General Information

EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606
(Telephone 02 6283 2999)
(Fax 02 6283 7999)
(E-mail assist@ipaustralia.gov.au)

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.

A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Time periods and 'local' holidays**

This notice is to remind practitioners of the provisions relating to time periods generally and specifically to time periods that expire on a Saturday, Sunday, public holiday, or bank holiday.

A review of legislation governing the determination of time periods under the patents, trade marks and designs legislation was conducted in 2002 to determine whether amendments were needed to clarify how local public holidays and different time zones affect these time periods. It was proposed that all time periods would expire at midnight, Canberra time, and that only public holidays that apply in Canberra would have the effect of extending the expiration of the time period to the following working day.

Strong opposition to this proposal was expressed and it was decided that no changes should be made to the legislation. However, users of the systems were alerted to the fact that there is some uncertainty in this area and advised not to rely on local public holidays and time zones when filing documents close to the expiration of a time period.

Why is there uncertainty in the expiration of time periods?

Many public holidays apply only in the location of some offices of IP Australia – such that some, but not all, offices are closed – while offices of IP Australia are generally not closed on bank holidays. In these cases of local public holidays (i.e. those holidays that are not national public holidays) and bank holidays, the situation is not as certain for the expiration of time periods - the combined operation of the *Acts Interpretation Act 1901* (AI Act), the *Electronic Transactions Act 1999* (ET Act), the Patent Cooperation Treaty (PCT) and the Madrid Protocol have led to a degree of uncertainty as to the expiration of time periods where local public holidays or different time zones apply.

Domestic legislation governing time periods

The expiration of time periods under the patents, trade marks and designs legislation is largely governed by subsection 36(2) of the AI Act, which states:

Where the last day of any period prescribed or allowed by an Act for the doing of anything falls on a Saturday, on a Sunday or on a day which is a public holiday or a bank holiday in the place in which the thing is to be or may be done, the thing may be done on the first day following which is not a Saturday, a Sunday or a public holiday or bank holiday in that place.

Additionally the ET Act needs to be taken into account for electronic filings (which includes facsimile except where stated) under all the IP legislation. The ET Act has applied to the patents legislation from 24 May 2001 and to the remainder from 1 July 2001.

In relation to the ET Act, the uncertainty arises because the time of receipt of an electronically filed document is designated as the time when it enters the information system of IP Australia. The Canberra office, as the principal office of IP Australia, is designated as the place of receipt. Therefore, the day on which an electronically filed document is considered to be filed would be determined by the date in Canberra and not the date in the location where the person sending the

Official Notice (continued)

electronic communication is located. As such, the time period for filing a document electronically would expire at midnight, Canberra time.

For documents that are not filed electronically, subsection 36(2) of the AI Act will apply, conditional upon the document being filed at the Office where that holiday occurred.

Time periods under international agreements

In relation to the PCT and the Madrid Protocol, the uncertainty was due to the fact that the Regulations under these treaties both include a provision similar to subsection 36(2) of the Acts Interpretation Act (Rule 80.5 of the Regulations under the PCT and Rule 4 of the Regulations under the Madrid Protocol). However, as slightly different terminology is used in each, the effect of these provisions in Australia was uncertain – especially in relation to documents filed the day after a local public holiday.

Rule 4 (4) of the Regulations Under the Madrid Protocol states that if a period expires on a day ‘the office concerned’ is not open to the public, the period shall expire the next day that the office is open to the public. At the time of the 2002 review, Rule 80.5 of the Regulations under the PCT provided a similar requirement but referred to ‘the national Office’. It was therefore arguable that Rule 80.5 only operated to extend a time period to the following working day in relation to holidays that affected the national office in Canberra, but not in relation to local holidays that only affected a sub-office in another state.

