## GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (**AOJP**) reports on all the major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

### (i) FILING –

This is the act of making an application. When the application is first filed certain details are published.

### (ii) OPEN-TO-PUBLIC-INSPECTION (OPI) –

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published. In addition, an Abstracts Supplement to the AOJP contains abstracts of the inventive content of the OPI applications.

### (iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. In addition, an Abridgments Supplement contains an abridgment (usually the broadest accepted claim and relevant drawing where appropriate) for each accepted application. Notice of opposition may be filed within three months of advertisement of acceptance.

### (iv) OPPOSITION –

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published.

### (v) SEALING –

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their six-figure acceptance number.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

## How To Identify Information Using "INID" Numbers

Patents are published in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the international agreed Numbers for the identification of Data or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the data on which a document is filed has the INID number (22), while the name of the applicant has the INID number (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

## How Australian Patent Documents are Numbered

Patent applications in Australia are assigned numbers at various stages in their processing. Each Australian application which proceeds to acceptance will have at least two (and sometimes more) different numbers during its life. When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a number with two characters and four numbers

e.g. **PM1234**

A provisional application number is identified by the INID number (21).

2. **Complete Applications** are given a five-figure application number followed by the last two digits of the year of filing

e.g. 12345/93

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an **unaccepted** application has the prefix, **AU-A**; e.g. AU-A-12345/93.

A document corresponding to an **accepted** application carries the prefix **AU-B**; e.g. AU-B-12345/93.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because **amendment** may occur between first publication (OPI) and second publication (acceptance).

A five-figure application number is identified by the INID numbers (11) or (21).

3. When a patent application is **accepted** it is given a six-figure document number in addition to the five-figure application number  
e.g. 123456

This is the number you must use to keep track of the application in the AOJP from now on. It is identified by the INID number (10).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the five-figure application number preceded by the appropriate prefix.

## Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed
- (iii) Applications Open to Public Inspection, and
- (iv) Applications Accepted

The Journal lists the information published in that category in an alphabetical **Name Index** list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a **Numerical Index**. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also **IPC indices** provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC symbol is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC symbol, and within each symbol provide either the five-figure application numbers of the applications which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

## Using the Indices

### 1. To Find Patent Information If You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

| <u>ITEM</u>   | <u>INID No.</u> | <u>ITEM</u>  | <u>INID No.</u> |
|---|-----------------|--|-----------------|
| <b>A) Provisional applications filed – Name Index</b>         |                 | <b>B) Complete applications filed – Name Index</b> |                 |
| The <u>name</u> of the applicant                              | (71)            | The <u>name</u> of the applicant                   | (71)            |
| The Provisional application <u>number</u>                     | (21)            | The <u>number</u> assigned to the application      | (21)            |
| The <u>date</u> of filing                                     | (22)            | The <u>date</u> of filing                          | (22)            |
| The <u>title</u> of the invention                             | (54)            | <u>Title</u> of the invention                      | (54)            |
|   |                 | <u>Number</u> of priority document(s) if any       | (31)            |
|   |                 | <u>Date(s)</u> of filing of priority documents     | (32)            |
|   |                 | <u>Country</u> in which priority document filed    | (33)            |
|   |                 | PCT application <u>number</u>                      | (86)            |
| <br>  |                 |  |                 |
| <u>ITEM</u>   | <u>INID No.</u> | <u>ITEM</u>  | <u>INID No.</u> |
| <b>C) Applications open to public inspection – Name Index</b> |                 | <b>D) Applications accepted – Name Index</b>       |                 |
| The <u>name</u> of the applicant                              | (71)            | The <u>name</u> of the applicant                   | (71)            |
| The <u>number</u> of the document                             | (11)            | The <u>number</u> of the document                  | (11)            |
| The <u>number</u> assigned to the application                 | (21)            | The <u>number</u> of the accepted document         | (10)            |
| The <u>date</u> of filing                                     | (22)            | The <u>number</u> assigned to the application      | (21)            |
| The <u>title</u>  | (54)            | The <u>date</u> of filing                          | (22)            |
| International patent <u>classification symbols</u>            | (51)            | The <u>title</u>                                   | (54)            |

|   |      |  |      |
|---|------|--|------|
| Priority document <u>number(s)</u>              | (31) | International patent <u>classification symbols</u> | (51) |
| <u>Date</u> of filing of priority document(s)   | (32) | PCT publication <u>number</u>                      | (87) |
| <u>Country</u> in which priority document filed | (33) | Priority document <u>number(s)</u>                 | (31) |
| Publication <u>date</u> of unexamined document  | (43) | <u>Date</u> of filing of priority document(s)      | (32) |
| Inventors <u>names</u> if known                 | (72) | <u>Country</u> in which priority document filed    | (33) |
| <u>Patent Attorneys</u>                         | (74) | Publication <u>date</u> of unexamined document     | (43) |
| Related by addition                             | (61) | Publication <u>date</u> of examined document       | (44) |
| Related by division                             | (62) | Publication <u>date</u> of granted document        | (45) |
|   |      | Inventors <u>names</u> if known                    | (72) |
|   |      | <u>Patent Attorneys</u>                            | (74) |
|   |      | Related by addition                                | (61) |
|   |      | Related by division                                | (62) |

You will notice at each stage of following an application through that all applications are in alphabetical order of Applicant, not inventor.

