General Information

EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606
(Telephone 02 6283 2999)
(Fax 02 6283 7999)
(E-mail assist@ipaustalia.gov.au)

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustalia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2005

Melbourne	9 - 11 May
Sydney	11 - 13 July
Adelaide	2 - 3 August
Perth	4 - 5 August
Brisbane	1 - 2 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2005

Melbourne	14 - 18 February 6 - 10 June 12 - 16 September
Sydney	14 - 18 March 18 - 22 July 17 - 21 October
Adelaide	15 - 16 August
Perth	18 - 19 August
Brisbane	22 - 23 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed numbers for the identification of data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>

Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notice**2005 Edition of IP Australia's Customer Service Charter**

IP Australia has published the 2005 edition of our Customer Service Charter. We review our Charter every 12 months. Several standards have been revised and a few new standards have been added in this edition. Where a change to a standard affected our customers, consultation has occurred.

Significant changes include:

- Increasing the standard for time to exam for patents and trade marks;
- Adding a timeliness standard for requests for National Phase Entry for PCT applications and revising the standard for international-type search reports;
- Reminding customers of their obligations to file documents correctly and pay all required fees in full;
- Revising all designs standards in line with the new Designs Act;
- Reminding customers about restrictions on IP owners' freedom to use their invention, trade mark or design rights.

The full version of our Charter is available as a PDF document on our website, while the shorter version is available as a pamphlet from our State Offices, or by contacting our Customer Services Network via the contact details below.

We welcome any feedback you may have on our Charter or our services more generally. To give us your feedback you can:

- access the feedback form on our website www.ipaustralia.gov.au; or
- e-mail us at assist@ipaustralia.gov.au; or
- phone us on (02) 6283 2999 or 1300 65 10 10; or
- fax us on (02) 6283 7999; or

Official Notice

**Amendment to the Patents Regulations and Patents Act
concerning
National Phase Entry and the effect of amendments made under
the PCT**

Amendments to the Patents Regulations have been made and are expected to come into effect on 23rd December 2004. This notice provides an overview of the amendments.

The primary purpose of these amendments is to change the way amendments to a PCT application are treated as amendments to the Australian application. The need for these changes arises as a result of the frequent occurrence of late receipt of International Preliminary Examination Reports under Chapter II of the PCT (IPER). The late receipt has led to difficulties where at times the examiner does not know what the content of the specification is; concern by applicants with examination commencing without the IPER; and serious issues of uncertainty when an application is accepted based on a set of claims when there are later amendments under Art. 34 of the PCT.

The primary change introduced by these amendments to the Regulations is that amendments made under Art.34 of the PCT are treated as being part of the Australian specification only if the IPER is established before national phase entry in Australia. Similarly, amendments under Art. 19, and rectifications under Rule 91 are treated as being part of the Australian specification only if they are made before national phase entry in Australia.

Despite these changes, there will be situations where the examiner is aware that Preliminary Examination has been Demanded, but is unable to determine whether an IPER was established before national phase entry. [And for existing applications where Preliminary Examination has been Demanded but the Commissioner has not been able to obtain a copy of the IPER, the examiner is unable to determine the content of the specification.] The secondary change introduced by these amendments to the Regulations is to provide a statutory basis for the Examiner to raise an objection in these circumstances, and to provide options for the applicant to deal with the situation – including abandonment of any Art. 34 amendments.

Finally, the regulations have been amended to exclude the possibility of withdrawal of an Innovation Patent application in the period between acceptance and grant (to avoid administrative difficulties that arise if withdrawal occurs in that period), and to provide for AAT review of decisions to correct the Register or a Patent under regulation10.7.

It should be noted that these regulations have the affect of amending certain provisions of the *Patents Act 1990* – under the regulation making power of s.228(2)(t). Practitioners need to be aware that not all consolidations include the amendments effected by way of the regulations – depending on the source of the consolidation. Sections of the Act that are amended in some manner by the Regulations include sections 45, 48, 53, 89, 90, 92, 141, 142, and 223.

The following is a more detailed summary of the changes to the legislation and their practical impact.

