General Information

EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606
(Telephone 02 6283 2999)
(Fax 02 6283 7999)
(E-mail assist@ipaustralia.gov.au)

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 15. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2003

Melbourne	12 - 16 May
Sydney	14 - 18 July
Adelaide	5 - 6 August
Perth	7 - 8 August
Brisbane	4 - 5 September

Trade Mark Matters 2003

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **Internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
A) Provisional applications filed - Name Index		B) Complete applications filed - Name Index

Inventors <u>names</u>	(72)
<u>Patent Attorneys</u>	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent Certified

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

 AU-A = Pre-examination **AU-B** = Post-examination
- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notices**Patents: Amendment of the Manual of Practice and Procedure**

In August 2003 amendments were made to the Australian Patent Office Manual of Practice and Procedure Volume 3 - Oppositions, Courts, Extensions & Disputes.

The principal changes relate to:

Part 26 of Volume 3 of the Manual of Practice and Procedure – dealing with extensions of time under s.223 – has been extensively revised and updated. While there are many changes in the part, some specific changes are:

- new paragraph 26.6 has been added to include reference to the 'due care' provisions of s.223(2A).
- new paragraph 26.8 sets out some common deficiencies in applications for an extension of time.
- further information has been provided in 26.5.5 dealing with the Commissioner's discretion, including a discussion of circumstances where the Commissioner is *functus officio*.
- 26.3.2 sets out the circumstances in which the Commissioner will inform known third parties of a pending extension under section 223(1) and allow an opportunity to object.
- 26.3.5 have been added to set out the applicability of section 223 to situations where an applicant has not filed priority documents before acceptance.
- paragraph 26.5.3.2 has been included to set out the practice where an application for an extension of time is made and there has been an unrecorded change of owner of the patent or application.

Practitioners should particularly note the following general issues with respect to s.223 requests:

- When a s.223 request has been filed – users should ensure any actions due at a subsequent date that expires before the s.223 request is determined are, in fact, done at the relevant time. Failure to perform those actions at the relevant times is a new 'error or omission' not covered by the original s.223 request.
- There may be some situations where a subsequent action cannot be done until after the extension has been granted. The most notable example is gaining acceptance - whether the application has lapsed for not being accepted with the usual 21 months, or for some other reason (in particular, non-payment of a continuation fee.). In such circumstances, the extension of time sought must be sufficient to allow time to gain acceptance. Note that the principles deriving from *Ferplas Industries Ltd's application (No. 2)* [1979] 49 AOJP 1185 do not apply under the Patents Act 1990.
- The fee for filing a s.223 request is generally non-refundable – even if the requestor withdraws the request. There may be circumstances where there is an imperative to file a s.223 request before being appraised of whether circumstances exist to justify that request. In that situation, users should consider filing the request without payment of fees – using the period available under the Invitation to Pay (ITP) mechanism [see Regulation 22.2(C)] to assess whether or not the request should be pursued.

Other amendments relate to deleting all references to *locus standi* having application under the Patents Act 1990 (Part 4) and correcting minor errors, typographical mistakes, etc

Official Notices

Changes to PCT application and publication numbers

Due to the increase in PCT applications, the PCT Application numbering system was revised in 2001, with the changes taking effect on 1 Jan 2004. The revised Administrative Instructions were published in *PCT Gazette* No. 47/2001 on November 22, 2001. They are reproduced here for information.

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS (with effect from January 1, 2004)

Section 307

System of Numbering International Applications

(a) Papers purporting to be an international application under Rule 20.1(a) shall be marked with the international application number, consisting of the letters "PCT," a slant, the two-letter code referred to in Section 115, indicating the receiving Office, a four-digit indication of the year in which such papers were first received, a slant and a six-digit number, allotted in sequential order corresponding to the order in which the international applications are received (e.g., "PCT/SE2004/000001"). Where the International Bureau acts as receiving Office, the two-letter code "IB" shall be used.

(b) [No change]

Section 404

International Publication Number of International Application

The International Bureau shall assign to each published international application an international publication number which shall be different from the international application number. The international publication number shall be used on the pamphlet and in the Gazette entry. It shall consist of the two-letter code "WO" followed by a four-digit indication of the year of publication, a slant, and a serial number consisting of six digits (e.g., "WO 2004/123456").

Official Notices

LAPSING OF PCT APPLICATIONS

IP Australia wishes to inform customers that PCT applications designating Australia which have lapsed because they have not entered the national phase within 31 months of their priority dates will be listed in a *Lapsed PCT Applications Listing* on the Resources > Patents > NPS News area of IP Australia's web site. The direct address is:

http://www.ipaustralia.gov.au/resources/nps_news_lapsed.shtml

The *Lapsed PCT Applications Listing* will be updated monthly to provide information for customers on the status of these applications. This listing is provided as an interim service until the relevant functionality is developed within the New Patent Solution (NPS) system. Consequently, Patsearch (the online NPS patent search engine) will not indicate the status of these applications as "lapsed". Users should therefore access the *Lapsed PCT Applications Listing* to identify if a relevant PCT application has lapsed.

