be refunded.

- Where a fee has been paid for IP Australia to perform a particular action, and that action has been performed, then the fee cannot and **may not** be refunded.
- Where a fee has been paid and
  - ◆ the accompanying document is not considered to have been lodged, or
  - ◆ the required action has not been performed,
  - ◆ then the fee may be refunded, on the customer's request.
- Refunds on fee items will be paid in full, or not at all. There will be no administrative charges levied.
- Refunds on cost recovery activities (such as providing data extracts from IP Australia's information systems) may be partial refunds. The cost of any effort in servicing the original requested activity will be deducted from the refunded sum.

IP Australia will apply these principles consistently in respect of all of its customers.

### **Summary - Waivers/Exemptions**

- IP Australia will waive fees in part or in full only in rare circumstances
- Due to differences between the Trade Marks Act and the Patents and Designs Acts, the rules for waivers are slightly narrower in Trade Marks than in the rest of IP Australia.
- IP Australia may waive part or all of a fee for a patents or designs transaction when:
  - ◆ IP Australia has made an error, given incorrect advice or failed to provide a notification, in such a way as will make the customer liable for a fee that they would not otherwise have needed to pay.
  - ◆ IP Australia has made an error or given incorrect advice that has given the customer a clear expectation that they need to pay an amount that is less than the prescribed fee
  - ◆ It would otherwise be in the public interest, or ensure fair and equitable treatment of IP Australia's customers
- Otherwise, intellectual property fee items will not be waived
- For other financial transactions, IP Australia may waive some or all of the money due to be paid if:
  - ◆ The sum involved is so small as not to be economically worthwhile to be pursued
  - ◆ It would otherwise be in the public interest, or ensure fair and equitable treatment of IP Australia's customers

Official Notice

# FILING RECEIPTS FOR NATIONAL PHASE APPLICATIONS

IP Australia wishes to advise its customers that filing receipts for all national phase applications will be issued as soon as possible after lodgment of the applications. However, IP Australia acknowledges that some filing receipts may not be issued for some weeks due to issues with the NPS system and apologises for any inconvenience that this may cause for its customers.

However, to assist with the efficient processing of these patent applications, it would greatly assist IP Australia if customers would refrain from sending in reminder letters concerning delays in receiving filing receipts unless it is absolutely vital. The processing of these letters is very time consuming and may delay other more important administrative tasks. In light of the above situation, IP Australia regrets that unless there are exceptional circumstances, it is unable to respond to those reminder letters that are received.

IP Australia asks for continued patience from its customers during this time and wishes to assure its customers that these processing delays will not place their IP rights in jeopardy.
