General Information

EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606
(Telephone 02 6283 2999)
(Fax 02 6283 7999)
(E-mail assist@ipaustralia.gov.au)

Copy for advertisement in the journal should be received at IP Australia, not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

CONTACT INFORMATION

Customer Support Centre
Ph: 02 6283 2999 Fax: 02 6283 7999
E-mail: assist@ipaustralia.gov.au

Customers can contact the Customer Support Centre by telephone or by e-mail. Telephones are staffed between 9AM and 5 PM EST each working day.

Customers should contact the CUSTOMER SUPPORT CENTRE for information about:

- All Patent Matters including PCT and Innovation Patents.
- All Trade Mark Matters.
- All Design matters.

Professional Standards Board for Patent and Trade Mark Attorneys
Ph: 02 6283 2345 Fax: 02 6285 1048

ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgements notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by the letters AU-A or AU-B respectively.

REQUESTS FOR INFORMATION UNDER SECTION 194 (C)

A request for information under Section 194 (C) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

INFORMATION FROM REGISTERS

All requests for information from the Registers of Patents Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the names of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

FREEDOM OF INFORMATION ACT

What does it do?

Gives you the right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).

Requires Commonwealth Government agencies to make available to members of the public:

- information about agencies, their functions and operations
- information about rules and practices which are used in making decisions which affect you.

Gives you a legal right to:

- see non exempt documents held by agencies, and
- appeal against a decision not to grant access to a document.

What documents can you see?

The Act gives you the right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.

Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films and videotapes.

Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or the Designs Act 1906 are not available under the Freedom of Information Act (Section 12 refers)

How do you apply?

Requests for access to documents must:

- Be in writing
- Provide sufficient information to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999

NOTICE TO ADVERTISERS

The attention of all advertisers and advertising agents is drawn to the provisions of division 1 of Part V of the Trade Practices Act which prohibits various misleading or deceptive conduct and Section 53 provides that a corporation, and in some instances a person, shall not -

- Falsely represent that goods are of a particular standard, quality, grade, composition, style or model or have a particular standard, quality or grade;
- Falsely represent that goods are new;
- Represent that goods or services have a sponsorship, approval or affiliation it does not have;
- Make a false or misleading statement concerning the need of any goods or services; or
- Make a false or misleading statement concerning the existence, exclusion or effect of any condition, warranty, guarantee, right or remedy.

Any breach of Part V of the Act may involve a penalty of up to \$50,000 plus damages and an injunction. Attention is also drawn to State laws that govern advertisements.

Therefore it is an express provision of IP Australia accepting any advertisement that it complies with all State and Commonwealth laws.

REQUIREMENTS FOR ADVERTISEMENTS

Advertisements for publication in the Official Journals can be filed either as hard copy or electronically. Our preference is that they be filed electronically, but please note that they can only be accepted if they are in PDF format or sent as Word documents. All advertisements, whether filed as hard copy or electronically, must be completed either within an A4 page with a 4 cm top and 2 cm side and bottom margin, or within half a page with 2 cm margins all round. If copy does not meet these size requirements and it is necessary to photo reduce it, the quality of the advertisement cannot be guaranteed. All copy must be received by 1:00 pm on Wednesday one week prior to the date of publication. Electronic copy must be sent by e-mail to publications@ipaustralia.gov.au. The charge for a full page advertisement is \$AU 100 and for a half page is \$AU 50.

DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRARS OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website www.austlii.edu.au.

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website www.ipaustralia.gov.au.

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal as appropriate.

HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

Patent and Design Matters 2004

Melbourne	10 - 12 May
Sydney	12 - 14 July
Adelaide	3 - 4 August
Perth	5 - 6 August
Brisbane	2 - 3 September

Note: *Ex parte* matters will have priority over other matters for allocation of a hearing in these sessions.

Trade Mark Matters 2004

Melbourne	17 - 21 February 16 - 20 June 15 - 19 September
Sydney	10 - 14 March 21 - 25 July 27 - 31 October
Adelaide	11 - 12 August
Perth	14 - 15 August
Brisbane	28 - 29 August

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties

LIST OF STATE OFFICES

IP Australia State offices are located in the Australian Capitals at the addresses given below. Requests for information may be obtained by calling at, phoning or writing to these offices or IP Australia, Canberra.

GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (AOJP) reports all major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

(i) FILING -

This is the act of making an application. When the application is first filed certain details are published.

(ii) OPEN-TO-PUBLIC-INSPECTION (OPI) -

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or "OPI"). Relevant application details are published.

(iii) ACCEPTANCE -

This is the Commissioner's acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. Notice of opposition may be filed within three months of advertisement of acceptance.

(iv) OPPOSITION -

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published. If the opposition is to the Certification of an Innovation Patent, the patent number and the name of the opponent are published.

(v) SEALING -

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their application number.

(vi) CERTIFICATION-

This is the Commissioner's Certification after passing examination of a previously granted unexamined Innovation Patent.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

How To Identify Information Using "INID" Numbers

Patents are published in many different countries and in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the **internationally agreed Numbers for the Identification of Data** or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the date on which a document is filed has the INID number (22), while the name of the applicant has the INID number of (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

How Australian Patent Documents are Numbered

Patent applications in Australia are assigned a number at the filing stage in their processing. Each Australian application will retain the same number throughout its life, though different numbers may be associated to the application. The number will incorporate the year of lodgment then a unique number within the appropriate range.

There will be number ranges for types of patents:

100,000 – 199,999	Innovation
200,000 – 799,999	Standard
800,000 – 899,999	Petty
900,000 – 999,999	Provisional

When searching for information and ordering documents it is vital that you understand the numbering systems.

1. **Provisional Applications** are given a ten-figure number

e.g. 2002901123

A provisional application number is identified by the INID number (21).

2. **Complete and Innovation Applications** are also given a ten-figure application number

e.g. 2002200345 Standard

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an unaccepted application has the prefix, AU-A; eg AU-A-2002200234.
A document corresponding to an accepted application carries the prefix AU-B; eg AU-B-2002200234.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because amendment may occur between first publication (OPI) and second publication (acceptance).

A ten-figure application number is identified by the INID number (21).

NOTE When ordering any patent document from us, whether accepted or not, please quote the ten-figure application number preceded by the appropriate prefix.

Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed,
- (iii) Applications Open to Public Inspection
- (iv) Applications Accepted, and
- (v) Innovation Patent Certified.

