 - See non exempt documents held by agencies, and
 - appeal against a decision not to grant access to a document.

What documents can you see?

- The Act gives you a right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.
- Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films or videotapes.
- Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers).

How do you apply?

Requests for access to documents must

- Be in writing

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website

www.austlii.edu.au

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal.

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) NATIONAL PHASE ENTRY (NPE) -

For an application filed under the PCT to have full effect, it must move from the international phase of processing into the National phase of processing, by complying with the requirements of s.89(3). For PCT applications that were filed after 1 January 2004 which have entered the National Phase certain details are published.

(iv) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(v) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(vi) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vii) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **I**nternationally **a**greed **N**umbers for the **I**dentification of **D**ata or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard
2002100123 Innovation

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Entered National Phase
- (v) Applications Accepted, and
- (vi) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI, for applications which have entered national phase and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) **Innovation** Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Entered National Phase**
- F) Applications **Accepted**.
- G) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of IP Australia's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index
- C) Applications **Entered National Phase** – IPC Index

These indices give you the numbers of the applications which are either OPI, Entered National Phase or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

Official Notice**Review of the Innovation Patent**

The innovation patent was introduced in 2001 as part of the Australian Government's "*Backing Australia's Ability*" initiative. The key objective of the innovation patent system was to stimulate innovation, particularly in Australian Small to Medium Enterprises, by providing industrial property rights for lower level inventions.

The Government committed to reviewing the innovation patent system within five years of its introduction. IP Australia has prepared an issues paper for public consultation as the first step of the review process. A copy of the issues paper is available on IP Australia's website. Written comments on the issues paper or on the innovation patent system generally are invited by 16 December 2005.

ABSTRACTS OF DECISIONS

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

- Application** : No. **774331** in the name of **Ciba Specialty Chemicals Water Treatments Limited**
- Title** : **Manufacture of Paper and Paperboard**
- Action** : Application by **EKA Chemicals AB** for an extension of time under Regulation 5.10(2) to serve evidence in support, and objection thereto by **Ciba Specialty Chemicals Water Treatments Limited**
- Decision** : Issued 21 September 2005.

Abstract

A serious opposition is foreshadowed, preparation and service of evidence in support has been progressed without undue delay and further time is needed to finalise evidence, the nature of which is of significance to determination of the opposition. Consequently, at this stage of the proceedings, the opponent's and public's interests in having the opposition proceed on its merits hold sway over the patent applicant's and public's interests in having the matter decided earlier.

The extension of time to 24 September 2005 for EKA Chemicals AB to serve evidence in support is allowed.

ABSTRACTS OF DECISIONS

DECISION OF A DEPUTY COMMISSIONER OF PATENTS

Application	:	No. 753817 in the name of Sheiman Ultrasonic Research Foundation Pty Limited
Title	:	A sterilisation apparatus
Action	:	Opposition under s.59 by Novapharm Research (Australia) Pty Ltd.
Decision	:	Issued 26 September 2005

Abstract

Opposition before the Commissioner was limited to the grounds of fair basis and lack of novelty, including a whole-of-contents objection based on the opponent's application. In particular, the ground relating to inventorship/entitlement was, by consent, not argued before the Commissioner – the opponent expressing an intention of pursuing this ground in court.

Claims were found to be not novel, and not fairly based, having regard to the correct interpretation to be made of a certain phrase used in the claims. The independent method claim was also found to lack novelty (whole of contents) over the opponent's application.

Having regard to the opponent's express intention to pursue the issue of inventorship/entitlement in court, some observations on the evidence were made.

ABSTRACTS OF DECISIONS

DECISION OF A DEPUTY COMMISSIONER OF PATENTS

Patents	:	No. 540769 in the name of Pfizer Corp. No. 573123 in the name of Pfizer Ltd No. 651637 in the name of Pfizer Inc. No. 691005 in the name of Pfizer Research and Development Company, N.V/S.A
Titles	:	Dihydropyridine Derivatives Amlodipine benzene sulphonate and pharmaceutical compositions thereof Indole Derivatives Salts of an anti-migraine indole derivative
Action	:	Objection to the Commissioner's proposal pursuant to sub-regulation 10.7(7) to amend relevant entries in the Register to insert the correct extension of the term of the patents.
Decision	:	Issued 23 September 2005.

Abstract

The patentees' objections relate firstly to the interpretation of "first inclusion in the Australian Register of Therapeutic Goods" in subsection 70(5) of the Act and secondly to the validity of subregulation 10.7(7) which requires the Commissioner to amend the register where she becomes aware that the first regulatory approval date in relation to a substance is earlier than the date of first inclusion supplied with the application for the extension of term.

Found as a matter of construction that "first regulatory approval date" in section 77 means, where no pre-TGA marketing approval is given, the date of first inclusion in the ARTG; that in this context "inclusion" takes its meaning from the ARTG and consequently the TGA and encompasses listed goods as well as registered goods; and that the Commissioner should proceed in that event on the assumption that subregulation 10.7(7) is valid.

Direction given that the Register be amended to insert the correct extension of term of the patents but not before 28 days from the date of the decision or, in the event that the Commissioner is served in that period with a notice of appeal and an application for a stay of the decision, until the stay application is determined by the Court.
