ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.

A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
A) Provisional applications filed - Name Index		B) Complete applications filed - Name Index

Publication <u>date</u> of granted patent	(45)
Inventors <u>names</u>	(72)
<u>Patent Attorneys</u>	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Reminder to Renew (RTR) Service for Patents**

As previously advised, IP Australia undertook to evaluate a trial of a Reminder to Renew service for Patents. The trial was conducted in relation to Patents in the new PAMS system. The trial identified a number of process and supporting system refinements that IP Australia needs to implement in order to provide a quality customer service. These issues are being addressed within the overall programme of system developments.

The bulk of renewal payments are for Patents recorded in the mainframe Patadmin system, hence these would not be included in any Reminder to Renew service. However, from next year, IP Australia intends to migrate the active records from Patadmin into PAMS. This will mean that all Patent renewals will be processed in PAMS. This is a necessary first step before we can offer a Reminder to Renew service for all patents.

IP Australia is keen to provide a Reminder service for the payment of Renewal fees for Patents as it currently does for Trade Marks and Designs and we will continue to explore how best to achieve this post the data migration.

For further details, please contact Ray Hallett on 02 6283 2186.

Official Notices**New lodgement schedules for bulk filings**

During the September 03 IPTA / IP Australia Executive Meeting, the practice of some firms not completing a lodgement schedule to accompany bulk filings was discussed. When a lodgement schedule is not provided it allows room for error and IP Australia now prints a disclaimer on all receipts. IP Australia cannot take responsibility for the contents of a bulk filing which is not accompanied by a completed lodgement schedule.

An action item from the September meeting was for IP Australia to arrange for a revised Lodgement Schedule form to be available on the Internet and for IPTA to send members a reminder and endorsement for the form's use.

Lodgement Schedules for Patents, Trademarks and Designs are now available on the IP Australia web site in both PDF and Word format along with preferred transaction descriptors (see attached) to be used with the Lodgement Schedules and on accompanying correspondence.

Best Practice Guidelines for filing

IP Australia is committed to providing the best possible service to you. We aim to process all correspondence accurately and in the most efficient way possible, in order to ensure that your client's IP rights are secure. With this in mind, IP Australia asks that you follow the guidelines below in order to help us file your correspondence as quickly and accurately as possible.

General lodgement of filings

1. If possible, please lodge your filings before 4pm.

This helps staff carry out processing on the day of receipt. If files are lodged early in the day, staff can contact you on the same day to rectify any problems identified.

Problems may include:

- missing documents;
- declined credit card payments; or
- payment of the incorrect amount.

It is important that IP Australia can contact you quickly to resolve these problems, in order to ensure that your customer's IP rights are not adversely affected. We do everything we can to avoid this occurring but after 5pm it becomes more difficult to resolve problems.

2. When lodging any filing, please ensure:

- a filing (lodgement) schedule is included;
- your credit card expiry date is included on the Payment Options forms;
- associated documents are held securely together with a bull-dog clip or foldback clip. Please do not use staples;
- if you have a Corporate Customer ID number (CCID) it is included on your lodgement schedule and in any correspondence with IP Australia.

For multiple (batch) filings - please ensure a separate lodgement schedule is used for each patent, trade mark, and design lodgement to avoid confusion and delays in processing the filing. Please also supply a lodgement schedule for non-fee filings.

If several cheques, or credit card authorities are provided for a large batch filing, please ensure that the individual payments are the same as the amounts on the lodgement schedules ie. one payment to cover all of the trade marks filings. This assists with tracking payments if there is a query.

3. IP Australia does not require confirmation copies of faxes relating to filing of documents.

However if for some reason you wish to file a confirmation copy, it is helpful if confirmation copies are clearly marked so. Please include clearly visible stamping on each page of the document. If payment has already been made via fax, a payment or payment option form is not required with the confirmation copy, only a statement that the payment has already been provided with the faxed filing.

4. Original documents,

as opposed to copies, are only required where there is a specific legal requirement for IP Australia to receive originals. In these cases we will inform you that an original document is required, for example, in the case of statutory declarations for oppositions.

