# General Information

## EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606  
(Telephone 02 6283 2999)  
(Fax 02 6283 7999)  
(E-mail [assist@ipaustralia.gov.au](mailto:assist@ipaustralia.gov.au))

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

## CONTACT INFORMATION

**Customer Support Centre**  
Ph: 02 6283 2999 Fax: 02 6283 7999  
E-mail: [assist@ipaustralia.gov.au](mailto:assist@ipaustralia.gov.au)

Customers can contact the Customer Support Centre by telephone or by e-mail. Telephones are staffed between 9AM and 5 PM EST each working day.

Customers should contact the CUSTOMER SUPPORT CENTRE for information about:

- All Patent Matters including PCT and Innovation Patents.
- All Trade Mark Matters.
- All Design matters.

## ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

## REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

## INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

## COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

## ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

## FREEDOM OF INFORMATION ACT

### What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

### What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

**Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers)**

### How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

## NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

## REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to [publications@ipaustralia.gov.au](mailto:publications@ipaustralia.gov.au). The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

## DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website [www.austlii.edu.au](http://www.austlii.edu.au).

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au).

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

#### HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

##### Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

**Note:** *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

##### Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

# GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

## (i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

## (ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

## (iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

## (iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

## (v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

## (vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

## How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want ( eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

## How Australian Patent Documents are Numbered

**Patent applications** in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.  
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

**NOTE** When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

## Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

## Using the Indices

### 1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
<b>A) Provisional applications filed - Name Index</b>		<b>B) Complete applications filed - Name Index</b>

### E) Patents Certified – Name Index

The <u>name</u> of the applicant	(71)
The <u>number</u> of the accepted document	(10)
The <u>number</u> assigned to the application	(21)
The <u>date</u> of filing	(22)
The <u>title</u>	(54)
The <u>classification marks</u>	(51)
Priority document <u>number</u>	(31)
<u>Date</u> of filing of priority document(s)	(32)
<u>Country</u> in which priority document filed	(33)
Publication <u>date</u> of granted patent	(45)
Inventors <u>names</u>	(72)
<u>Patent Attorneys</u>	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

### 2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

### 3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

## 'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

### (10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

### (20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

### (30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

### (40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

### (50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

### (60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

### (70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

### (80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

### NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.  
  
    **AU-A** = Pre-examination                      **AU-B** = Post-examination
- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)<sup>2</sup>, (51)<sup>3</sup>, (51)<sup>4</sup> and (51)<sup>5</sup>.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Commencement of the Designs Act 2003****Commencement:**

The Designs Act 2003 will commence on Thursday 17<sup>th</sup> June 2004. As of the commencement date all actions and proceedings will be under the Designs Act 2003.

Information, Approved Forms and the Designs Application Kit relating to the Designs Act 2003 can be accessed at the IP Australia website, [ipaustralia.gov.au](http://ipaustralia.gov.au) under the Designs tab by selecting the link Information about the New Designs Act.

Chapter 12, Part 2 of the Designs Act 2003 sets out *Transitional and Saving provisions* in relation to the 1906 Act. For more information on issues relating to the transition from the Designs Act 1906 Act to the Designs Act 2003, please refer to the above website link. See also the Official Notice relating to Converting a Design Application, in this Journal.

**Design Applications - Numbering system under the Designs Act 2003:**

As previously advised in the *Official Journal* of 6 May 2004, the numbering system for applications filed under the Designs Act 2003 will be as follows:

	<b>Design #</b>	<b>Registration #</b>
<b>Format:</b>	1nnnn/ccyy	3NNNNN
<b>2003 Act example:</b>	<u>1</u> 2345/2004	<u>3</u> 00645

The 1 in the first position of the Design Number and the 3 in the first position of the Registration Number identify them as applications and registrations under the Designs Act 2003 and are distinct from their counterparts under the Designs Act 1906, while still retaining the same general number format. Where a design is Published under the Designs Act 2003, as opposed to being Registered, it will retain its Design Number and be published with that number as the key reference.

