General Information

EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606
(Telephone 02 6283 2999)
(Fax 02 6283 7999)
(E-mail assist@ipaustralia.gov.au)

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
A) Provisional applications filed - Name Index		B) Complete applications filed - Name Index

<u>Patent Attorneys</u>	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination **AU-B** = Post-examination
- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Amendments relating to patents in the
US Free Trade Agreement Implementation Act 2004*****Grounds for revocation and refusal***

Schedule 8 to the *US Free Trade Agreement Implementation Act 2004* (the FTA Act) makes amendments to the *Patents Act 1990* that commenced on 16 August 2004. These amendments were necessary to ensure the grounds for revocation of a patent are aligned with the grounds on which the application could have been refused, as required by Article 17.9.5 of the Free Trade Agreement.

The primary amendment has been to include the grounds of paragraphs 18(1)(c) and 18(1)(d) of the Patents Act as grounds of opposition under section 59. These grounds are that the claimed invention:

- must be useful (paragraph 18(1)(c)); and
- must not have been secretly used in Australia before the priority date of the claim by, or on behalf of, or with the authority of, the patentee or nominated person or the predecessor in title to the invention (paragraph 18(1)(d)).

A separate notice follows providing information about transitional arrangements for adding these new grounds for opposition in existing proceedings.

The grounds for revocation also included the ground that the patent owner has contravened a condition in the patent (paragraph 138(3)(c) of the Act). This provision has been deleted as (following from the 1989 repeal of extensions of term of patents for inadequate remuneration) patents are no longer existing or granted subject to conditions. Subsection 104(3) of the Patents Act, which allowed the Commissioner to allow amendments subject to conditions, has also been deleted because it is redundant and the practical effect of this provision is fully encompassed by section 115.

Amendments to the Therapeutic Goods Act

Schedule 7 to the FTA Act includes amendments to the *Therapeutic Goods Act 1989* (TG Act) to require a person applying for registration or listing of therapeutic goods to certify either that:

- a) they believe, on reasonable grounds, that they are not marketing, and do not propose to market, the therapeutic goods in a manner, or in circumstances, that would infringe a patent that has been granted in relation to the therapeutic goods; or that
- b) a patent has been granted in relation to the therapeutic goods, they propose to market the therapeutic goods before the patent term expires and they have given the patentee notice of their application for registration or listing of the therapeutic goods.

Schedule 7 to the FTA Act also contains amendments to the TG Act that will affect parties who undertake infringement proceedings in relation to a pharmaceutical patent against a person who has lodged a certificate under the new requirements of the TG Act in respect of that pharmaceutical.

Under the new provisions, a patentee will be required to certify that the proceedings are to be commenced in good faith, have reasonable prospects of success and will be conducted without unreasonable delay. The patentee will be liable for a fine of up to \$10 million and other damages if the court finds that the certificate is false or misleading or an undertaking given in the certificate has been breached. This provision will only apply if the third party had made the certification outlined in (a) above.

A patentee may also be liable for damages if it seeks an interlocutory injunction against a third party who has applied for registration of a pharmaceutical under the TG Act. Damages may be awarded if the patentee discontinues the proceedings without the consent of the other parties, or the proceedings are dismissed, and the court finds that the patentee did not have reasonable grounds for taking the action or was acting vexatiously. This provision will only apply if the third party had notified the patentee of their intention to market the pharmaceutical within the patent term as part of the certification process outlined in (b) above.

These amendments, along with most other amendments to the TG Act, will commence when the Free Trade Agreement comes into force for Australia — which could be as early as 1 January 2005.

Official Notices**US Free Trade Agreement Implementation Act 2004****New Grounds of Opposition –Utility, and Prior Secret Use**

Schedule 8 of the US Free Trade Agreement Implementation Act 2004 amends s.59 of the Patents Act 1990 to introduce as grounds of opposition the grounds of lack of utility [s.18(1)(c)] and prior secret use [s.18(1)(d)]. Those amendments come into effect on the day of Royal Assent – that is, 16 August 2004. The amendments apply to all patent applications that have not been granted at the date of commencement.

For pending oppositions where a Statement has been served, regulation 5.9 would generally not allow an amendment to include the extra ground of opposition provided for by the amendment to the Act. Accordingly, regulations are expected to be made to provide for the following transitional regime:

- The transitional regime will apply to all oppositions where the Statement of Grounds and Particulars was served on or before 16 November 2004.
- The regulations will allow for an amendment of the Statement of Grounds and Particulars to include the grounds of s.18(1)(c) and/or 18(1)(d) – together with the relevant particulars.
- The request to make the amendment must be made on or before 16 November 2004 – or before a patent is sealed on the application – *whichever is earlier*.
- The Commissioner cannot make the amendment unless the request includes either
 - a request under regulation 5.10(4) to serve further evidence; or
 - a statement that the opponent does not intend to rely on any further evidence in relation to the extra ground.

Note that the requirement to request to serve further evidence applies even if the time for serving evidence in support of the opposition has not ended.

- Extensions of time to amend the Statement of Grounds and Particulars, and/or to make the required statement about evidence, can only be made under the provisions of s.223; regulation 5.10 does not apply to the times set in the transitional provisions.