Since the review was conducted, Rule 80.5 has been amended to make it clear that, if the IP office is situated in more than one location and a time period expires on a day that is a public holiday in one of those locations, the time period expires on the next working day. However this rule cannot over-ride the express provisions of Art. 8(2)(a) of the PCT. That is, it does NOT apply to the 12 month period for filing an application claiming priority from an earlier application; this period is governed by Art. 4C(3) of the Paris Convention.

In September 2004, the Assemblies of the Paris Union and the PCT Union made an agreed statement concerning certain principles for the application of Article 4C(3) of the Paris Convention, Article 8 of the PCT and Rule 17 of the PCT Regulations.

The first principal is:

- (i) it is for the competent authority furnishing the priority document to determine what constitutes certification of a priority document and the date of filing, and how it will certify such a document.

This agreement *inter alia* means that, whatever the complexities in determining the correct filing date in Australia, the filing date for applications filed in Australia will be determined under Australian law and will not be affected by an alternative determination in another country.

General advice

Customers and practitioners should note that while the Patents, Trade Marks and Designs Acts provide a general extension of time mechanism to cover certain situations where an act has not been done within a time period, there are no such corresponding extension of time provisions under the PCT and the Madrid Protocol to cover analogous situations.

Official Notice (continued)

To avoid any possible uncertainty about the effect of local time zones and public holidays on time periods, IP Australia strongly recommends that applicants avoid reliance on time zones and local holidays when filing documents close to the expiration of a time period.

Illustrative examples of the current effect of local time zones and local holidays on time periods***Filing dates generally*****1. Paper documents:**

- The day on which a document is filed is determined by the date at the sub-office (while open for business) at which the document is filed.

2. Documents filed **electronically (NOT including **facsimile**):**

- The day on which a document is filed is determined by the date in Canberra (in accordance with the ET Act) and NOT the date in the location where the person sending the electronic communication is located.

3. Documents filed **electronically by **facsimile**:**

- IP Australia has established business rules which encourage applicants to use our central fax number in Canberra. This overcomes the uncertainty which governs the application of dates to facsimile messages. In this instance the day on which a document is filed is determined by the date in Canberra (in accordance with the ET Act) and NOT the date in the location where the person sending the facsimile is located.
- If an applicant does not use our advertised number in Canberra but sends a document to a fax machine elsewhere in IP Australia, we will give the document the time and date it is received in that location. However, there is less certainty in this situation. It is arguable (under the provisions of the ET Act) that the date is determined by the date existing in Canberra irrespective of where the receiving facsimile machine is located. When using facsimile, customers and practitioners are therefore strongly encouraged to use our advertised central number in Canberra whenever possible.

Effect of holidays on time periods

1. Paper documents filed under the Patents, Trade Marks and Designs Acts, except documents filed under the PCT or Madrid Protocol the period is extended to the next day that is not such a day:

- if a public holiday occurs in the location of a sub-office on the last day of a time period; and
- the document is filed at the Office where that holiday occurred.

However the period is NOT so extended if it is filed in an Office where the public holiday did not occur.

Official Notice (continued)

2. Documents filed **electronically** (NOT including **facsimile**) under the Patents, Trade Marks and Designs Acts:

- these documents are considered to be filed at the Canberra office and so only holidays in Canberra are relevant; and
- if a public holiday occurs in Canberra on the last day of a time period, the period is extended to the next day that is not such a day.

3. Documents filed **electronically** by **facsimile** under the Patents, Trade Marks and Designs Acts:

- documents filed by facsimile to the central IP Australia fax number are filed at the Canberra office and so only holidays in Canberra are relevant; and
- if a public holiday occurs in Canberra on the last day of a time period, the period is extended to the next day that is not such a day.
- If an applicant does not use our advertised number in Canberra but sends a document to a fax machine elsewhere in IP Australia and a public holiday occurs in that location on the last day of a time period we will give the document the time and date it is received in that location. However, there is uncertainty about whether the local holiday extends the period for filing the document. When using facsimile, customers and practitioners are therefore strongly encouraged to use our advertised central number in Canberra whenever possible.