The Journal lists the information published in that category in an alphabetical Name Index list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a Numerical Index. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also IPC Indices provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the application which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

Using the Indices

1. To Find Patent Information if You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
A) Provisional applications filed - Name Index		B) Complete applications filed - Name Index	
The <u>name</u> of the applicant	(71)	The <u>name</u> of the applicant	(71)
The Provisional application <u>number</u>	(21)	The <u>number</u> assigned to the application	(21)
The <u>date</u> of filing	(22)	The <u>date</u> of filing	(22)
The <u>title</u> of the invention	(54)	<u>Title</u> of the invention	(54)
		<u>Number</u> of priority document(s) if any	(31)
		<u>Date(s)</u> of filing of priority documents	(32)
		<u>Country</u> of which priority documents filed	(33)
		PCT application <u>number</u>	(86)
<u>ITEM</u>	<u>INID</u> <u>No.</u>	<u>ITEM</u>	<u>INID</u> <u>No.</u>
C) Applications open to public inspection - Name Index		D) Applications accepted - Name Index	
The <u>name</u> of the applicant	(71)	The <u>name</u> of the applicant	(71)
The <u>number</u> of the document	(11)	The <u>number</u> of the document	(11)
The <u>number</u> assigned to the application	(21)	The <u>number</u> of the accepted document	(10)
The <u>date</u> of filing	(22)	The <u>number</u> assigned to the application	(21)
The <u>title</u>	(54)	The <u>date</u> of filing	(22)
The <u>classification marks</u>	(51)	The <u>title</u>	(54)
Priority document <u>number(s)</u>	(31)	The <u>classification marks</u>	(51)
<u>Date</u> of filing of priority document(s)	(32)	PCT publication <u>number</u>	(87)
<u>Country</u> in which priority document filed	(33)	Priority document <u>number</u>	(31)
Publication <u>date</u> of unexamined document	(43)	<u>Date</u> of filing of priority document(s)	(32)
Inventors <u>names</u> if known	(72)	<u>Country</u> in which priority document filed	(33)
Patent <u>Attorneys</u>	(74)	Publication <u>date</u> of unexamined document	(43)

Related by addition	(61)	Publication <u>date</u> of examined document	(44)
Related by division	(62)	Publication <u>date</u> of granted patent	(45)
		Inventors <u>names</u>	(72)
		<u>Patent Attorneys</u>	(74)
		Related by addition	(61)
		Related by division	(62)

<u>ITEM</u>	<u>INID</u>
	<u>No.</u>

E) Patents Certified – Name Index

The <u>name</u> of the applicant	(71)
The <u>number</u> of the accepted document	(10)
The <u>number</u> assigned to the application	(21)
The <u>date</u> of filing	(22)
The <u>title</u>	(54)
The <u>classification marks</u>	(51)
Priority document <u>number</u>	(31)
<u>Date</u> of filing of priority document(s)	(32)
<u>Country</u> in which priority document filed	(33)
Publication <u>date</u> of granted patent	(45)
Inventors <u>names</u>	(72)
<u>Patent Attorneys</u>	(74)
Related by division	(62)

You will notice at each stage of following application through that all applications are in alphabetical order of **Applicant**, not inventor.

2. To Find Information About a Patent Application if You Know its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Innovation Applications filed.
- D) Applications **Open to Public Inspection**.
- E) Applications **Accepted**.
- F) Innovation Patent **Certified**

3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification (IPC). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of AIPO's state offices.

The indices to use are

- A) Applications **OPI** - IPC Index
- B) Applications **accepted** - IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

'INID' NUMBERS in use on Australian Patent Documents

'INID' is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

(10) Document identification

- (11) Number of the document
- (12) Plain language designation of the kind of document
- (19) WIPO country code, or other identification, of the country publishing the document.

(20) Document filing data

- (21) Number(s) assigned to the application(s).
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date and date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

(30) Priority data

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

(40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant or certification has taken place on or before the said date.

(50) Technical Information

- (51) International Patent Classification
- (52) Domestic or national classification
- (54) Title of invention
- (56) List of prior art documents, if separate from descriptive text
- (57) Abstract or claim

(60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s).
- (62) Related by division(s).

(70) Identification of parties concerned with the document

- (71) Name(s) of applicant(s)
- (72) Name(s) of inventor(s) if known to be such
- (74) Name(s) of attorney(s) or agent(s)
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

(80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number
- (87) PCT Publication Number

NOTE

- (1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the prefix AU-A or AU-B.

AU-A = Pre-examination

AU-B = Post-examination

- (2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)², (51)³, (51)⁴ and (51)⁵.
- (3) INID code 74 provides for the name of the patent attorney, or firm of attorneys, prosecuting an application.

Official Notice

Professional Standards Board for Patent and Trade Marks Attorneys

2004 Board Examinations Syllabi

The Professional Standards Board will be conducting examinations in 2004 in the following Topic Groups:

- **GROUP F — Patent System**
- **GROUP G — Drafting Patent Specifications**
- **GROUP H — Interpretation and Validity of Patent Specifications**

The syllabi for each topic group are attached and are also available on the PSB website (www.psb.gov.au) in the What's New Section.

Please do not send applications for enrolment in these examinations at this time. Further notices concerning the requirements for enrolment will be published in the Journals and on the PSB website in June 2004.

Enquiries about the Board's examinations should be addressed to:

**The Secretary
Professional Standards Board of
Patent and Trade Marks Attorneys
PO BOX 200
WODEN ACT 2606**

PH: 02 6283 2275

Professional Standards Board for Patent and Trade Marks Attorneys**TOPIC GROUP F - PATENT SYSTEM**Intended Outcome

The intended outcome of study in this topic group is set out in Schedule 1 of the Patents Amendment Regulations 1998 (No.10). That is, candidates should be able to advise and to handle the interests of a client in prosecution and maintenance of a patent application, including advising on the desirability of seeking patent protection and provision of alternative protection in Australia and in other countries.

General

This topic group covers practical aspects of the law relating to patents and patent applications and alternatives thereto including the practice and procedures of the Australian Patent Office and the patent offices of other jurisdictions. Because this subject is part of a qualification which entitles a person to practice as a Patent Attorney, the emphasis is on a practical approach rather than on academic analysis of the law and of reported cases. However, candidates will be expected to have a general knowledge of any relevant cases, and the ability to appropriately refer to relevant case law and reported cases should be demonstrated where necessary. This is especially true in respect of subject matter not covered in Group E.

Australian Systems

Candidates are expected to have a thorough and practical knowledge of the Patents Act 1990 and subsequent amendments thereto, and of the Patents Act 1952 so far as it is still relevant, together with the corresponding Regulations. Candidates should also have an understanding of the provisions of the Trade Practices Act 1974 which impact upon the ability of a patentee to exploit his rights. Candidates should also have an understanding of the purpose, intent and scope of circuit layout rights and plant variety rights as enshrined in the Circuit Layouts Act 1989 and the Plant Breeders Rights Act 1994, and a working knowledge of how to obtain protection for these forms of intellectual property.