Due to provisions in the Designs Act 2003 relating to multiple designs within a single design application, numbers previously used in reference to a design application will be used in reference to a design, and be termed Design Number. For a design application containing one design the Design Number will be the reference, for design applications containing multiple designs, each design will be allocated a separate Design Number.

**Design Applications and Registrations - under the Designs Act 1906:**

Applications and registrations under the 1906 Act will continue to have their current number formats and ranges. Any design application filed under the 1906 Act but registered after 17 June 2004, unless it is converted to an application under the 2003 Act, will be issued a design registration number from the 1906 Act Registration Number range.

## Designs Act 2003

### Converting a Design Application

**Background:**

Upon commencement of the Designs Act 2003, on Thursday 17<sup>th</sup> June 2004, there will be design applications filed under the Designs Act 1906 which will not have not been finally dealt with under the provisions of that Act, i.e. 'transitional applications'.

Chapter 12, Part 2 of the Designs Act 2003 sets out *Transitional and Saving provisions* in relation to various matters under the 1906 Act. Specifically, sections 159 - 161 of the Designs Act 2003 make provision for an applicant to convert a transitional application to an application under the Designs Act 2003.

**'Transitional Applications':**

A 'transitional application' is an application that was made under the Designs Act 1906 that has not lapsed and has not been registered or refused under that Act.

**Requesting conversion:**

An applicant who has made a transitional application may request to convert their application to an application under the Designs Act 2003.

**Conversion is not mandatory.** (See below - If conversion is not requested)

A decision to request conversion is totally at the discretion of the applicant and should be considered carefully taking into account all facts and circumstances.

A request to convert can be made at any time before the transitional application is registered or before the application is lapsed, withdrawn or refused.

There is no fee for requesting conversion of an application. Note, however, that if a transitional application includes more than one design and the applicant requests to register the designs separately, or it is apparent that there is clearly more than one design to be registered, the Designs Office will issue an Invitation To Pay (ITP) in respect of the excess designs, over and above the first design. The applicant will have two months from the date of the ITP to pay the fee/s or to exclude or withdraw the excess designs. If the excess designs fee/s are paid the designs can be registered separately.

Further information on the issues related to converting an application the Designs Act 2003 can be accessed at the IP Australia website link referred to at the bottom of this notice.

**Effect of converting an application:**

Under the provisions of section 160 of the Designs Act 2003, a converted design application is taken to:

- be an application under the Designs Act 2003;
- have the filing date of the transitional application;
- have the same priority date as it had under the transitional application;
- meet the minimum filing requirements of the Designs Act 2003;
- include a request to register each design disclosed in the transitional application; &
- have a term of ten years starting from the date of the conversion request.

**If conversion is not requested:**

If a 'transitional application' is not converted to an application under the Designs Act 2003, it will continue to be examined and dealt with as it would have been under the provisions of the Designs Act 1906.

**More information:**

For more information on issues relating to the transitional and saving provisions of the Designs Act 2003, including converting a transitional application, please refer to the IP Australia website, *ipaustralia.gov.au* under the Designs tab by selecting the link Information about the New Designs Act.

Official Notices**PROFESSIONAL STANDARDS BOARD FOR PATENT AND  
TRADE MARKS ATTORNEYS****2004 EXAMINATIONS**

The examinations for registration as patent and trade marks attorneys will be held in Canberra and, if required, the capital cities of each State between 1 October and 8 October 2004.

As previously advertised, the Board will be conducting examinations in:

- Topic Group F – Patent System,
- Topic Group G – Drafting Patent Specifications
- Topic Group H – Interpretation and Validity of Patent Specifications.

Where candidates have not completed Topic Groups A-E & I with the Board they should provide, at the time of enrolment, evidence of having met those prerequisites.

