ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgments notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from Register of Patents, Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the name of companies and firms. Enquiries concerning the precise name should be directed to the Customer Service Network.

FREEDOM OF INFORMATION ACT

What does it do?

- Gives you right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).
- Requires Commonwealth Government agencies to make available to members of the public:
 - Information about agencies, their functions and operations.
 - Information about rules and practices which are used in making decisions which affect you.
- Gives you a legal right to:
 - See non exempt documents held by agencies, and
 - appeal against a decision not to grant access to a document.

What documents can you see?

- The Act gives you a right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.
- Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films or videotapes.
- Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or Designs Act 2003 or Plant Breeder's Rights Act 1994 are not available under the Freedom of Information Act (Section 12 refers).

How do you apply?

Requests for access to documents must

- Be in writing
- Provide sufficient information so as to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00).

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or Faxed to 02 6283 7999

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRAR OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website

www.austlii.edu.au

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS

Hearings before the Commissioner of Patents will usually be conducted at the Patent Office in Canberra and interstate hearing sessions are not provided. However, the Commissioner will conduct hearings outside of Canberra at a convenient time to all parties provided that the parties bear the travel costs of the hearing officer.

The various options for hearings are set out in the document "Options for Hearings" available on IP Australia's website at: www.ipaustralia.gov.au/pdfs/patents/optionsforhearings.PDF

HEARINGS BEFORE THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Designs and Trade Marks Hearings Sessions 2006

Melbourne	13 – 17 February 5 – 9 June 11 – 15 September
Sydney	13 – 17 March 17 – 21 July 16 – 20 October
Adelaide	14 – 15 August
Perth	17 – 18 August
Brisbane	24 – 25 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties.

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) NATIONAL PHASE ENTRY (NPE) -

For an application filed under the PCT to have full effect, it must move from the international phase of processing into the National phase of processing, by complying with the requirements of s.89(3). For PCT applications that were filed after 1 January 2004 which have entered the National Phase certain details are published.

(iv) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(v) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(vi) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vii) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **Internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard
 2002100123 Innovation

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Entered National Phase
- (v) Applications Accepted, and
- (vi) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI, for applications which have entered national phase and for applications which have been accepted. IPC stands for **I**nternational **P**atent **C**lassification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

Related by division	(62)		

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) **Innovation** Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Entered National Phase**
- F) Applications **Accepted**.
- G) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of IP Australia's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index
- C) Applications **Entered National Phase** – IPC Index

These indices give you the numbers of the applications which are either OPI, Entered National Phase or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notice**Intellectual Property Laws Amendment Bill 2006**

The Intellectual Property Laws Amendment Bill 2006 (“the Bill”) was introduced into the House of Representatives on 30 March 2006. The Bill amends the *Patents Act 1990*, the *Trade Marks Act 1995*, the *Designs Act 2003*, the *Plant Breeder’s Rights Act 1994* and the *Olympic Insignia Protection Act 1987* (“the Acts”).

The Bill amends the Patents Act to give effect to some outstanding recommendations of the Government’s response to the Intellectual Property and Competition Review Committee’s (IPCRC) report *Review of the Intellectual Property Legislation under the Competition Principles Agreement* and the Advisory Council on Intellectual Property’s (ACIP) report *Review of Enforcement of Industrial Property Rights*.

The Bill also implements wider springboarding provisions than those currently available by allowing springboarding on any pharmaceutical patent at any time. Springboarding refers to using the subject matter of a patent to collect the data required to obtain regulatory approval of a generic version of the product to which the patent relates, during the life of the patent.

Other amendments made by the Bill:

- give effect to the some outcomes of the recently concluded trade marks legislation review;
- allow the Registrar of Trade Marks to revoke the registration of trade marks in certain circumstances, providing a quick and inexpensive means of addressing incorrectly registered trade marks;
- amend the Trade Marks Act to make publicly available the majority of documents that relate to particular trade marks; and
- make a number of minor, technical and administrative amendments to the above Acts to correct some technical errors and to ensure that the legislation functions as intended.