In relation to Australian Patent law and procedure the subject specifically includes the following topics:

Patent application filing and prosecution

- searching
- filing
- examination – ordinary v modified
- opposition: grounds, practice and procedures
- grant

Amendment of patent specifications and other documents

- what kind of amendments are allowable
- clerical errors
- obvious mistakes

Kinds of patent application

- provisional
- complete

- standard
- petty
- divisional
- patent of addition
- convention
- innovation

Duration of a patent

- continuation and renewal fee requirements
- lapsing and cessation
- restoration of rights via Section 223
- extension of term of petty patent
- extension of term of standard patents

The Register of Patents

- recordal of assignments, licences, mortgages and changes of name
- amendment of the register

The rights of patentees

- licensing
- compulsory licences
- marking of patented articles
- Crown Use
- Restrictions on exploitation

Validity of patents

- revocation
- re-examination

Jurisdiction and powers of prescribed courts and the Administrative Appeals Tribunal

- what decisions can be appealed
- to which tribunal does appeal lie
- which courts can hear infringement and revocation actions

Foreign systems

This topic group encompasses an understanding of the patent laws of all jurisdictions. However, candidates should have a particular working knowledge of the major aspects of the laws of those foreign jurisdictions with whom Australia has a substantial trading relationship, e.g. New Zealand, United States of America, Canada, European Economic Community (also UK, France, Germany, Italy), Peoples Republic of China, Japan, Indonesia and other South East Asian and North Asian jurisdictions. Candidates are expected to have a relatively high standard of knowledge of United States patent law and practice, and of the provisions and practices of the European Patent Convention. In the former case, topics covered include filing and prosecution practice, novelty rules (which must be fully understood), duty of disclosure, various continuation procedures, elections, re-examination, small entity provisions, claim drafting rules. In the case of the EPC, topics including filing, search and prosecution practice, novelty rules, claim drafting rules, new matter rules, and grant procedures. Detailed knowledge of the relevant intellectual property acts of the remaining jurisdictions is not required, however an

understanding of convention and treaty membership, patentability, forms of protection, novelty, inventive step, filing and prosecution procedures and any peculiarities of the law of that jurisdiction is desirable.

Conventions / Treaties

Candidates will be expected to exhibit a detailed knowledge of the practically significant features of the Paris Convention, the Patent Cooperation Treaty (both Chapters, both Articles and Rules) and of their application to the filing of International applications on behalf of Australian clients, as well as the entry into the various National Phases, and the entry into the National Phase in Australia on behalf of overseas clients and associates. An understanding of the purpose and intent of the Budapest Treaty is also required. The ability to compare and contrast alternative routes to protection and the law and procedures and practices of different jurisdictions is required.

Although detailed knowledge of fees is not required, candidates should know in respect of what matters fees are payable, when they are payable, and which courses of action are more cost effective than others.

Procedures which might be examined include securing, maintaining, exploiting, enforcing, attacking and defending rights in patent applications, patents and forms of alternative protection. Candidates must demonstrate that they can give adequate and appropriate consideration to questions commonly addressed to Patent Attorneys by clients and professional associates, and that they can give this advice in a relevant manner. Answers in this subject may be sought in memorandum, opinion, letter or essay form. The subject requires the candidates to demonstrate the ability to analyse and think through problems, and to give correct advice to associates and to clients in a clear, helpful and meaningful manner.

Candidates should be able to address questions which require them, for example to:

- Compare and advise on the different options available for securing protection;
- Relate important differences in law, drafting and procedural practice, and standards applicable in Australia and overseas in respect of both standard and second tier patent systems;
- Analyse and understand the intellectual property position of a competitor and advise the client on the options available; avoid, challenge or otherwise deal with that position.

ASSESSMENT

The examination in Group F is a single paper. The examination will be closed book except that candidates will be allowed to take into the examination room an un-marked and un-annotated copy of the Patents Act 1990, the Patents Act 1952, the Trade Practices Act 1974 and the corresponding Regulations.

Candidates should be familiar with current and past case law in those aspects of this Topic Group that are not examined under other Topic Groups. This includes for example case law relating to amendment, opposition, patents of addition, crown use and compulsory licensing. This list is a guide only. Any aspect of the theory of law not examined in Australian Patent law covered in topic Group E should especially be reviewed. It is strongly suggested that candidates keep up to date with recent decisions by reading current reports.

Candidates are advised to study past examination papers and to read recent newsletters such as those of overseas associates; the Institute of Patent and Trade Mark Attorneys; and those of other societies and organisations as well as practice notices emanating from the Australian Patent Office. If a candidate does not regularly have first-hand experience of any one of the above aspects, relevant information should be obtained from an experienced practitioner.

Professional Standards Board for Patent and Trade Mark Attorneys

GROUP G - DRAFTING PATENT SPECIFICATIONS

Candidates are required to consider given details of an invention, in the light of information concerning the closest available prior art, and to draft one or more of the following specifications to accompany an appropriate application for patent protection in Australia:

- (a) a provisional specification for a Provisional Application;
- (b) a complete specification for a Standard or Innovation Patent Application, whether for lodgment after a Provisional application or not;
- (c) a complete specification for an International Patent Application.

The specifications should be drafted not only to comply with the requirements of Section 40 of the Patents Act, but also to include a discussion of the most pertinent prior art sufficient to identify the invention as well as an adequate description of each embodiment of the invention provided in the given details.

Candidates are required to exercise a considered judgement, based on the given details and on their own assessment of the prior art, in deciding the most appropriate manner of defining the invention.

In the case of a complete specification, candidates are expected to include at least one broad claim and several dependent claims which define the most important secondary features of the invention.

Purpose

The purpose of this topic group is to test a candidate's ability to prepare an adequate specification for lodgment in support of an Australian provisional or complete patent application. These guidelines are intended to assist candidates in their preparation for the examination. The suggested approach and technique described below is not necessarily the most appropriate in all circumstances encountered in practice. For example, in some practical situations, it may not be desirable to identify or discuss the prior art. However, it is suggested that in the examination in this topic group such identification and discussion is important.

