ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgments notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from Register of Patents, Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the name of companies and firms. Enquiries concerning the precise name should be directed to the Customer Service Network.

FREEDOM OF INFORMATION ACT

What does it do?

- Gives you right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).
- Requires Commonwealth Government agencies to make available to members of the public:
 - Information about agencies, their functions and operations.
 - Information about rules and practices which are used in making decisions which affect you.
- Gives you a legal right to:
 - See non exempt documents held by agencies, and
 - appeal against a decision not to grant access to a document.

What documents can you see?

- The Act gives you a right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.
- Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films or videotapes.
- Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers).

How do you apply?

Requests for access to documents must

- Be in writing
- Provide sufficient information so as to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or Faxed to 02 6283 7999

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRAR OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS

Hearings before the Commissioner of Patents will usually be conducted at the Patent Office in Canberra and interstate hearing sessions are not provided. However, the Commissioner will conduct hearings outside of Canberra at a convenient time to all parties provided that the parties bear the travel costs of the hearing officer.

The various options for hearings are set out in the document "Options for Hearings" available on IP Australia's website at: www.ipaustralia.gov.au/pdfs/patents/optionsforhearings.PDF

HEARINGS BEFORE THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Designs and Trade Marks Hearings Sessions 2006

Melbourne	13 – 17 February 5 – 9 June 11 – 15 September
Sydney	13 – 17 March 17 – 21 July 16 – 20 October
Adelaide	14 – 15 August
Perth	17 – 18 August
Brisbane	24 – 25 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties.

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) NATIONAL PHASE ENTRY (NPE) -

For an application filed under the PCT to have full effect, it must move from the international phase of processing into the National phase of processing, by complying with the requirements of s.89(3). For PCT applications that were filed after 1 January 2004 which have entered the National Phase certain details are published.

(iv) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(v) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(vi) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vii) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the Internationally agreed Numbers for the Identification of Data or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. Complete and Innovation Applications are also given a ten-figure application number

e.g. 2002200345 Standard
2002100123 Innovation

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Entered National Phase
- (v) Applications Accepted, and
- (vi) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI, for applications which have entered national phase and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID No.</u>	<u>ITEM</u>	<u>INID No.</u>
A) Provisional applications filed - Name Index			
The <u>name</u> of the applicant	(71)	The <u>name</u> of the applicant	(71)

<u>Patent Attorneys</u>	(74)		
Related by addition	(61)		
Related by division	(62)		

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) **Innovation** Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Entered National Phase**
- F) Applications **Accepted**.
- G) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of IP Australia's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index
- C) Applications **Entered National Phase** – IPC Index

These indices give you the numbers of the applications which are either OPI, Entered National Phase or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notice

International Patent Classification (IPC) Reform at IP Australia

Background

IP Australia will be implementing IPC Reform at the advanced level on 1 January 2006. Previous journal notices (18 March 2004, 9 December 2004 and 15 June 2005) have outlined the implications associated with the introduction of IPC8 and have progressively detailed the approach IP Australia has taken to facilitate the implementation.

On 3 December 2005, IP Australia implemented a range of changes to the patent related business processes and IT systems. The purpose of this document is to describe the essential features of the implementation of IPC Reform at IP Australia.

General Information about IPC Reform

IPC Reform seeks to implement a more dynamic and robust patent classification index that is able to meet the demands of a rapidly changing world.

General information on IPC Reform can be found at:

[www.wipo.int/classifications/icode/en/reform/icode_reform.html](http://www.wipo.int/classifications/ipc/en/reform/icode_reform.html)

Frequently Asked Questions (FAQ) about IPC and IPC Reform are also available at:

www.wipo.int/classifications/icode/en/faq/icodefaq-ver01.htm

What do you need to know about IPC Reform at IP Australia?

IP Australia will be implementing IPC8 at the Advanced level.

There are two levels of classification – Advanced and Core. IP Australia, like all International Searching Authorities (ISA), will be classifying to the Advanced level

Not all IP Australia data holdings will be reclassified.

In 1970, AU PCT minimum documentation was forwarded to EPO to be consolidated in the INPADOC a database. This data is now available in the Master Classification Database (MCD) which has been established by the European Patent Office (EPO) to support IPC Reform. As a result, this is the only AU data that is subject to the initial and ongoing reclassification activity.

Pre-1970 data will not be reclassified but will still be searchable in the same way it is currently searchable, but will not be searchable using the eighth edition of the IPC.

You will need to continue to search using IPC 1 to 7 until February / March 2006.

Central to the concept of IPC Reform is the reclassification of existing patent documentation. This is a mammoth task that has not yet been completed. Until the reclassified data is received, the IPC symbols will still be IPC1-7 marks but they will be formatted in accordance with the standard required for IPC8. Once the reclassified data has been received and loaded into the IP Australia systems, you will be able to search post-1970 AU PCT minimum documentation using just IPC8. You will be able to do this via the IP Australia search tools. IP Australia will advise you when the reclassified data has been loaded.