Amendment of s.89 of the Act

Section 89 of the Act has been amended to alter the basis on which amendments under Arts 19 and 34, and rectifications under Rule 91, are treated as being part of the Australian complete specification.

1. Amendments made under Art. 19 or Rule 91 of the PCT are only taken to be part of the Australian complete specification if the amendments were made before national phase entry occurred. S.89(5)(b) is deleted, with Art. 34 amendments now being dealt with in new ss.89(6) and (7).
2. A new s.89(6) has been added. It sets the general rule that amendments under Art.34 of the PCT are only taken to be part of the Australian complete specification if the International Preliminary Examination Report [IPER] is *established* before national phase entry occurred. Note that the date of filing the Article 34 amendments is not relevant – as is the possibility that some were made before

national phase entry, and others made after national phase entry. The determining date is the date of establishment of the IPER – which is specified in the IPER.

3. A new s.89(7) has been added to provide that the Art. 34 amendments do not apply to the Australian complete specification if the applicant, in certain circumstances, abandons those amendments. A precondition for the applicant abandoning Art. 34 amendments is the existence of an examiner's objection relating to the unavailability of the IPER – either during examination under s.45 or 48, or in consideration of amendments under s.104.

These amendments apply to all PCT applications that enter the national phase on or after the commencement date.

NOTE: Applications filed in a foreign language are required to have a translation to enter the national phase [s.89(3)(a)]. For applications that enter the national phase after the commencement of these regulations, there can be no possibility of amendments being made after national phase entry having the effect of amending the Australian complete specification. Consequently the translation of the specification filed for national phase entry is the current Australian complete specification by reason of s.89(4) – irrespective of any Art. 19 or Art. 34 amendments, or rectifications under Rule 91. However, this is NOT the case for applications that have entered the national phase before the commencement of these regulations, where due account must be taken of any Art. 19 or Art 34 amendments, or rectifications under Rule 91, that occur after national phase entry.

Amendment of s.45 and 48 of the Act, and of Regulation 10.2

Situations can arise where the Commissioner is aware of the possibility of a Preliminary Examination Report having been established, but where the Commissioner is unable to obtain a copy of that report to ascertain whether any Art. 34 amendments were made, or whether (in the context of the new regime) that report was established before national phase entry. Sections 45 and 48, and Regulation 10.2, have been amended to allow the Commissioner to formally raise this as an objection.

The pre-conditions for the examiner raising an objection are as follows:

For non-expedited examination (both Full and Modified):

- A Demand under the PCT was filed before national phase entry;
- At least 3 months after national phase entry, the Commissioner asks the International Bureau for a copy of the IPER; and
- The International Bureau advises that the IPER is not available.
[s.45(1AA), 48(1AA)]

For Expedited examination:

- If the Commissioner does not have a copy of the IPER
[s.45(1AB), 48(1AB)]

NOTE: Practitioners requesting examination be expedited on a PCT application in the national phase should consider including the information referred to in s.45(1AC) or 48(1AC) at the time of making that request.

For voluntary amendments before examination:

- If the Commissioner does not have a copy of the IPER
[R. 10.2(1)(c)]

Where the examiner reports on the non-availability of the IPER, the objection can be overcome as follows:

- Provide a copy of the IPER (including any Art. 34 amendments)
- Advise that no Demand was made under Art. 31
- Advise that no amendments were made under Art. 34; or
- Advise that the Demand was filed, or the IPER established, after national phase entry
- Elect to abandon any amendments that may have been made under Art. 34
[s.45(1AC), 48(1AC), r.10.2(3)]

These amendments apply to all existing applications that had not been accepted prior to the commencement date.

Practical affect of the amendments

These amendments are intended to remove uncertainty about the content of a PCT national phase application when it is examined, as well as uncertainties that could arise if Art. 19 or Art. 34 amendments were made after the Australian complete application had been examined and accepted.