Assessment

Since the examination is necessarily conducted in an artificial environment, candidates should remember that the answer should be written in a manner which clearly discloses drafting ability to the examiners. One of the primary aspects to be assessed by the examiners is whether each candidate has grasped the essential substance of the invention from the material provided in the Question Paper. For this

reason, candidates should take care to draft their specification in a manner which clearly displays what the candidate regards as being the inventive step in a manner which is consistent throughout the specification. Inconsistencies of this sort are a common reason for failure in this topic group. While the examiners make every possible allowance for the artificial environment in which the examination is conducted, the specification drafted by the candidate must clearly reflect the candidate's intentions and if a candidate believes that it may not be clear from the specification what the candidate's intentions were, the candidate should submit explanatory notes to that end. Since this topic group is concerned with practical application, candidates should not present for the examination until they have had a suitable amount of practice at drafting specifications. If candidates do not draft specifications on a day to day basis, they cannot expect to pass the examination unless a substantial number of practice specifications have been drafted before the examination.

The examination in Group G will be open book.

The examination will comprise a choice of 2 Questions. The first Question will be as technology neutral as possible in which an understanding of a simple mechanism or device is required. The second Question will be directed to a relatively simple product and/or process in a chemical field. In each case, the Question will require candidates to absorb background information, assess prior art and draft a nominated specification. Where a complete specification is sought, the claims defining the invention will be required to be clear, concise and define an invention which exhibits novelty and an inventive step over the given prior art.

The Approach Required

In considering the approach to be taken in this examination, it must be kept in mind that a complete specification must perform three basic functions in order to comply with Section 40 of the Patents Act. It must:

1. Fully describe the invention;
2. Fully describe the best method of performing the invention (the so-called preferred embodiment); and
3. Clearly and concisely define the invention by means of claims which establish the monopoly and which are fairly based on the description contained in the specification.

(1) Describing the Invention

Although it is not a specific requirement of Section 40, it is necessary in this examination, and in appropriate circumstances in everyday practice for that matter, to generally describe the most pertinent prior art in a manner which displays to the Examiners that the candidate has understood the essential nature of the prior art and such shortcomings as are overcome by the invention. This part of the specification should be drafted in such a manner as to logically lead to the inventive step of the invention under consideration. It follows from the above that the prior art must be

carefully assessed, reduced to those features which are important to the invention and then concisely described in the specification as a forerunner to the description of the inventive step. Although it is common, and acceptable, to describe the invention in the same terms as are used in the broadest claim of the specification, an alternative approach is to describe the bare essentials of the inventive step and the manner in which this overcomes the prior art previously discussed. In this way the candidate will make sure that the Examiners fully appreciate what the candidate regards as being the essence of the invention. However, this style of drafting should not be adopted unless the candidate is confident that inconsistencies between the so-called Statement of Invention and the broadest claim will not result.

In seeking to distinguish the invention from the prior art documents and the material contained in the Question Paper, candidates should consider the following general areas:

- (a) the field of application of the invention as originally conceived by the inventor;
- (b) the advantage that the invention has over prior art attempts to solve the same problem;
- (c) the differences between the invention and the prior art apparatus or process in terms of integers or steps;
- (d) identify whether the invention has application in other fields of technology other than the one listed under (a).

The next step is to select from the differences identified under (c), the integer or integers which provide the principal improvement or improvements in the invention. It is important to remember that the feature selected as the inventive feature does not need to give rise to all of the advantages of the invention as conceived by the inventor. There may in fact be several inventions. It is also necessary to remember that often advantages that are regarded by the inventor as important may not necessarily be inventive and therefore have nothing to do with the invention itself.

(2) Describing the Preferred Embodiment(s)

In drafting the description of the preferred embodiment(s), candidates should take care to present this description in a manner which shows the examiners that the candidate understands how the embodiment(s) work. Each integer of each embodiment must be described together with its interrelationship with other integers. If the manner of operation is important to the invention, extra care must be exercised to clearly describe such aspects. Consistency of terminology is important and candidates should avoid the use of different terminology for the same integer both within the description of the preferred embodiments and within the claims. If any candidate is not familiar with the use of general terminology likely to be encountered in answering the preferred Question, then practice with the use of such terminology should be undertaken before the examination.

(3) Drafting the Claims

The single most important part of a patent specification is the main claim. The scope of this claim will determine the protection obtained with the resulting patent, and may eventually be subjected to rigorous analysis by the Courts. The scope of the main claim will be determined on the basis of the candidate's assessment of the prior-art and the information provided in the Question Paper. In performing this assessment, the candidate must be careful to consider in a critical manner all of the material contained in the Question Paper as well as such prior art documents as are provided. The candidate should not assume that all features which are indicated in the Question Paper to have importance are essential to the invention; candidates must perform their own assessment of the features and decide which of such features should be included in the main claim. Candidates will appreciate that in practice an inventor's assessment of what is the invention is not necessarily the same as the Attorney's assessment of the invention in the light of all of the information at the Attorney's disposal. However, it is reasonable to assume that most of the features indicated in the Question paper as having importance are sufficiently important to be included in at least the subordinate claims.

In drafting the main claim, the candidate should consider the various fields in which the invention will have an application and particularly where the primary need for protection lies. For example, if the invention relates to a valve which is applicable to fields as diversified as taps and internal combustion engines, the invention should be defined in terms of the valve structure alone with either generalised or non-limiting reference to the fields of application. Similarly, where the invention relates to an improvement in a machine which is purchased only on a small scale but contains components which need regular replacement the interests of the client would be best served by a claim drafted in terms of the replaceable components, provided of course the invention resides in the components; otherwise novelty and fair basis problems will ensue.

The candidate should also consider whether various forms of claims should be included in order to fully protect the invention, for example, whether both product and process should be included.

In addition to the above, candidates should take into account future attempts that may be made to avoid the patent granted on the invention. On the question of contributory infringement, the possibility of supply of part only of the article defined in the claims or supply of a kit of parts should be borne in mind. However, great care should be exercised in testing the novelty/obviousness/fair basis of any claims drafted to include such aspects.

Having identified the invention and selected the most desirable form of claim for protecting the invention, the claim should be drafted. Candidates must keep in mind that claims are written in order to be interpreted and, accordingly, should be aware of rules of interpretation which will be applied to the claims both during examination and after patent grant. In this regard it is most important to keep in mind to whom the claim is addressed and to draft the claim in terms that would be readily understood by a person skilled in that art. As an example of the importance of choice of language, consider a piece of metal that is bent into a particular two or three dimensional shape.

If the claim is defined solely in terms of a piece of metal bent into a particular shape, the context of the invention will not be clear and novelty/fair basis problems will almost certainly ensue. However, by using a generic term such as "paper-clip" or "rail fastening clip", the words of the claim are immediately placed into context and the claim is then interpreted as if by a person of ordinary skill in that particular field.