Applications for admission as a candidate at the examinations must be lodged in writing, together with the prescribed fee of \$400.00 per subject. The examination fee is not refundable. The closing date for receipt of applications is 31 July 2003. Cheques should be made payable to 'IP Australia'. Candidates should include on the application, their full names, signature, postal address and the subject/s for which they intend to sit. **Preferably use the attached enrolment form.**

Applications should be sent to:           The Secretary,  
Professional Standards Board for Patent and Trade  
Marks Attorneys,  
IP Australia, PO Box 200,  
WODEN ACT 2606.

The Syllabi and Guidelines for the subjects the Board is examining are available on the Board's web site [www.psb.gov.au](http://www.psb.gov.au). Inquiries should be directed to 02 6283 2275.

Candidates with disabilities should apply for special consideration in accordance with the provision of the Board's Disability Policy, which can be accessed at [www.psb.gov.au/new/index.htm](http://www.psb.gov.au/new/index.htm).

Previous years' examination question papers and examiners' comments on the papers may be downloaded from the Board's web site or obtained directly from the Professional Standards Board Secretariat and IP Australia State Offices.

Following their enrolment, candidates will be sent a copy of "Notes for candidates sitting examinations conducted by the Board". This guide is also available on the Board's website. When all enrolments are completed, the examination timetable and candidates' distinguishing numbers will be issued. This will take place around mid August 2004.

The Board has appointed the following examiners for the 2004 examinations.

## DECISION OF A DEPUTY COMMISSIONER OF PATENTS

<b>Patent</b>	:	No. <b>602638</b> in the name of <b>Pfizer, Inc</b>
<b>Title</b>	:	<b>Triazole Antifungal Agents</b>
<b>Action</b>	:	Request under s.70 for an extension of term of the patent
<b>Decision</b>	:	Issued <b>4 June 2004</b>

**Abstract**

Application to extend the term of a patent under s.70. A subsequent 'selection' patent had previously had its term extended on the basis of an ARTG registration of the substance voriconazole. The same ARTG registration was being relied upon to extend the term of the 'parent' patent. During consideration of the request, the examiner objected that the relevant substance was not 'in substance disclosed' in the specification.

- where there is a selection patent that specifically claims a substance, there is a fundamental inconsistency with an assertion that the particular substance is *in substance disclosed* in the parent patent.
- The resolution of this inconsistency is necessarily an evidentiary issue. In the context of a request for extension of the term of a patent (which is likely to occur some considerable time following the filing of the respective patents), the following are relevant:
- The selection patent will likely have been applied for and granted at a time closer to the relevant date for construing the disclosure of the earlier patent, and therefore has weight in construing the disclosure of the earlier patent by reason of its temporal proximity – especially in comparison with evidence of skilled persons as of 'today';
- A selection patent that specifically claims a substance constitutes *rebuttable* evidence that that substance was not in substance disclosed in the parent patent;
- In circumstances where the substance is neither specifically identified or exemplified in the parent patent, the burden of rebutting the evidence provided by the selection patent necessarily lies with the person arguing that the relevant substance is in substance disclosed in the parent patent.
- Evidence provided was insufficient to rebut the evidence as provided by the existence of the selection patent. Extension refused.

Official Notices**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

**Application** : No **697560** in the name of **Aussie L.L.C. Pty Ltd**

**Title** : Improvements Relating to Mobile Phones

**Action:** Final determination in an opposition by **Ericsson Australia Pty Ltd** under s 59 of the Patents Act 1990

**Decision** : Issued 09 June 2004.

**Abstract**

Final determination.

In his decision on the substantive opposition, the delegate found that claim 1 was not novel or inventive. The applicant filed amendments to replace claim 1 with new claims 1 to 4. It was found that these claims also lacked novelty or an inventive step.

The proposed amendments were a genuine attempt to satisfy the delegate's decision and as there was clearly patentable subject matter disclosed in the application, the applicant was given a further opportunity to propose suitable amendments.