The version indicator for IPC 1 to 7 will be shown in the IPC Reform format (ie: yyyy.mm) until the reclassified data is made available.

Until the reclassified data is made available, the version indicator for IPC versions 1 to 7 will be shown in the year and month format (ie: (yyyy.mm)). This is different to the way it is currently displayed but is consistent with the format required for the eighth edition of the IPC. Once the reclassified data is made available, the IPC symbols will be displayed using (2006.01) as the version indicator. As the IPC is updated, the version indicator will change.

Until the reclassified data is made available, the date indicators for the various versions of the IPC are as follows:

- IPC Version 1 – (1968.09)
- IPC Version 2 – (1974.07)
- IPC Version 3 – (1980.01)
- IPC Version 4 – (1985.01)
- IPC Version 5 – (1990.01)
- IPC Version 6 – (1995.01)
- IPC Version 7 – (2000.01)

If an old version of the IPC has an equivalent IPC8 symbol, the date shown will be (2006.01).

The IPC marks applied to applications at the time of publication will not be modified on scanned documents as the IPC is updated.

Once an application has been published, the IPC mark assigned to it will remain on the scanned images of the document but the symbol may be reclassified over time as the PCT minimum documentation is modified. The impact of this is that the scanned documents will need to be accessed on the AU-A, AU-B and APA Compact Discs and the APPS website using the application number rather than the IPC mark.

IPC Reform symbols will be published from 15 December 2006 but IPC7 symbols may still be seen through to 19 January 2006 on newly scanned images.

IP Australia will be implementing IPC Reform on 3 December 2005. This will mean that IPC8 marks will first be published on 15 December 2005. Due to a variety of reasons associated with the processing of publications, there will be a period of time where IPC marks will be published using the IPC Reform version indicator (ie: yyyy.mm) but scanned patent documents will contain version indicators that represent pre-reform formats. This will continue through to 19 January 2006. It is unlikely that the marks themselves will be different – only the format.

Every time the IPC is updated, IP Australia will republish the APA Master Index CD.

When the IPC is updated the data on the MCD will be reclassified to reflect the updated IPC. This means that the APA Master Index CD may contain information that is no longer valid. As a result, IP Australia will republish the APA Master Index CD each time the MCD is reclassified. The full CD set (currently over 50 CDs) will not be republished each time the data is reclassified. The documentation on the CDs will still be valid and remains accessible using the application number from the APA Master Index CD.

Official Notice**New Electronic Filing Service for International Patent Applications**

IP Australia is introducing a new service for the online filing of Patent Cooperation Treaty (PCT) international applications in electronic form. The new PCT Online service will be available through IP Australia's online services portal from 15 December 2005.

In order to use the new PCT Online service, patent applicants and their representatives will need to obtain the latest version of WIPO's PCT-SAFE software and a digital certificate, which are available from the WIPO website at www.wipo.int/pct-safe/en/.

The official WIPO notification of IP Australia's readiness to accept online filing of international applications in its role as Receiving Office was published in WIPO's PCT Gazette dated 15 December 2005, and is available via the WIPO website.

International applications filed electronically through IP Australia's PCT Online service that conform to the requirements identified in the official WIPO notification will attract a discount of \$218 (for applications with non-XML specifications), or \$327 (for applications with XML specifications). This discount is deducted from the filing fees collected on behalf of the International Bureau.

Aside from the calculation of fees and the method of transmission to WIPO's International Bureau, PCT applications filed electronically through IP Australia will be treated the same as applications filed through other methods.

IP Australia will also continue to accept international applications prepared with PCT-SAFE using the PCT-EASY filing method. Where a PCT application exceeds 20MB, online filing is not supported and the application will need to be filed using the PCT-EASY filing method. Applicants should note that applications filed in this manner will only attract a discount of \$109 as per the current practice.

An updated fee schedule for international patent applications lodged through IP Australia is available on the
IP Australia website at www.ipaustralia.gov.au/patents/fees_index.shtml.

ABSTRACTS OF DECISIONS**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application: No. 753802 in the name of **THE TRACK SHOP PTY LTD**

Title: **MILL ROLLERS AND ABRASION RESISTANT SURFACE COATINGS FOR MILL ROLLERS**

Action: Opposition under sec. 59 of the *Patents Act 1990* by
BUNDABERG FOUNDRY ENGINEERS LIMITED

Decision: Issued 07 December 2005.

Abstract

This application relates to a sugar mill roller for crushing cane and a method of manufacturing such a roller. In particular, according to the invention multiple weld deposits supporting a wear resistant material in grit-like form are made upon machined circumferential ridges formed on the roller to enhance the roller's ability to grip the sugar cane and to extend the intervening periods between which the weld deposits need to be renewed. It was known in the prior art to apply multiple weld deposits having particulate material within the weld matrix, but there was no indication in the disclosure and in the technical evidence in this matter that these particles were of a sufficient size to be considered "grit-like", as that term was to be construed in the specification.