## 2. To Find Information About a Patent Application If You Know Its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Applications **Open to Public Inspection**.
- D) Applications **Accepted** (note that this uses six-figure document numbers rather than five-figure application numbers).

## 3. To Find Information About Patent Documents in the Technical Subject that You are Interested in if You Know the International Patent Classification Symbol for that Technical Subject.

All patent applications are classified according to their technical subject matter using the International Patent Classification ( **IPC** ). Although the system is very detailed and covers all technologies, knowledge of the IPC symbols of the technical subject that you are interested in will allow you to find patent documents in those technologies quite easily. To identify the IPC symbols for the technical subject that you are interested in, please consult the official IPC web page at <http://www.wipo.int/classifications/ipc/ipc8>. This web page has extra aids to locate the classification symbols such as a catchword index, definitions and illustrations. The IPC symbols may appear in publications in boldface (for "invention information") or regular typeface (for "additional information"). The italic typeface indicates that IP Australia classifies into the advanced level of IPC. The version indicator after each IPC symbol, e.g. (2006.01), indicates the year and the month that the symbol first appeared in IPC.

The indices to use are

- A) Applications **OPI** – IPC Index
- B) Applications **Accepted** – IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC symbols.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

## INID NUMBERS in use on Australian Patent Documents

INID is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

### (10) Document Identification

- (11) Number of the document
- (12) Plain language designation of the kind of document.
- (19) WIPO country code, or other identification, of the country publishing the document.

### (20) Document filing data

- (21) The number(s) assigned to the application(s)
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

### (30) Priority date

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

### (40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant has taken place on or before the said date.

### (50) Technical Information

- (51) International Patent Classification.
- (52) Domestic or national classification.
- (54) Title of invention.
- (56) List of prior art documents, if separate from descriptive text.
- (57) Abstract or claim.

### (60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s)
- (62) Related by division(s).

### (70) Identification of parties concerned with document

- (70) Name(s) of nominated person
- (71) Name(s) of applicant(s).
- (72) Name(s) of inventor(s) if known to be such.
- (74) Name(s) of attorney(s) or agent(s).
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

### (80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number.
- (87) PCT Publication Number.

#### NOTE:

(1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the AU-A or AU-B.

**AU-A** = Pre-examination

**AU-B** = Post-examination

(2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)<sup>2</sup>, (51)<sup>3</sup>, (51)<sup>4</sup> and (51)<sup>5</sup>.

(3) INID code 74 provides for the name of patent attorney, or firm of attorneys, prosecuting an application.

(4) No provision is made for addresses for service. Addresses for service of applicants not represented by an independent attorney or firm are viewable at [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au) and on sale at the IP Australia State Offices.

**AUSTRALIAN OFFICIAL JOURNAL OF PATENTS (Supplement) 29 March 2007****OFFICIAL NOTICES****Official Notice**

Victorian State Office  
Relocation Notice

We are pleased to announce that the Victorian State Office of IP Australia will be moving to new premises effective from Monday, May 7, 2007.

The new office is located between Elizabeth and Swanston Streets in the heart of Melbourne's central business district.

The new address will be:

Level 1, 257 Collins Street  
Melbourne Vic 3000  
(access via lifts at rear of building)

As part of this move IP Australia will join a range of agencies at the "Innovation @ 257 Resource Centre" all of which are involved in helping innovators and entrepreneurs alike to assess the feasibility of their business ideas.

All phone, facsimile and e-mail address numbers remain unchanged.

**AUSTRALIAN OFFICIAL JOURNAL OF PATENTS (Supplement) 29 March 2007****ABSTRACTS OF DECISIONS****DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS**

- Application** : No. **686433** and **686434** in the name of **E.I Du Pont De Nemours and Company**
- Title** : Constant Boiling Compositions (both applications having the same title)
- Action** : Costs in respect of oppositions under section 59 by **ICI Chemicals & Polymers Limited** (in respect of both applications) and **Atofina S.A.** (in respect of 686434 only)
- Decision** : Issued 16 March 2007.

**Abstract**

The basic question is whether the justice of the case requires variation of the schedule.

The main justification relied on for varying the scale is that cross-examination of witnesses took place. Examination of witnesses is permitted under the Act, although it is uncommon in actions before the Commissioner. It has not been shown that there was anything special or unusual about the cross-examination that took place.

The actual costs of counsel far exceeded the amount recoverable under the Schedule. However, the costs awarded are not intended to cover the actual cost of the action.

The presence of cross-examination is not sufficiently special or unusual to warrant departing from Schedule 8.
