ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustalia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
A) Provisional applications filed - Name Index		B) Complete applications filed - Name Index

Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Patents: Amendment of the Manual of Practice and Procedure**

In July 2004 amendments were made to the Manual of Practice and Procedure Volume 2 - National

The principal changes relate to:

- a change in the quality standard on lack of unity arising from a review of examination practice by the Commissioner. Examination practices have also been reviewed to ensure that they are fully aligned with the PCT standards. (para 0.2.1.2, 1.4.4.1, 10.9, 12.9.5.1)
- changing the practice on patentability of business schemes to take account of *Re Innovation Patent by Steven John Grant* [2004] APO 11 (currently under appeal) in which a business scheme was held to be non-patentable because it did not involve the application of a newly discovered law of nature, or the application of any technology to implement the scheme. The decision also held that the true scope of a subject matter exclusion must be determined by reference to the *NRDC* principles (para 8.2.5.7, 8.2.10.4)
- stipulating that examination of innovation patents may be performed by examiners at or above the level of an examiner "above the efficiency barrier with delegation" (para 30.3.2.3, 30.4.1.3)

Official Notices**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application : No. **690742** in the name of **NEMOTO & CO., LTD**

Title : **Phosphorescent Phosphor**

Action : Opposition by **SHINO KANEKO** under section 59 of the Patents Act 1990

Decision : Issued 12 July 2004.

Abstract

The opponent raised grounds of novelty, inventive step, manner of manufacture, and section 40/fair basis. The opponent did not pursue the ground of manner of manufacture at the hearing. During the period covering the service of evidence, the opposed application was changed (by virtue of an amendment) from a standard patent to a patent of addition to Australian patent application No. 661941.

Under Section 40 the opponent pursued four issues. The opponent was unsuccessful in showing that claim 4 when appended to claim 1 (either directly or via claim 2 or claim 3) lacked clarity.

In the matter of lack of novelty the opponent raised the parent application against the opposed additional application. The opponent was unsuccessful in establishing that the opposed claims lacked novelty in light of the disclosure in the parent application. A disclosure of "the matrix configuration $M_{1-x}Al_2O_{4-x}$, where x is in the range -0.33 x 0.60 (except x = 0)" was not established in the citation.

Eight items of alleged common general knowledge disclosed across eleven citations were raised under the ground of inventive step. Only one of these items (disclosure of a commonly available textbook) was shown to be part of the common general knowledge in Australia in the relevant art at the priority date. This single item did not render the opposed invention as obvious. Two other citations were raised which in combination with the alleged common general knowledge were stated to show that the opposed invention lacked an inventive step. The opponent was unable to show a lack of inventive step based on the individual citations in combination with the established common general knowledge.

An award of costs against the applicant Nemoto & Co., Ltd was made up to the date on which the amendments were allowed. Subsequent to the allowance of the amendments, costs were awarded against the opponent Shino Kaneko.

Official Notices**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application : Nos. **722243** in the name of **DYWIDAG- Systems International Pty. Limited**

Title : **Cable Bolt**

Action : Opposition under S59 by **Jennmar Australia Pty Ltd**

Decision : Issued 13 July 2004.

Abstract

The invention as claimed in claim 1, if construed using a plain meaning approach, would render several dependent claims nonsensical. Therefore a broad non-intuitive construction of the claim was required if one was willing and wishing to make sense of these dependent claims.

As a consequence, the independent claim was considered to lack novelty in the light of the prior art raised by the opponent.

Given the problem to be solved in ameliorating prior art disadvantages, the claimed invention with its broadest interpretation also lacks an inventive step. However, if one were to interpret claim 1 such that it reflects an embodiment of the invention, which ignores said dependent claims, this was found to be an inventive solution to the problem.

The independent claim lacks fair basis, as there is no real and reasonably clear disclosure of matter, which reasonably falls within the scope of the claim, given the construction required.

The invention claimed was considered to satisfy the threshold of inventiveness required, and as such contains patentable subject matter.

Therefore the applicant was given 60 days from the date of this decision to amend the specification.

Official Notices**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application	:	No. 715364 in the name of Zenon Environmental Inc
Title	:	Vertical skein of hollow fibre membranes and method of maintaining clean fibre surfaces
Action	:	Opposition under section 59 by Memcor Australia Pty Ltd and an objection to an extension of time to serve evidence in answer
Decision	:	Issued 8 July 2004.

Abstract

Extension of time under regulation 5.10(2) was found to be appropriate in all the circumstances.

The public interest is finely balanced between determining an opposition on its merits and expeditious handling of the opposition within the Patent Office. There has been undue delay in proposing the amendments and there is a serious question about whether the amendments are really necessary. However, the amendments are lengthy and complex and their fate needs to be finally determined before the substantive opposition can be continued. Further, the nature of the amendments is such that they are non-trivial and likely to have a significant effect on the evidence to be filed. The public interest therefore lies in granting the current extension so that the opposition can be determined on its merits with minimal problems in the appeal environment.

However, while an extension of time under regulation 5.10(2) is appropriate in all the circumstances, evidence in answer should not be completely stayed pending the amendments. There is no reason to delay evidence in answer to the evidence in support already provided by the opponent in respect of the original 18 claims which have only minor amendments and given the substantial delays involved, the opponent has the right to at least partly understand the case the applicant is intending to run.

Official Notices**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application	:	No. 44916/99 in the name of Luminis Pty Ltd and Fertilitescentrum AB
Title	:	Method and medium for in vitro culture of human embryos
Action	:	Proposed direction under s.107 to delete certain claims
Decision	:	Issued 13 July 2004

Abstract

The application included claims to a 'method of growing pre-blastocyst human embryos' in a particular medium. The examiner objected that these claims contravened s.18(2), and a direction under s.107 was proposed to delete those claims. Applicant argued that a human being was generated at fertilisation. And since the claimed method was applied at a later stage, it could not be a process for generating a human being.

- The correct interpretation of s.18(2) is ascertained by recognising a human being as being in the process of generation from the time of the processes that create a fertilised ovum (or other processes that give rise to an equivalent entity) up until the time of birth. This arises either as a general belief that the status of human being does in fact arise over a period of time, or as a reflection of the divergent views in society about when a human being comes into existence (with no view being more right than others).
- The prohibition of 'human beings' is a prohibition of patenting of any entity that might reasonably claim the status of a human being, including a fertilised ovum and all its subsequent manifestations.
- The prohibition of 'biological processes for (the generation of human beings)' clearly covers all biological processes applied from fertilisation to birth – so long as the process is indeed one that directly relates to the generation of the human being.
- The exclusion of biological processes includes the processes of generating the entity that can first claim a status of human being. For example, processes for fertilising an ovum; processes for cloning at the 4-cell stage by division; processes for cloning by replacing nuclear DNA.
- Direction given to delete claims directed to a method of growing preblastocyst human embryos.

Position: Patent Searcher

Terms: Full-time, Permanent

Location: Sydney NSW

Regular duties will include conducting patentability, infringement, state-of-the-art and validity searches using appropriate patent information tools and resources, and ongoing monitoring of patent publications by various means. Results will be used to provide patent intelligence and analysis to a variety of internal and external customers.

Ideal candidates will demonstrate the ability to analyse data and report findings in a logical fashion, possess excellent computer skills and have an interest in keeping abreast in technical innovations in the field of patent research. The ability to work as an effective contributor within a team based environment is critical to success in this role. Preference will be given to applicants with experience in the fields of chemistry and/or pharmaceuticals, but candidates from other backgrounds may also apply.