In drafting the broadest claim of a complete specification, candidates should not be overly concerned with the question of clarity. The desire for clarity must be carefully balanced with the need for succinctness and if it comes to a choice between the two, succinctness is at least as important as clarity, if not slightly more so in the context of this examination. Most attempts to define an invention in a manner which is completely clear in every respect results in a claim which is unwieldy and often far too limited. Patents are rarely held to be invalid for lack of clarity even though the wording of the claims is often criticised by the Courts. Lack of clarity is in most cases easily corrected whereas it is often difficult to remove restrictions and revert to a succinct claim once a detailed claim is already on file.

The style of claim presented by a candidate is not particularly important and the examiners will accept a claim drafted in any style provided it clearly defines a novel invention in a relatively succinct manner. However, it is probably wise for candidates to avoid the United States style of drafting in which each integer is described in greater detail than is required according to Australian practice. Australian Courts are more literal in their interpretation of claims than United States and European Courts. For this reason, a more general definition of each integer which highlights the inventive concept is to be preferred.

Once the broadest claim is drafted, carefully checked to ensure that it is as clear as possible without being too restricted and is clearly novel in the Griffin v. Isaacs sense, the candidate should proceed with the drafting of the subordinate claims. In drafting these claims, candidates should plan the order of the claims so that the scope of the definition of the important features of claim 1 are first dealt with followed by claims directed to the more important features of the preferred embodiment. Claims which define no more than matters of common general knowledge, such as, "wherein the device is made from plastics", are of no value whatsoever and should be avoided.

In the event that a candidate believes that more than one inventive aspect has been described in the Question Paper, an independent claim to each aspect should be drafted. However, great care should be taken to avoid any dilution of the main inventive concept by the inclusion of an independent claim to a feature which is at best marginally inventive. While in practice it may be appropriate to include several independent claims notwithstanding the degree of inventiveness of each aspect, the purpose of this examination is not to see how many inventions the candidate can extract from the information provided but to see whether the candidate fully appreciates the primary invention.

Technique

Since the most important part of this examination is the clear identification and definition of the inventive step, it may be useful, once all of the material has been read and the inventive step identified, to prepare at least a detailed outline of the features

that will be included in the broadest claim before commencing preparation of the specification. In this way, inconsistencies between the discussion of the prior art and its problems, the solution offered by the invention and the definition of claim I should be avoided. If the candidate is having difficulty deciding on the invention it may be of assistance in clarifying some of the issues to initially prepare the description of the preferred embodiment. However, this approach should be avoided unless the candidate is confident that the terminology being used in describing the preferred embodiment will not be inconsistent with the terminology finally used in the drafting of the claims.

Although the subject matter of the invention under examination will determine the time taken to draft the various parts of the specification, the candidates should thoroughly read all of the material, and particularly the Question Paper, before commencing any of the drafting steps. The Examiners believe that it is appropriate to spend the first hour reading, assessing and deciding on the invention. The balance of the time should be allocated to specification preparation with more time being allocated to the drafting of claim I and the subordinate claims than to the remainder of the specification.

Professional Standards Board for Patent and Trade Marks Attorneys

TOPIC GROUP H — INTERPRETATION AND VALIDITY OF PATENT SPECIFICATIONS

1. Purpose and Scope

This examination tests candidates' skills in the application of the rules of interpretation to an Australian patent specification and in the application of Australian Patent Law in the assessment of:

- (i) the validity of an Australian patent or patent application under the provisions of section 40;
- (ii) the validity of an Australian patent or patent application in the light of prior art information supplied including prior published specifications and prior user; and
- (iii) the infringement of an Australian patent by a product or process described in material supplied.

The need for a patent attorney to provide sound advice on these issues makes this subject a vital part of the examination process.

The candidate also needs to be aware of other grounds of revocation and options for amendment.

2. The Structure of the Examination Paper

While there will be some variation from year to year, candidates will normally be presented with

- (a) A copy of the subject patent specification. The technology will have been chosen so as to be understandable by candidates regardless of their field of technical expertise;
- (b) A description, which may be in the form of a patent specification or otherwise, of the matter in relation to which the candidate is to decide the issue of infringement; and
- (c) Prior art material on which conclusions as to novelty and obviousness are to be based. This may include one or more documents in the form of patent specifications or otherwise, and may also include information relating to the state of common general knowledge.

The examination is open book.

Candidates will be asked to set out their reasoning and opinion as to compliance with section 40 and paragraph (18)(1)(b), and as to infringement.

Candidates will normally be asked to express their reasons and conclusions in relation to each of the claims of the specification.

3. Assessment

Assessment of candidates' answers will be based on the candidate's:

- (a) Identification of key issues - that is to say, the issues on which will turn the validity and infringement of the specification in question;
- (b) Reasoned interpretation of the key elements of the specification in question and, where necessary, of the information supplied; and
- (c) Reasoned application of the law in discussing the likely outcome of litigation relating to validity and infringement of the specification in question.

The artificiality of the examination environment, in which the candidate has limited information and must operate under time constraints, is taken into account in the marking of the papers. The examiners will not, however, attempt to read the candidate's mind, and credit will be awarded only for what is written in the answer paper.

Just as in patent litigation one does not expect unanimity of opinion amongst judges on appeal, so in the marking of this paper the examiners will not penalise a candidate merely because a conclusion reached differs from the conclusion reached by the examiners. However, if the reasoning applied by the candidate is absent, flawed or inconsistent, then the candidate will receive a low assessment regardless of whether his or her conclusion agrees with the examiners'.

Inconsistency is a common contributor to failure. For example, if an ambiguity in a claim has been resolved by reference to the body of the specification to arrive at the meaning of an expression used in the claim, then that meaning must be consistently applied in determining all issues.

One of the difficulties with this subject is that the candidate must rely only on the factual information provided. This may sometimes be insufficient to enable the candidate to make a final judgement on some point, and where this is genuinely the case candidates will be marked on the basis of the reasoning they apply to the point in question, and on their indication of the information which would be needed in order to arrive at a firm conclusion.

4. Answering the Paper

(a) Planning

If the answer is to appear in a coherent and consistent form, it is essential that the answer be planned. One should therefore avoid writing an answer until:

1. all of the documents have been properly read;
2. the invention properly identified;
3. the key language of the claims relating to the issues identified and considered; and
4. decisions made on the issues.

(b) Writing the Answer

As with all examinations, the candidate must write clearly, both in terms of handwriting and of expression. It is strongly recommended that the candidate allows sufficient time at the end of the examination to read through the answer paper and at least check the clarity of the writing.

There is no one way to write an answer in this examination. However, if regard is had to the points made above in relation to the recommended approach and the importance to the examiners of the candidate's reasoning, it will be apparent that where the nature of the paper allows it, the answer will best have the same logical flow as the analysis on which it is based.