While IP Australia is working on developing the relevant capability to automatically lapse relevant PCT applications in the NPS system, this is not expected to be available for a number of months. In the meantime, the *Lapsed PCT Applications Listing* will provide users with more certainty as to whether a relevant PCT application has lapsed or not.

For further details, please contact Ray Hallett on 02 6283 2186.

DECISION OF A DELEGATE OF THE COMMISSIONER OF PATENTS

- Application** : No. 711501 in the name of **International Game Technology**.
- Title** : Electronic Game Method and Apparatus with Hierarchy of Simulated Wheels
- Action** : Application under regulation 5.5 for dismissal of the opposition under section 104 filed by **Aristocrat Technologies Australia Pty Ltd**
- Decision** : Issued 29 August 2003.

Abstract

The opposition under section 104 as outlined in the statement of grounds and particulars is clearly untenable and should be dismissed. The absence of relevant particulars cannot be overcome with reference to prosecution history, and comments provided by the opponent in that respect, nor is a direction for further and better particulars appropriate in the circumstances.

EXPRESSIONS OF INTEREST

Experienced patent attorney with a background in software, hardware and networks is sought for a leading new practice. We are a boutique IT and IP legal and patent attorney firm with a strong client base and a distinct cultural difference from the large law firms.

This opportunity will be attractive to an experienced patent attorney who is keen to play a central role in developing our patent attorney practice. We currently need to expand our capabilities to service the needs of our major clients.

For further information, or to forward an expression of interest please contact The Managing Partner, Mark Vincent at mvincent@griffins.com.au.

Legal Search & Recruitment

NORWOOD ABBEY

Senior Patent Attorney – In-House

- Exciting times, exciting company!
- Excellent salary package plus benefits

Norwood Abbey Limited is an Australian public company and forms part of the worldwide Norwood Abbey Group of Companies. A medical technologies group with a focus on drug delivery and immunology, Norwood Abbey has gained international recognition for market innovation and leadership. With a number of exciting projects and strategic partnerships in the US and Europe, the company is leading the way in ground breaking medical technology development emanating from prestigious research institutions including the Massachusetts Institute of Technology and the Massachusetts General Hospital in Boston.

In this newly created role of **Senior Patent Attorney**, you will report directly to the Executive Chairman and be responsible for creating, developing and managing the extensive intellectual property portfolio of the company. As well as ensuring that the company's IP position and interests are protected, you will be required to liaise with a range of people across all levels within, and outside, the company including local and international patent attorneys, researchers, scientists and key business managers.

The ideal candidate will be a qualified Patent Attorney with a background in either mechanical or electrical engineering, physics, biology or pharmacology and significant experience in Patent Law either within a firm or corporate. The role demands an exceptionally astute, commercial and proactive professional who enjoys a high level of responsibility and autonomy. Strong communication and negotiation skills, a high degree of confidence and the ability to establish credibility quickly are essential attributes. This is an exciting role for a Patent Attorney seeking a senior level involvement while working in a dynamic, highly commercial and cutting edge environment.

Location: Southern Suburbs, Melbourne

Extensions of Time, Section 223

Applications Received

Notice of opposition under Section 223(6) to the undermentioned application(s) for an extension of time may be lodged at the Patent Office within the prescribed time.

2000

2000278910 **Dobozy, John** An application to extend the time from 06 May 2003 to 06 Sep 2003 in which to enter the National Phase has been filed. Address for service in Australia - John Geza Dobozy PO Box 5872 Gold Coast Mail Centre QLD 9726

2001

2001293518 **Innovative Design Co Pty Ltd** An application to extend the time from 12 May 2003 to 12 Sep 2003 in which to enter the National Phase has been filed. Address for service in Australia - Griffith Hack 168 Walker Street North Sydney NSW 2060

Applications Allowed - Section 223(2)

2001

2001236949 **Phoenix Scientific, Inc.** The time in which to enter the National Phase has been extended to 18 Feb 2003. Address for service in Australia - Freehills Carter Smith Beadle MLC Centre Martin Place SYDNEY NSW 2000

2003

2003202425 **Max-Planck-Gesellschaft Zur Forderung Der Wissenschaften E.v.** The time in which to comply with a direction under Section 3.2A has been extended to 28 Aug 2003. Address for service in Australia - Baldwin Shelston Waters Level 21 60 Margaret Street Sydney NSW 2000

2003227300 **Bennett, B.** The time in which to associate with a Complete Application has been extended to 29 Aug 2003. Address for service in Australia - Barry William Bennett RMB 3018 Berrigan Road COBRAM VIC 3644

2003902574 **Gaskin, L.** The time in which to pay the filing fee has been extended to 29 Aug 2003. Address for service in Australia - Leslie France Gaskin PO Box 3192 TUGGERAH NSW 2259
