# General Information

## EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606  
(Telephone 02 6283 2999)  
(Fax 02 6283 7999)  
(E-mail [assist@ipaustralia.gov.au](mailto:assist@ipaustralia.gov.au))

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

## CONTACT INFORMATION

**Customer Support Centre**  
Ph: 02 6283 2999 Fax: 02 6283 7999  
E-mail: [assist@ipaustralia.gov.au](mailto:assist@ipaustralia.gov.au)

Customers can contact the Customer Support Centre by telephone or by e-mail. Telephones are staffed between 9AM and 5 PM EST each working day.

Customers should contact the CUSTOMER SUPPORT CENTRE for information about:

- All Patent Matters including PCT and Innovation Patents.
- All Trade Mark Matters.
- All Design matters.

## ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

## REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

## INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

## COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

## ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

## FREEDOM OF INFORMATION ACT

### What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

### What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

**Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)**

### How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

## NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

## REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Thursday for publication on the following Thursday. Electronic copy must be sent by e-mail to [publications@ipaustralia.gov.au](mailto:publications@ipaustralia.gov.au). The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

## DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website [www.austlii.edu.au](http://www.austlii.edu.au).

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 15. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au).

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

#### **HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS**

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

##### **Patent and Design Matters 2003**

Melbourne	12 - 16 May
Sydney	14 - 18 July
Adelaide	5 - 6 August
Perth	7 - 8 August
Brisbane	4 - 5 September

##### **Trade Mark Matters 2003**

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

## GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

### (i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

### (ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

### (iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

### (iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

### (v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

### (vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

## How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **Internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

## How Australian Patent Documents are Numbered

**Patent applications** in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345     Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.  
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

**NOTE** When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

## Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

## Using the Indices

### 1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
<b>A) Provisional applications filed - Name Index</b>		<b>B) Complete applications filed - Name Index</b>

Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

## 2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent Certified

## 3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

## 'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

### (10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

### (20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

### (30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

### (40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

### (50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

### (60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

### (70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

### (80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

### NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.  
  
    **AU-A** = Pre-examination                      **AU-B** = Post-examination
- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)<sup>2</sup>, (51)<sup>3</sup>, (51)<sup>4</sup> and (51)<sup>5</sup>.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

**OFFICIAL NOTICE****DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

<b>Application</b>	:	No. <b>690398</b> in the name of <b>DYNO NOBEL INC</b>
<b>Title</b>	:	<b>Method of Reducing Nitrogen Oxide Fumes in Blasting</b>
<b>Action</b>	:	Opposition under Section 59 of the Patents Act by <b>ORICA AUSTRALIA PTY LIMITED</b>
<b>Decision</b>	:	Issued 21 March 2003.

**Abstract**

The claimed invention is directed to a method for reducing the formation of nitrogen oxides (NO<sub>x</sub>) in after-blast fumes resulting from the detonation of an emulsion blasting agent in which urea is added to the discontinuous oxidiser salt solution phase of the emulsion. The rock conditions in which detonation occurs are characterised as "non-reactive soft or well fractured rock of the kind susceptible to producing such after-blast fumes."

**Findings*****Admissibility of evidence******Evidence in reply***

An administrative decision-maker is entitled to act on any material that is logically probative, and thus the Commissioner is not as a matter of law compelled to exclude evidence which is not properly in reply. The key question to consider is "how relevant is this material?" rather than "is it strictly in reply?" (*Snap-On Technologies Inc v Beissbarth GmbH* [2000] APO 52). On this basis the opponent's evidence in reply was admitted into the proceedings.

***Further evidence***

The relevance of the applicant's further evidence together with the balance of the parties' interests weighed in favour of permitting that evidence into the proceedings.

***Section 40***

The specification does not fail on the grounds of insufficiency or ambiguity. Although the words characterising the rock conditions in which the method according to the invention is used cause some difficulty to the extent that they do not bear a clear meaning in ordinary language, when the task of construing the specification is approached in the practical way that the authorities command the meaning of these words is readily ascertainable by the skilled addressee.

***Priority Date***

Nothing turned on whether the claims were entitled to an "earlier" priority date derived from the filing date of the basic application, or a "later" priority date being the date on which they were amended so as to refer to the rock conditions in which the claimed invention is used.

***Novelty***

None of the prior art documents or instances of prior use relied on by the opponent take all the essential features of the claimed invention

***Inventive Step***

The evidence left no doubt that urea had been used in emulsion explosives for a number of different purposes, but did not reveal the existence of common general knowledge or prior art information that would point persons skilled in the art to urea as a solution to the NO<sub>x</sub> fume problem. Although the Chemtech article may have suggested to the applicant that urea was "worth a try", the opponent has failed to demonstrate to the requisite level of certainty that the article directly led the applicant as a matter of course to try urea in the expectation that it might well provide a solution (*Aktiebolaget Hässel v Alphapharm Pty Ltd* [2002] HCA 59)

***Manner of Manufacture***

There was nothing on the face of the specification to suggest that the ability of urea to reduce the formation of NO<sub>x</sub> in after-blast fumes was known in the relevant sense. In view of the findings on inventive step the result was the same even if the range of enquiry extended outside the specification.

***Costs***

Costs were awarded against the opponent. However, there are no costs in relation to further evidence.

**OFFICIAL NOTICE****DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

**Application** : No. **717385** in the name of **Dura-Post (AUST.) Pty Ltd**

**Title** : **Guide Post**

**Action** : Opposition under section 59 of the Patents Act 1990 by **Rondo Building Services Pty Ltd**

**Decision** : Issued 21 March 2003

**Abstract**

The opposition was successful. Certain claims were found to lack novelty and an inventive step. The opposition grounds that the invention was not in respect of a manner of manufacture and that the nominated person was not entitled to any patent granted on the application were not established. Costs were awarded against the patent applicant.

All features of claim 1 were considered to be essential features of the claim.

Patentable subject matter was believed to be present. The applicant was allowed 60 days to propose suitable amendments.

**OFFICIAL NOTICE****DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

<b>Application</b>	:	No. 726261 in the name of <b>BOC GASES AUSTRALIA LIMITED</b>
<b>Title</b>	:	<b>A Process to Improve Mineral Flotation Separation by Deoxygenating Slurries and Mineral Surfaces</b>
<b>Action</b>	:	Opposition under Section 59 by <b>WMC RESOURCES LIMITED</b> , and objection to an application under Regulation 5.10(2) for an extension of time in which to serve evidence in answer
<b>Decision</b>	:	Issued 21 March 2003 .

**Abstract**

The applicant cited the quantity of the evidence in support, the withdrawal of the originally nominated expert who had primary carriage in this matter, the need to locate and retain further declarants and a restructure of the applicant's corporate group leading to control of the technology and associated intellectual property being transferred overseas as the major reasons for needing the extension of time.

The extension of time to serve evidence in answer was granted. Although the applicant's contention that the quantity of evidence was a significant factor in the delay in filing the evidence in answer was found to be without foundation, the opponent had provided a satisfactory explanation of the need for the extension sought. The public interest in not denying the grant of a valid patent, together with the interests of the applicant, also favoured the granting of the extension of time.

Costs were awarded against the objector to the extension.