Just as in a well-written judgement therefore, the candidate's analysis will best proceed logically from a consideration of the nature of the invention, then through the resolution of those construction questions necessary to enable the consideration of the issues of section 40, infringement, novelty and obviousness, to the consideration of those issues themselves.

A satisfactory way of writing the answer will usually therefore be to commence with a discussion of the prior art and its problems, leading to a statement as to what the inventor saw as the solution and including a discussion of the features which provide that solution as well as any advantages gained.

In the process of identifying the invention, and in the course of ascertaining the differences, if any, between the invention as defined in a given claim and the prior art, and between a given claim and the possible infringement, questions of construction will arise in the specification in question and perhaps also in the prior art documents. (Classic examples of such a question are the proper test of inextensibility and the meaning of "microporous" discussed in the 3M case 29 ALR 29, or the meaning of "biased" in *Dart v Decor* 13 IPR 385).

Having thus identified the invention, the next step will be to discuss the claims with particular reference to any terms which will affect their scope and which require interpretation in order to deal with questions of infringement and validity. Further, any omissions from the claims should also be dealt with.

The task of assessing validity is then one of firstly considering section 40, which is to do with clarity and fair basis, by applying the relevant law to the results of the preceding interpretation.

The two remaining areas of infringement and prior art-related validity may then be dealt with in either order as seems most convenient to the candidate. Also, candidates should contemplate the nature of any amendments that may be available to the patentee, and the impact of those amendments on the validity and infringement issues.

It will normally be easier to deal with novelty before obviousness, and to separate the consideration of each in view of the different prior art bases which will usually be involved.

Prior to dealing with the substantive issues of novelty and obviousness, the status of the prior art material under the various heads of section 7 of the Act must of course be decided, as usual with explicit reasoning and the application of the relevant law.

Candidates must carefully deal with questions of law in arriving at their conclusions on one or more of the issues of ambiguity, fair basis, novelty and inventive step. Candidates may include in their answer reference to the most appropriate case law. However, marks will not be awarded for reciting extracts from the case law. Rather, the examination is intended to enable candidates to demonstrate their ability to apply the case law.

Candidates may on occasion be given insufficient information clearly to decide the point of obviousness. In such a case it is usually best to deal with the question of obviousness by stating the circumstances which would enable the invention as claimed to be held invalid in the light of the prior art provided. However, where the paper sets out information as to matters of common knowledge for the purpose of enabling a decision to be made on obviousness, candidates must not shrink from the task of reaching that decision and expressing their reasoning on the issue.

The above procedure is not the only acceptable format for the answer and candidates should not feel constrained to adopt it if they believe another approach is more appropriate to the paper in question.

(21) 2004902129 (22) 22.04.2004
(54) Goods Handling Arrangement

(71) Jackson, M.
(21) 2004902106 (22) 21.04.2004
(54) A protective cover for fruits

(71) Jones, B.
(21) 2004902089 (22) 20.04.2004
(54) Irrigation device for watering plants

(71) Justoy Pty Ltd
(21) 2004902097 (22) 20.04.2004
(54) Access device / articulated ladder

Kadence Photonics Pty Ltd see Engana Pty Ltd
(21) 2004902076

(71) Kalem, A.
(21) 2004902139 (22) 23.04.2004

(54) The Smart Lens

(71) Katsis, N.
(21) 2004902109 (22) 20.04.2004
(54) A carrier for complementary products

(71) Katsis, N.
(21) 2004902110 (22) 20.04.2004
(54) Childproof package

(71) Kempin, R.
(21) 2004902094 (22) 21.04.2004
(54) Automatic yacht rig sail tensioner and shock absorber

(71) Kennedy, M.
(21) 2004902140 (22) 23.04.2004
(54) A Gutter Guard

(71) Knorr, A.
(21) 2004902115 (22) 22.04.2004
(54) Aligning radial wedge sectors

(71) Lang, G.
(21) 2004902126 (22) 22.04.2004
(54) A Food Cabinet

(71) Le Griffon, K.
(21) 2004902062 (22) 20.04.2004
(54) Safe distance indicator for motorists

(71) Linfoot, R. ; Williams, J.
(21) 2004902145 (22) 22.04.2004
(54) An Indicator

Luca, L. see Del Bono, G.
(21) 2004902085

(71) Meat & Livestock Australia Limited
(21) 2004902133 (22) 21.04.2004
(54) A detector for detecting an odour associated with red meat

(71) Mobile Tracking and Data Pty.Ltd.
(21) 2004902152 (22) 22.04.2004
(54) Passenger tracking in vehicles

(71) Nautitech Pty Ltd

Innovation Patent Applications Filed

Name Index

Applications listed below were processed through the Patent Office Canberra during the period ending 20 Apr 2004.
(This list may contain multiple listings of a patent application where there are multiple applicants for that patent.)

(71) Clinton, G.
(21) 2004100297 (22) 19.04.2004
(54) A Bath Assembly and System

(71) Evans, T.
(21) 2004100296 (22) 21.04.2004
(54) Glass Air Cleaner

(71) Grebert, B.
(21) 2004100298 (22) 20.04.2004
(54) G-string garment

Hedges, J. see Hedges, S.
(21) 2004100300

Hedges, D. see Hedges, S.
(21) 2004100300

(71) Hedges, S. ; Hedges, J. ; Hedges, D.
(21) 2004100300 (22) 22.04.2004
(54) CD/DVD case central locking device

(71) Henry, M.
(21) 2004100301 (22) 23.04.2004
(54) Transport managers toolbox

(71) Olsson, B.
(21) 2004100299 (22) 22.04.2004
(54) Camera crane
(31) 2003902002 (32) 28.04.03 (33) AU

(71) The Dream Farm Pty Ltd
(21) 2004100302 (22) 25.04.2004
(54) Grindenstein

Numerical Index

2004100296	Evans, T.	2004100302	The Dream Farm Pty Ltd
2004100297	Clinton, G.		
2004100298	Grebert, B.		
2004100299	Olsson, B.		
2004100300	Hedges, S. ; Hedges, J. ; Hedges, D.

Applications Lapsed, Refused Or Withdrawn, Patents Ceased or Expired

Reference to the application numbers must include the year of the application of the patent, which is shown preceding the numbers.