Patent Filings

1. Please file patent specifications in the following order for ease of electronic processing: description, claims, abstract, drawings and gene sequence.
2. When filing a patent application, IP Australia no longer requires true copies or multiple copies of abstracts or drawings.

3. When categorising filings:

- Please start the description with the name of the specific transaction rather than referring to a series of related actions culminating in the specific one being requested;
 - Clearly describe the specific transaction. [Refer to Glossary of Terms attached]
4. If WO numbers are provided they should be presented as eg WO 02/2135 rather than 02/2135.
 5. It is preferable that all documents filed are listed on the lodgement schedule, not just the main transactions. For example, if a response to an examiner's report included a Notice of Entitlement, amendments, as well as submissions, all three transactions should be listed.

Trade Mark Filings

1. Generally, only one copy of a trade mark is required on the application form unless it is an image mark where, in this case, you should also submit a copy on a scanning sheet. For example, it should only be presented sideways if it is intended for the image to be published sideways. The image should be presented exactly how it is intended to be published.
2. If colour is claimed, a total of three representations need to be submitted: one for the certificate, one for the examiner and one to remain on the application form.
3. Ensure the print on the application is dark enough for scanning.
4. State goods and services on the application form itself rather than on a separate sheet with "see attached" on the form.
5. It is not necessary to use italics in describing the goods and services or to put borders around the description of the goods and services.
6. We only require the Australian Trade Mark Number on correspondence to IP Australia, not the International Number.
7. When sending faxes for extensions of time, attach a completed Payment Options form, as this form is necessary in order to process this request.

Design filings

1. Use a designs lodgement schedule for all designs filings. This provides a checking mechanism to ensure that designs filings are not overlooked when they are processed, for example, because they are "tucked behind" a large batch of patents or other filings.
2. Lodge **5 sets** of representations at filing. IP Australia requires 5 copies of representations for processing. Ensure that each set of representations contains one of each of the views of the article rather than providing all 5 copies of each view together.
3. A Form 2 is not required for designs filings.
4. Where the nature or use of the article would not be clear from the article name or the form of the article, please include a statement of the nature and use of the article. This will facilitate correct classification at filing.

Official Notices**DECISION OF A DEPUTY COMMISSIONER OF PATENTS**

Innovation Patent	:	No. 2003100074 in the name of Steven John Grant
Title	:	Asset Protection Method
Action	:	Examiner's objections regarding subject matter
Decision	:	Issued 26 May 2004

Abstract

- The method of the patent does not relate to protecting an asset in any physical sense – such as by building a moat or protective wall around a building. Rather the protection being afforded is against loss of ownership as a result of a legal liability, taking advantage of aspects of the law.
- It is noteworthy that the method would inherently cease to be capable of performance if Parliament were to change the law in certain ways – not because the method might be ‘contrary to law’ as per s.101B(2)(d), but because the ‘law’ which provides the basis for the invention would (unlike natural law) no longer exist.
- Certain publications preceding the filing date by 6 months were not available to anticipate the invention as they came about as a result of disclosure by the inventor – and hence qualified for the so-called ‘grace period’ exclusion.
- The traditional concept of a ‘mere scheme or plan for doing business’, in so far as it relates to subject matter issues, is not an additional exclusion from patentability over the principles set out in the NRDC decision. While it may be a convenient way of indicating subject matter that may not be a manner of manufacture, the true scope of a subject matter exclusion must be determined by reference to the NRDC principles.
- The law of Australia is the creation of Parliament and the common law, and is presumed to be fully known to all. All laws are artificial in the sense that they are the creation of Parliament or the courts. Legal ‘loopholes’ may not be consistent with the original intent of Parliament, but they are no more than aspects of the law that have not been previously publicised. They are inherently part of the law, and cannot give rise to an artificially created state of affairs any more than the application of any other part of Australian law.
- Claimed invention does not result in an artificially created state of affairs, and is therefore not for a manner of manufacture. Innovation patent revoked.