Practitioners are advised that while the transitional provisions allow for the new grounds to be included irrespective of the stage of the opposition, the Commissioner expects that opponents will not seek to add the new grounds of opposition on a speculative basis. In particular, if the evidence to support the extra ground of opposition is not ready to be served when the request to amend is filed:

- That evidence should be ready to be served soon thereafter, and
- the request for permission to serve further evidence will need to include sufficient reasons to justify the request – including specifics of the nature and relevance of the evidence to be served, and the likely date for serving that evidence.

The new provisions allow for an amendment of the Statement of Grounds and Particulars as late in a current opposition proceeding as when it has essentially concluded. Practitioners should note that the time limit for seeking the amendment is the EARLIER of sealing and 16 November 2004. Having regard to regulation 6.2(1)(b), practitioners are advised that the Commissioner will not entertain requests to defer sealing merely on the basis that more time is required to decide whether or not to seek amendment of the Statement of Grounds and Particulars.

Official Notices**International Search Opinions and Preliminary Examination**

Following the Jan 2004 changes to the PCT Rules, many applicants will have now received an International Search Opinion, and are making decisions about the next steps in processing the application under the PCT. The following is a list of key points that may serve as reminders.

1. The time for filing a Demand is the later of 22 months from priority date, or 3 months from transmittal of the ISR and ISO. For IP Australia, this period will almost always be 22 months. [R 54*bis*]
2. When a Demand is filed, Preliminary examination will not start before the expiration of the time limit for filing a Demand – unless expressly requested by the applicant. [R.69.1(a)]
3. Amendments under Art.34 can (in the first instance) be filed after the Demand is filed – up until the time limit for filing a Demand.
4. IP Australia (like most IPEAs, following R 66.1*bis*) recognises the International Search Opinion as the First Written Opinion under Preliminary Examination. Hence when Preliminary Examination is demanded, the application is at the second Opinion stage. Hence there is no *obligation* to issue a negative opinion following the Demand.

The practice of IP Australia will continue as previously – in that further opinions will be issued if progress is being made.

IMPORTANT. If a Demand is filed, and there are no Art.34 amendments, and no submissions rebutting the ISO, filed before the expiration of the time for filing a Demand (ie 22 months), no further Opinion will issue. The response to the Demand will be a Preliminary Examination Report re-iterating the issues identified in the ISO.

5. Part of the new process entails an ‘informal’ option whereby applicants can file comments rebutting the ISO, but not Demand Preliminary Examination. Such comments will be included with the IPRP I when it is sent to designated offices.

NOTE. IP Australia has had several instances where agents have filed a ‘response’ to the ISO, without filing a Demand. It has not been clear to IP Australia whether such comments are anticipatory of a yet-to-be filed Demand, or intended to make use of the informal option to publish comments with the IPRP I.

To avoid unnecessary handling and confusion, applicants are requested to ensure that:

- **any comments made for the purpose of Preliminary Examination are filed at the same time as (or after, but prior to 22 months) the Demand; and**
- **any comments intended to be included with the IPRP I [that is, when Preliminary Examination will NOT be Demanded] are sent directly to the International Bureau.**

Official Notices**National Phase Entry and Rule 92bis Name Changes**

While R.92bis name changes are effective as from the date of receipt by WIPO, the notification of the name change is often not received by Designated Offices for periods in excess of one month. As a result, if an applicant requests a name change under R92bis, the fact of that name change may not be known to IP Australia if national phase entry occurs within a month or two of that request.

The processing of national phase entry in these circumstances is as follows:

1. Providing there is no doubt that national phase entry is being sought on the correct application, the application will enter the national phase with the name of the applicant being that provided by the international Bureau at that time. This means that the filing receipt will NOT include the name of the applicant as amended under R92bis.
2. When IP Australia is notified of the R92bis name change, the name of the applicant will be adjusted on the basis of that notification, and advice to that effect will be issued to the applicant when it has been effected.
3. The notification from the IB *does not include the date of effect of the R.92bis name change*. IP Australia will proceed on the basis that the name change was requested before national phase entry.

NOTE. There are circumstances where applicants deliberately take action under the PCT after national phase entry on the understanding that the action will not apply to those applications that have already entered the national phase. *Applicants who seek a name change under R92bis after having entered the national phase in Australia will need to advise IP Australia that the R92bis name change is not to have effect in Australia.*

4. Applicants who want the name change to be recorded before IP Australia receives the R92bis notification from the IB are at liberty to request a name change under s.104.

IP Australia will continue to monitor issues arising in association with name changes under Rule 92bis, particularly with regard to systems-related issues.

Official Notices**Patents: Amendment of the Manual of Practice and Procedure**

In August 2004 amendments were made to the Australian Patent Office Manual of Practice and Procedure Volume 3 - Oppositions, Courts, Extensions & Disputes.

The principal changes relate to:

- qualifying the extent to which legal professional privilege applies to patent attorneys under sec 200(2) of the Patents act, in light of the decisions in *Eli Lilly & Company v Pfizer Ireland Pharmaceuticals (No 2)* [2004] FCA 850 and *Kennedy v Wallace* [2004] FCA 332 (para 5.4.3.1)
- clarifying that generally-speaking, entitlement to an invention which had been the property of a company cannot be assigned once the company has been deregistered, and that reinstatement of the company must occur before an assignment can be executed (although in some circumstances it is possible for ASIC to execute the assignment on the company's behalf) (para 27.4.3)
- Guidance in determining whether a pharmaceutical substance is in substance disclosed in the complete specification when considering a pharmaceutical extension of term (para 25.2.5)