The codes next to each number have the following meanings:

Code Meaning

1	Application Lapsed Section 142(2)(a)
3	Application Lapsed Section 142(2)(c)
4	Application Lapsed Section 142(2)(d)
5	Application Lapsed Section 142(2)(e)
6	Application Lapsed Section 142(2)(f)/See Reg. 8.3(3)
7	Application Lapsed Reg. 3.2A(3)
8	Application Lapsed Reg. 3.4(6)
9	Application Lapsed Section 142(3)
10	Application Lapsed Section 142(4)(b)
11	Application Lapsed Section 148(1)(c)
12	Application Withdrawn Section 141(1)
13	Application Withdrawn Section 141(3)/See Reg. 8.3(2)
14	Patent Ceased Section 143(a), or Expired
15	Patent Ceased Section 143(b)
16	Application Refused
17	Application Lapsed Reg. 22.2B(2)
18	Application Lapsed Reg. 3.2B(3),(5) or (6)
19	Patent Ceased Section 143A(a)/Reg. 22.2B(2)
20	Patent Ceased Section 143A(b)/Reg. 22.2D(2) or (4)
21	Patent Ceased Section 101C(b)/Section 143A(c)/Reg. 9A.4
22	Patent Ceased Section 143A(d), or Expired
23	Patent Ceased Section 143A(e)
24	Application Lapsed Reg. 22.2E(2)
25	Application Lapsed Reg. 22.2I(2)
A	Applications on which examination has not been requested or directed
B	Applications on which a direction to request examination has been given
C	Applications on which examination has been requested or on which an examination report has been issued
D	Applications which have been accepted or advertised accepted, (including applications which have been advertised 'Not Sealed')
E	Patents on which an examination has not been requested
F	Patents on which an examination has been requested or report issued
G	Patents Certified
N	Applications not Open to Public Inspection

Change of Name(s) of Applicant(s), Section 104

2002
2002223272 Bureau of Sugar Experiment Stations The name of the applicant has been changed to **BSES Limited**

2002352808 Graphic Packaging Corporation The name of the applicant has been changed to **Graphic Packaging International, Inc.**

2002355611 Cooperative Research Centre for Advanced Composite Structures Ltd. The name of the applicant has been changed to **Advanced Composite Structures Limited**

Assignments before Grant, Section 113

- 2001**
2001250166 Newbrain Technologies Pty Limited The application has been assigned to **Adsezy Pty Ltd**

2001250809 United States Filter Corporation The application has been assigned to **Weatherford/Lamb, Inc.**

2001257507 Sanders, John Larry; Kimmerly, James Michael; Mazo, Grigory The application has been assigned to **Sanders, John; Specialty Fertilizer Products, LLC**

2001261723 McKesson Automation, Inc.; ALARIS Medical Systems, Inc. The application has been assigned to **McKesson Automation, Inc.; ALARIS Medical Systems, Inc.**

2001276988 Schering Corporation; Corvas International, Inc. The application has been assigned to **Schering Corporation; Dendreon Corporation**

2001280637 Schering Corporation; Corvas International, Inc. The application has been assigned to **Schering Corporation; Dendreon Corporation**

2001281113 Inhale Therapeutic Systems, Inc. The application has been assigned to **Nektar Therapeutics**

2001281166 Spinal Dynamics Corporation The application has been assigned to **SDGI Holdings, Inc.**

2001294068 Consejo Superior De Investigaciones Cientificas The application has been assigned to **Consejo Superior De Investigaciones Cientificas; Midatech Limited**

2001296784 Scimed Life Systems, Inc. The application has been assigned to **Boston Scientific Limited**

2002
2002236796 Oracle Corporation The application has been assigned to **Oracle International Corporation**

2002244022 International Gaming Technology The application has been assigned to **IGT**

2002301461 Inhale Therapeutic Systems, Inc. The application has been assigned to **Nektar Therapeutics**

2002307242 ALARIS Medical Systems, Inc. The application has been assigned to **ALARIS Medical Systems, Inc.**

2002309801 Bramlet, Dale G. The application has been assigned to **Orthopedic Designs, Inc.**

2002316726 Stevenson, Michael; Reeves, Robert The application has been assigned to **Stevenson, Michael**

2002318451 Scimed Life Systems, Inc. The application has been assigned to **Boston Scientific Limited**

2002318867 Inhale Therapeutic Systems, Inc. The application has been assigned to **Nektar Therapeutics**

2002339417 Ulrik Husted, Henriksen; Nicolaj From, Mensberg The application has been assigned to **NEG Micon Control Systems A/S**

Assignments before Grant, Section 113

2003

2003212034 Halco Drilling International Limited The application has been assigned to **Halco Directional Drilling Products Limited**

2003212036 Halco Drilling International Limited The application has been assigned to **Halco Drilling International Limited**

2003217342 ALARIS Medical Systems, Inc. The application has been assigned to **ALARIS Medical Systems, Inc.**

2003904044 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2003904196 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2003904359 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2003904527 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004

2004200225 Genencor International, Inc The application has been assigned to **The Governing Council of The University of Toronto**

2004200617 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900141 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900245 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900450 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900657 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900744 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900814 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

2004900879 CTECH Equipment Pty Ltd The application has been assigned to **CTECH Closures Pty Ltd**

Amendments, Section 104

Applications for Amendment

A person interested in opposing the allowance of the amendment may, at any time within three months from the date of this journal, give notice at the Patent Office using the approved form accompanied by the prescribed fee.

2000

2000247327 Ink jet printhead nozzle array **Silverbrook Research Pty. Ltd.** The nature of the amendment is as shown in the statement(s) filed 16 Mar 2004. Address for service in Australia - Silverbrook Research Pty. Ltd. 393 Darling Street Balmain NSW 2041

Amendments Made

2000

2000258803 **Avocent Corporation** The nature of the amendment is: Amend the name of the applicant/patentee from Cybex Computer Products Corp. to Avocent Corporation

2000258803 **Avocent Corporation** The nature of the amendment is: Amend the name of the inventors to read Schultz, Stephan, Collins, Jamie F, Pinkston, William, DesMarais, Mark, Gilgen, Robert L, Anderson, Robin L, Thomas, Christopher L.

2001

2001238076 **The Government of the United States of America, as represented by the Secretary, Department of Health and Human Services, National Institutes of Health** The nature of the amendment is: Amend the name of the applicant/patentee from The Government of the United States of America as represented by the Secretary, Department of Health and Human Services to The Government of the United States of America, as represented by the Secretary, Department of Health and Human Services, National Institutes of Health

2001247645 **The Coca-Cola Company** The nature of the amendment is: Amend the priority document from 09/536595 28 Mar 2000 US to 09/536593 28 Mar 2000 US

2001283179 **Cephalon, Inc.** The nature of the amendment is: Amend the invention title to read Modulating multiple lineage kinase proteins

2002

2002244278 **Bayer Polymers LLC** The nature of the amendment is: Amend the name of the applicant/patentee from Bayer Corporation to Bayer Polymers LLC.