There is a significant backfile of applications where the Commissioner is aware that a Demand has been filed, but has been unable to obtain a copy of an IPER. For all applications that have entered the national phase before the commencement date, amendments made under Art. 34 will continue to amend the Australian complete specification – even if made after national phase entry. The Commissioner anticipates issuing examination reports for this backfile in the New Year. In practical terms, for such cases applicants will need to either:

- Provide a copy of the IPER (including any Art. 34 amendments)
- Advise that no amendments were made under Art. 34; or
- Elect to abandon any amendments that may have been made under Art. 34

Practitioners are advised, with respect to the option to abandon amendments, that while s.89(7) only applies to applications that enter the national phase after the commencement date, a request to abandon any amendments made under Art. 34 for ‘backfile’ applications will be treated as a request under s.104 having the same effect.

Other amendments

Two other amendments of a procedural nature are also made:

- New regulation 13.1B precludes withdrawal of an application for an innovation patent in the period between acceptance and grant.
- Regulation 22.26(2)9a)(vaa) has been added to allow application for review by the Administrative Appeals Tribunal of decisions to amend the Register.

Official Notice**Clarification of earlier Official Notice —
Amendments to the *Therapeutic Goods Act 1989* arising
from the *US Free Trade Agreement Implementation Act*
2004**

In the Australian Official Journal of Patents on 26 August 2004, an Official Notice was published entitled 'Amendments relating to Patents in the US Free Trade Agreement Implementation Act 2004'. This Official Notice detailed changes to the *Patents Act 1990* and the *Therapeutic Goods Act 1989* (the TG Act) arising from that Act.

This Official Notice requires clarification. It suggested that the amendments to the TG Act would require a person applying for registration or listing of *any* therapeutic good to give the Secretary the certificate required under section 26B of the TG Act as amended. This is not correct. Under the amendments to the TG Act, this certificate is only required for applications for registration or listing of therapeutic goods that are not therapeutic devices. The certificate is not required for applications for the inclusion of medical devices in the Australian Register of Therapeutic Goods.

A revised version of the relevant portions of the Official Journal notice is attached.

Official Notice**Amendments relating to Patents in the
US Free Trade Agreement Implementation Act 2004*****Amendments to the Therapeutic Goods Act***

Schedule 7 to the FTA Act includes amendments to the *Therapeutic Goods Act 1989* (the TG Act) to require persons applying for registration or listing of therapeutic goods (other than therapeutic devices) to certify either that:

- a) acting on good faith, they believe, on reasonable grounds, that they are not marketing, and do not propose to market, the therapeutic goods in a manner, or in circumstances, that would infringe a patent that has been granted in relation to the therapeutic goods; or that
- b) a patent has been granted in relation to the therapeutic goods, they propose to market the therapeutic goods before the patent term expires and they have given the patentee notice of their application for registration or listing of the therapeutic goods.

These amendments do not apply to applications for the inclusion of medical devices in the Australian Register of Therapeutic Goods.

Schedule 7 to the FTA Act also contains amendments to the TG Act that will affect parties who undertake infringement proceedings in relation to a pharmaceutical patent against a person who has lodged a certificate under the new requirements of the TG Act in respect of that pharmaceutical.

Under the new provisions, a patentee will be required to certify that the proceedings are to be commenced in good faith, have reasonable prospects of success and will be conducted without unreasonable delay. The patentee will be liable for a pecuniary penalty of up to \$10 million if the court finds that the certificate is false or misleading or an undertaking given in the certificate has been breached. This provision will only apply if the third party had made the certification outlined above, and the third party, with the leave of the court or the Attorney-General, applies to a prescribed Court for an order that the person pay the Commonwealth a pecuniary penalty.

A patentee may also be liable for damages if it seeks an interlocutory injunction against a third party who has applied for registration or listing of a pharmaceutical under the TG Act. Damages may be awarded if the patentee discontinues the principal proceedings without the consent of the other parties, or the principal proceedings are dismissed, and the court finds that the patentee did not have reasonable grounds for taking the action or was acting vexatiously. This provision will only apply if the third party had notified the patentee of their intention to market the pharmaceutical within the patent term as part of the certification process outlined in (b) above.

These amendments will commence on 1 January 2005.