4. Documents filed under the Madrid Protocol:

- There is no recognition of bank holidays under the Madrid Protocol.
- While IP Australia believes that a document filed in reliance of a local public holiday would be entitled to the beneficial application of Rule 4(4) of the Madrid Protocol Regulations and will continue to advise WIPO of compliance of time periods on that basis, customers and practitioners are advised that there may be uncertainty. Rule 4(4) may only recognise holidays that exist in Canberra. Accordingly, customers and practitioners are strongly encouraged not to place reliance on local public holidays unless absolutely necessary.

5. Documents filed under the PCT:

- If an official holiday occurs in the location of any sub-office, the end of the time period is extended until the next working day (i.e. the next day that is not a holiday in any location or a weekend).

Official Notices**Patents: Amendment of the Manual of Practice and Procedure**

In December 2004, amendments were made to the Manual of Practice and Procedure Volume 2 - National.

The principal changes relate to:

- Inserting reference to a change of practice requiring that a statement be placed at the end of each national examination third and subsequent report stating that the supervising examiner has approved the report (para 1.2.2.3, 25.4.2.1).
- Clarifying that where a standard application is a divisional application of a pre-existing parent patent but the inventor(s) of the standard application are not yet stipulated in the patent request or notice of entitlement, the inventor(s) of the divisional application should be assumed to be the same as those of the parent for the purposes of consideration of the application in relation to section 64(2). (para 17.6.4).
- Stipulating that where a patentee is to be advised by letter that a section 104 request to amend will not be examined having regard to the provisions section 112, OH&L is to be apprised of the situation before the letter is sent out (para 22.3.5.3).

Official Notices**Amendment of the form for requesting an Extension of Term of a Patent (s.70)**

The forms for requesting an Extension of Term of a Patent have been revised to ensure the language used in the forms better corresponds to the language used in the legislation. In particular, reference is made to 'inclusion' in the Australian Register of Therapeutic Goods (ARTG) rather than 'registration'. Practitioners should ensure the revised form is used when requesting an extension of term of a patent.

An extension of the term of a Patent under s.70 is dependent upon the first regulatory approval date – which is “the date of commencement of the first inclusion in the Australian Register of Therapeutic Goods of goods that contain, or consist of, the substance” – noting that different criteria apply if there is pre-TGA marketing approval [S.70(5)(b)]. Practitioners are reminded that under the Therapeutic Goods Administration Act, the ARTG contains three parts:

- a part for goods to be known as registered goods;
- a part for goods to be known as listed goods; and
- a part for medical devices

and that inclusion of a good in any of these parts is inclusion of that good in the ARTG. In particular, practitioners are reminded that where a drug is included in the ARTG as an export listing before it is included as a registered good, the relevant date to be specified when requesting an extension of term of a patent is the date of inclusion of the export listing.

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

Application	:	Nos. 763449, 750994 and 742381 in the name of TERMGUARD PTY LTD
Title	:	Termite-Proofing System
Action	:	Requests under section 32 of the Patents Act by CORNELIUS ALFRED VENEMA
Decision	:	Issued 15 December 2004 .

Abstract

On the evidence provided, V is not entitled to the grant of a patent in respect of any of the applications in issue.

In the somewhat unusual circumstances of this case, V claimed that:

- the applications in issue were merely applications for “patents of addition” to patents held by him, thereby automatically establishing his entitlement to the applications in issue under section 15(1)(a); or
- the terms of agreements V had entered into with the applicant established that rights in such applications for patents of addition would transfer to him pursuant to section 15(1)(b).

Found that the applications in issue did not fall within the scope of V’s patents and therefore did not constitute applications for “patents of addition” according to the meaning applied by V to that term, and nor was there any evidence that V had actually contributed, either solely or jointly with others, to the subject matter covered by the applications in issue. Furthermore, the terms of the agreements relied on by V were conditional upon him filing applications for “patents of addition” in his name, but did not prohibit another person, including the applicant, from filing any such applications in its own name.