2002246028 **Gumlink A/S** The nature of the amendment is as shown in the statement(s) filed 08 Oct 2003

2002251896 **Dolby Laboratories Licensing Corporation** The nature of the amendment is as shown in the statement(s) filed 07 Apr 2004

2002314869 **Exelixis, Inc.** The nature of the amendment is: Amend the name of the applicant/patentee from Exelis, Inc. to Exelixis, Inc.

2002315392 **Stemcells, Inc.** The nature of the amendment is as shown in the statement(s) filed 08 Apr 2004

2002318069 **Nederlandse Organisatie voor toegepast-natuurwetenschappelijk Onderzoek TNO; Federal Research and Production Center Altai** The nature of the amendment is: Add the co-applicant Federal Research and Production Center Altai

Amendments, Section 104

2002319544 **Aberdeen University; University of Maryland, Baltimore** The nature of the amendment is: Amend the name of the co-applicant from University of Maryland at Baltimore to University of Maryland, Baltimore

2002321237 **Johnson & Johnson GmbH** The nature of the amendment is: Add the co-inventors Ansmann, Achim Leonard, Mark Jackwerth, Bettina Issberner, Ulrich

2002322430 **Exelixis, Inc.** The nature of the amendment is: Add the co-inventor Roche, Siobhan

2002322527 **CV Therapeutics, Inc.** The nature of the amendment is as shown in the statement(s) filed 06 Apr 2004

2002323697 **Sasol Technology (Pty) Ltd** The nature of the amendment is: Add the co-inventor Lamprecht, Delanie

2002324323 **Chay 13 Medical Research Group N.V.** The nature of the amendment is as shown in the statement(s) filed 29 Mar 2004

2002328924 **Johnson & Johnson GmbH** The nature of the amendment is: Add the co-inventors Leonard, Mark Jackwerth, Bettina Issberner, Ulrich Ansmann, Achim

2002341289 **Dr. Reddy's Laboratories Ltd.** The nature of the amendment is: Amend the invention title to read Benzoxazine and benzothiazine derivatives and pharmaceutical compositions containing them.

2002354531 **SunGene GmbH & Co. KGaA** The nature of the amendment is as shown in the statement(s) filed 12 Jan 2004

2002355086 **Bea Systems, Inc.** The nature of the amendment is as shown in the statement(s) filed 02 Apr 2004

2002355665 **PowderJect Research Limited** The nature of the amendment is: Amend the priority details from 60/916,176 26 Jul 2001 US to 09/916,176 26 Jul 2001 US.

2003

2003203283 **Astaris LLC** The nature of the amendment is as shown in the statement(s) filed 31 Mar 2004

2003271390 **Hasegawa, T.** The nature of the amendment is: Amend the priority details to 10/741,744 19 Dec 2003 US 10/334083 30 Dec 2002 US

2004

2004200860 **Aruze Corp.** The nature of the amendment is: Amend the priority details to read P2003-092529 28 Mar 2003 JP, P2003-092521 28 Mar 2003 JP, 10/697,245 31 Oct 2003 US, 10/697,947 31 Oct 2003 US.

2004200861 **Aruze Corp.** The nature of the amendment is: Amend the priority details from Not Supplied 31 Oct 2003 US to 10/697,246 31 Oct 2003 US.

2004200886 **Aruze Corp.** The nature of the amendment is: Amend the priority details to read 10/697,258 31 Oct 2003 US.

Amendments, Section 104

2004200887 **Aruze Corp.** The nature of the amendment is: Amend the priority details to read 10/697,086 31 Oct 2003 US, 10/697,088 31 Oct 2003 US, 10/697,027 31 Oct 2003 US, 10/697,081 31 Oct 2003 US, 10/697,080 31 Oct 2003 US, 10/697,082 31 Oct 2003 US.

2004200888 **Aruze Corp.** The nature of the amendment is: Amend the priority details to read 10/697261 31 Oct 2003 US

2004200896 **Aruze Corp.** The nature of the amendment is: Amend the priority details from Unknown 31 Oct 2003 US to 10/697,238 31 Oct 2003 US.

2004200901 **Aruze Corp.** The nature of the amendment is: Amend the priority details to read: P2003-056297 03 Mar 2003 JP 10/697,237 31 Oct 2003 US

2004201439 **Ethyl Petroleum Additives Limited** The nature of the amendment is: Amend the priority details to 03252539.6 23 Apr 2003 EP

2003100094 Email Limited The patent has been assigned to **Emwest Products Pty Limited**

Corrigenda

In Vol 17, No 23, Page(s) 8021 under the heading **Extensions of Time, Section 223 - Applications Allowed - Section 223(2)** Under the name The Govt. of the United States of America, as represented by the Dept. of Health and Human Services, Application No. 2000227546, correct the name to read, The Government of the United States of America, as represented by the Secretary of Health and Human Services.

In Vol 17, No 48, Page(s) 16437 under the heading **Assignments Before Grant, Section 113 - 2001** Under the name HM the Queen in Right of Canada rep. by Solicitor General acting through, Commissioner of the RCMP, Application No. 2001258118, correct the name to read Her Majesty the Queen in Right of Canada as represented by the Solicitor General acting through the Commissioner of the Royal Canadian Mounted Police

In Vol 18, No 12, Page(s) 3331 under the heading **Applications Lapsed, Refused or Withdrawn, Patents Ceased or Expired -**

Corrigenda

Under Application No. 2003100989 correct the Publication code to read 20F

In Vol 18, No 13, Page(s) 3487 under the heading **Provisional Applications Filed - Name Index** Under the name Austin, Peter George, Application No. 2004901347, Under INID (71) add applicant Von Pace Pty Ltd.

In Vol 18, No 13, Page(s) 3671 under the heading **Complete Applications Filed - Name Index** Under the name WebFM Pty Ltd, Application No. 2004201102, add INID (61) 2002300115 and INID (62) 2002300115.

In Vol 18, No 16, Page(s) 4660 under the heading **Provisional Applications Filed - Name Index** Under the name Aneeta Widow Systems (Vic) Pty Ltd, Application No. 2004901926, under INID (71) correct the name to read Aneeta Window Systems (Vic) Pty Ltd

In Vol 18, No 16, Page(s) 4695 under the heading **Applications OPI - Name Index** under the names Stanojevic, A. and Stanojevic M., Application No. 2002317521, under INID (72) change the inventor name to read STANOJEVIC, Alexander

In Vol 18, No 16, Page(s) 4703 under the heading **Applications Accepted - Name Index** Under the name Hancor, Inc. delete all reference to 2002225695.

In Vol 18, No 16, Page(s) 4708 under the heading **Certified Innovation Patent - Name Index** Under the name Heard, A ; Stewart, G ; Hooper, R., Application No. 2003100072, under INID (45) correct the date to 29.04.2004.