Note: This notice is intended to provide a brief overview of the amendments contained in the Bill, and therefore focuses on the main issues. The Bill itself and the explanatory memorandum (EM) to the Bill should be considered for a detailed understanding of the provisions. The Bill and the EM are available on-line at BillsNet <http://www.aph.gov.au/ParlInfo/BillsNet/main.htm>. Regulations will need to be made to fully implement a number of the provisions in the Bill.

Revoking registration of trade marks

The Bill amends the Trade Marks Act to allow the Registrar of Trade Marks to revoke the registration of trade marks in circumstances in which the trade mark should not have been registered in the first place. This provision would be used, for example, when a trade mark is registered as a result of an error or oversight on the part of the Trade Marks Office while assessing an application for registration of a trade mark.

If a trade mark’s registration is revoked, it will revert to a pending application for registration of a trade mark. This will allow the application to be examined, or an opposition to the registration of the application to be heard, and a correct decision whether or not to register the trade mark to be made.

Non-payment of fees relating to trade marks

The Bill amends section 223 of the Trade Marks Act to repeal many of the fee payment requirements, and to provide that the details of how fees are paid will be prescribed in the *Trade Marks Regulations 1995*. This will enable this administrative function to be handled more flexibly by the Trade Marks Office, including streamlining fee payment methods and introducing modern methods of fee payment. These amendments will bring the fee payment provisions of the Trade Marks Act into line with the fee payment provisions in the Patents Act and the Designs Act.

This amendment will not alter any of the fees payable under the Trade Marks Act.

Registration process for certification trade marks

The Bill amends the Trade Marks Act to clarify the requirements of the rules governing the use of a certification trade mark (CTM), and modernises the language in which they are expressed. The proposed amendments also clarify that the CTM owner is responsible for determining whether an approved certifier possesses the qualifications, skills or abilities specified in the rules. Other amendments clarify the requirements that must be satisfied before the Registrar is able to accept an application for registration of a CTM.

The amendments also allow for administrative procedures relating to CTMs to be specified in the regulations, to enable these procedures to be handled more flexibly by the Trade Marks Office and the ACCC. The amendments also allow the rules to be published at an earlier stage than they are currently published.

Availability of documents about trade marks

The Bill amends the Trade Marks Act to make prescribed documents that relate to trade marks available for public inspection at an early stage in the trade mark application process. This amendment will provide a quick and efficient system that simplifies the processing of requests for information on trade mark files whilst balancing the interests of applicants for registration, who must sometimes file sensitive business information in order to obtain registration. The Registrar will be able to receive such information on an explicit understanding of confidentiality, and documents containing this information will not be made available for public inspection.

Relief for infringement of patents

The Bill amends the Patents Act to allow for exemplary damages to be awarded by a court in patent infringement actions, for example, in the case of flagrant or wilful infringement of a patent. Allowing the award of exemplary damages will serve as a deterrent against patent infringement, which will in turn strengthen patent rights. This amendment implements a recommendation of the IPCRC report.

Exemption of continued prior use from patent infringement

The Bill amends the prior user defence in the Patents Act to clarify that the prior user's rights include exploiting the product, method or process, that the prior use be only in Australia and that the prior use right may be assigned but not licensed. This amendment reaffirms the Government's commitment to ensuring that the legitimate interests of third parties are not compromised by the grant of a patent. This amendment implements a recommendation of the IPCRC report.

Springboarding and patents

The Bill amends the provisions in the Patents Act that relate to springboarding of patents for pharmaceuticals. The purpose of this amendment is to allow springboarding as an exception to patent infringement on any pharmaceutical patent at any time for purposes solely in connection with gaining regulatory approval of a pharmaceutical product in Australia or another territory, consistent with Australia's international obligations.

Prior to these amendments, the Patents Act contained a limited provision that only allowed springboarding on pharmaceutical patents after they had received an extension of patent term. This amendment aims to bring Australia's springboarding provisions closer to those of competitor countries and improve the environment for generic pharmaceutical companies conducting research and development in Australia.

Compulsory licensing and patents

In order to further promote the efficient use of patents and promote competition, the Bill adds a new provision to the existing compulsory licence provisions in the Patents Act. This provision will provide for a compulsory licence to be available as a remedy if a person has contravened the anti-competitive conduct provisions of the *Trade Practices Act 1974*. This amendment implements a recommendation of the IPCRC report.