An instance of prior use of the invention during experimentation was held to not be public prior use because of the existence of formal confidentiality agreements in place and because of an implied duty of confidence arising out of an employer-employee relationship.

The invention was also held to involve an inventive step in light of the common general knowledge in the field of the invention. While each integer of at least the broadest claims might be considered to be common general knowledge, the bringing together of those integers would seem to have about it the character of an inventive step. A document which was established to have been held in the library of an Australian research institute two years before the priority date of the claims was found to be not available for consideration for inventive step purposes because the evidence did not suffice to establish that it could have been reasonably expected to have been ascertained by the person skilled in the art.

The opposition was dismissed, and costs were awarded against the opponent.

ABSTRACTS OF DECISIONS**DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

Application: No. 742060 in the name of **CYBER TECHNICS PTY LTD**

Title: **Screening Assembly**

Action: Opposition by **JOHNSON SCREENS (AUSTRALIA) PTY LTD**
under section 59 of the Patents Act 1990

Decision: Issued 2 December 2005 .

Abstract

The opponent raised grounds of entitlement, novelty, inventive step and manner of manufacture, which grounds were also pursued at the hearing. The opponent also raised the ground of utility but specifically in relation to the ground of manner of manufacture.

The main invention claimed is a screening machine wherein a combination of features provides for locking of adjacent screen modules to a rail base by a deflection and wedging action. Claims are also made to an attachment rail, a cam key style locking member and a locking member. A single citation and five instances of prior use were raised against novelty. Omnibus claim 28 when read with figure 6 was found to lack novelty.

A single citation, and common general knowledge consisting of prior use disclosures and several patent specifications were raised against inventive step. Omnibus claim 28 when read with figure 6 was found to lack an inventive step.

Claim 21 was found to lack clarity and thus contravene section 40.

The opponent was unsuccessful on the grounds of entitlement and manner of manufacture and was found to have not made out a case on the ground of utility.

Applicant granted sixty days from the date of issue of this decision to file suitable amendments to overcome the defects identified in claims 21 and 28

In the circumstances no award of costs was made and each party directed to bear their own costs.

Amendments, Section 104**Applications for Amendment**

A person interested in opposing the allowance of the amendment may, at any time within three months from the date of this journal, give notice at the Patent Office using the approved form accompanied by the prescribed fee.

2003

2003266749 Method for Multiple Chemokine Receptor Screening for Antagonists Using RAM Assay **Chemocentryx** The nature of the amendment is as shown in the statement(s) filed 15 Nov 2005. Address for service in Australia - Spruson & Ferguson Level 35 St Martins Tower 31 Market Street Sydney NSW 2000

Amendments Made**2001**

2001276490 **The Secretary of State of Defence** The nature of the amendment is: Amend co-inventor name from Cater, Anthony to Carter, Tony

2003

2003204420 **Staffware plc** The nature of the amendment is: Amend co-inventor name from Taylor, Anne Kim to Taylor, Amanda Kim

Amendments, Section 104

2003216815 **Croda International plc** The nature of the amendment is: Add co-inventors Barnes, Alun Robert and Challoner, Nicholas Ian

2003270623 **IGT** The nature of the amendment is: Delete the co-inventors Lemay, Steven and Stockdale, James

2004

2004228021 **Unigen Pharmaceuticals, Inc.** The nature of the amendment is: Delete co-inventor Burnett, Bruce

2004236755 **Aspen Aerogels, Inc.** The nature of the amendment is as shown in the statement(s) filed 15 Nov 2005

2004240659 **Applied Molecular Evolution, Inc.** The nature of the amendment is: Amend the name of the applicant/patentee Applied Molecular Evolution to Applied Molecular Evolution, Inc.

2004277796 **Kyowa Pharmaceutical Ind. Co., Ltd.** The nature of the amendment is: Amend the invention title to read Basic medicine-containing preparation

2005

2005100884 **O'Brien, J.** The nature of the amendment is: Amend the invention title to read Storage and content management platform for short message services

2005100964 **Williams, L.** The nature of the amendment is: Amend the invention title to read Square Tube/Solid joining system

2005204299 **Belder, M.** The nature of the amendment is: Add priority details 2004904872 27 Aug 2004 AU

2005205749 **The Board of Trustees of the University of Illinois** The nature of the amendment is: Add priority details 60/611,906 21 Sep 2004 US

2005225092 **Yarra Ridge P/L** The nature of the amendment is: Amend co-inventors from Not Given to Greenbury, David; Watts, J. Russell

2005225116 **Yarra Ridge P/L** The nature of the amendment is: Amend the name of the applicant from Keren Sue Watts to Yarra Ridge P/L