Specifying claims for innovation patents

The Bill includes an amendment to clarify that the claims of an innovation patent define the invention.

Making divisional applications for innovation patents

The Bill includes an amendment to clarify that a divisional application from a granted innovation patent may only be made, in accordance with the regulations, between the period starting when the examination of the first innovation patent begins and ending when the first innovation patent either ends, ceases or is revoked.

Setting dates by regulation

The Bill amends the Trade Marks Act and the Plant Breeder's Rights Act so that the 'filing date' of an application for registration of a trade mark and the 'priority date' of an application for PBR in a plant variety may be set by the regulations made under those Acts. This will for example, allow regulations to be made allowing these dates to be re-set if an application under those Acts has been partially received as a result of a disruption of on-line filing services. This brings those Acts into line with the Patents Act and the Designs Act. Introducing this flexibility in the Trade Marks Act and the Plant Breeder's Rights Act will provide the ability to accommodate circumstances that may otherwise jeopardise applicants' rights.

Effect of office not being open for business

The Bill includes provisions to specify how actions may be done when the Patent, Trade Marks, Designs or Plant Breeder's Rights Offices or sub-offices are not open for business, for example, between the Christmas and New Years public holidays, or when the office is forced to close down as a result of an emergency situation. These amendments also allow regulations to specify when the Offices and sub-offices are not open for business.

Extensions of time

The Bill clarifies that the right of review under subsection 224(7) of the Trade Marks Act is limited to a decision of the Registrar not to extend the time for the doing of a 'relevant act'.

Approving forms

The Bill includes amendments to provide that approved forms under the Plant Breeder's Rights Act will no longer be "legislative instruments" for the purposes of the Legislative Instruments Act. This brings the Plant Breeder's Rights Act in line with other IP legislation and will mean that approved forms will no longer have to be registered on the Federal Register of Legislative instruments, and will not be subject to disallowance by Parliament.

Delegation

The Bill provides for the powers or functions under the Plant Breeder's Rights Act to be delegated to a prescribed employee or class of employees. This will allow for more efficient administration of the plant breeder's rights system, and brings the Plant Breeder's Rights Act into alignment with the Patents, Trade Marks and Designs Acts.

Statute law revision amendments

The Bill includes some technical amendments to correct minor errors in the Patents and Trade Marks Acts.

Applications Lapsed, Refused Or Withdrawn, Patents Ceased or Expired

Reference to the application numbers must include the year of the application of the patent, which is shown preceding the numbers.

The codes next to each number have the following meanings:

Code Meaning

1	Application Lapsed Section 142(2)(a)
3	Application Lapsed Section 142(2)(c)
4	Application Lapsed Section 142(2)(d)
5	Application Lapsed Section 142(2)(e)
6	Application Lapsed Section 142(2)(f)/See Reg. 8.3(3)
7	Application Lapsed Reg. 3.2A(3)
8	Application Lapsed Reg. 3.4(6)
9	Application Lapsed Section 142(3)
10	Application Lapsed Section 142(4)(b)
11	Application Lapsed Section 148(1)(c)
12	Application Withdrawn Section 141(1)
13	Application Withdrawn Section 141(3)/See Reg. 8.3(2)
14	Patent Ceased Section 143(a), or Expired
15	Patent Ceased Section 143(b)
16	Application Refused
17	Application Lapsed Reg. 22.2B(2)
18	Application Lapsed Reg. 3.2B(3),(5) or (6)
19	Patent Ceased Section 143A(a)/Reg. 22.2B(2)
20	Patent Ceased Section 143A(b)/Reg. 22.2D(2) or (4)
21	Patent Ceased Section 101C(b)/Section 143A(c)/Reg. 9A.4
22	Patent Ceased Section 143A(d), or Expired
23	Patent Ceased Section 143A(e)
24	Application Lapsed Reg. 22.2E(2)
25	Application Lapsed Reg. 22.2I(2)

A	Applications on which examination has not been requested or directed
B	Applications on which a direction to request examination has been given
C	Applications on which examination has been requested or on which an examination report has been issued
D	Applications which have been accepted or advertised accepted, (including applications which have been advertised 'Not Sealed')
E	Patents on which an examination has not been requested
